The Budget and the Problems of Managing the Public Debt

The following address was delivered by Secretary Snyder before the American Bankers Association at Chicago, Illinois on September 24, 1946.

It is a genuine pleasure for me to be here today to talk with the bankers of America. I feel myself to be among colleagues and, if I may say so, among friends. This is by no means the first meeting of the American Bankers Association I have been privileged to attend. But it is the first I have been privileged to address in an official capacity as Secretary of the Treasury.

I welcome this opportunity for two reasons: first, I want to thank the bankers for the magnificent service they have rendered the country; and, second, I want to talk about some important matters that are of mutual interest.

On the first score, this meeting seems a fitting occasion for me to express again my personal appreciation for the help and cooperation which I have received from the banking profession, during my tours of duty as Federal Loan Administrator, as Director of War Mobilization and Reconversion, and as Secretary of the Treasury since my appointment to that office.

During the past two months, in particular, I have met with the Committee on Government Borrowing and the Savings Bond Committee of your Association, and with groups representing the savings banks, the insurance companies, and other types of financial institutions. These meetings have provided an opportunity for a frank interchange of ideas. They have again confirmed my long-held conviction that the financial community is able and willing to look beyond its immediate self-interest, and to consider the financial problems of the country from the point of view of the well-being of the whole people.

The tradition of cooperation between the banking system and the Treasury is one of long standing: But I need go back no further than the war to illustrate how well it has worked.

During the war, the banks threw themselves wholeheartedly into the sale of United States securities. They gave generously of the time of their executives and their staffs and their facilities in the War Loan campaigns and in the continuous sale of savings bonds. They cooper-

ated with industrial corporations in the establishment and maintenance of payroll savings plans. In addition, the magnificent job which they did in setting up a special system of banking for handling ration coupons contributed in no small measure to the ability of the Government to carry through its vast program of wartime rationing.

This cooperation of the banking system with the Government is continuing in the postwar period. Almost every bank has a sales desk for United States savings bonds, which is manned by bank employees at no cost to the Government. Bankers are heavily represented throughout the state organizations in the present savings bond sales program, just as they were in the days of the War Loans. Many large industrial corporations have continued the payroll savings plan into the postwar period primarily because of the influence, economic vision, and public spiritedness of the bankers on its board of directors.

I want you to know that this cooperation is deeply appreciated in the Treasury. Indeed, it seems to me a condition indispensable to the economic health of the nation. The Government's need of assistance from the banks has certainly not ended with the termination of the war. You know the magnitude of the fiscal problems which still confront us. We shall continue to need your help in solving these problems. You know the immense difficulties of collecting a large volume of taxes. I am sure we shall continue to need, for a considerable period of time, the tax depository facilities you have provided us during the war. It is a great benefit to the Treasury to have tax collections paid through deposits in local banks.

Now, as for the terminal leave bonds which will soon be in the hands of 13 million veterans of the war. You know that there will be a lot of problems involved. One of them will concern redemption facilities. We shall need your help in this connection. We are counting upon you bankers to provide our veterans with the same fine service on their terminal leave bonds when they mature as you are now offering them on the

billions of dollars of savings bonds they own.

All of this is, of course, in addition to the work that you are doing for us on savings bonds which is so important to the success of that program.

Just a little over a year ago we celebrated the end of the war. Today we have largely converted from the ways of war to the ways of peace and this conversion has been so rapid and so successful that our levels of production, income, and employment are all closely comparable to the high levels we reached during total war.

It was no small part that the bankers played in this rapid and successful reconversion. If this spirit and this performance can continue, it will ease materially the difficult problems that all of us still must face.

I want to speak to you today about two important subjects. One of these is the need for balancing the budget. The other is the public debt and the problems of managing it. These subjects are interrelated and, in fact, one common policy should be the rule for both.

In the present economic environment, the Federal Government should direct its primary effort on the fiscal front to achieving a balanced budget. Better yet, it should strive to achieve a substantial surplus of taxes over expenditures to apply to debt reduction. These are the views I expressed the first day I entered the Treasury; and they have the full support of the President.

Early in August, the President released revised budget estimates for the fiscal year 1947, estimating the budget deficit at \$1.9 billion. However, considering that there are certain non-cash expenditures included in the budget, the Government, in current cash transactions, will take in more money this year than it will spend.

Thus, for example, most of the terminal leave pay - that is, over \$2 billion of it - will not be paid in cash, but rather in terminal leave bonds. Also, the interest accruing on savings bonds which amounts to about \$700 million for the fiscal year, is treated as a budgetary expenditure, but it will actually go to increase the value of the bonds, and will not be paid out in cash until the bonds are redeemed. In addition, interest earned by Government trust funds - which, in the aggregate, amounts to about \$600

million represents a noncash transaction. As a result of these and other items, there will be what we may call a cash operating surplus of almost \$3 billion.

The noncash items have to be paid when due, but it is helpful that they do not involve cash outlays to the public at the present time.

While none of us likes the prospective budget deficit of \$1.9 billion, yet it is a great improvement over the estimate made last January. At that time, the deficit was estimated at \$4.5 billion for this fiscal year. Many of us had hoped that the improvement would be even greater. But a tremendous change has nevertheless taken place from the deficit of \$21 billion in the last fiscal year, and \$54 billion in fiscal 1945. Naturally there should be an improvement, for the war, as far as the gunfire is concerned, is over. But, frankly, we have actually done much better than most people expected could be done in the first year after the cessation of hostilities.

You know, it is easy to sit back and say that Government expenditures ought to be cut sharply to balance the budget. It is much harder, however, to put your finger on where the cuts ought to be made. There are people, unencumbered by the responsibilities of office, who blandly say "reduce Government spending by such and such percent right across the board". They never get very specific about it. But a butchering job like that would create more troubles than it would solve. It was recently suggested, for example, that no less than two million persons be fired from the Federal pay roll - as though essential Government agencies and services could be carried on without personnel. Yet I think it will be interesting news to you when I tell you that the Federal Government has already released nearly one million civilian employees since VJ-Day. And we have done this without increasing unemployment in the land or hurting the conduct of Government business. It is worth noting, too, for the sake of realism, that total Federal expenditures for the operation of the Legislative and Judicial Branches and for administration of the Executive Branch aside from military and veterans activities is about \$2 billion for the fiscal year 1947 or around 5% of all Federal expenditures. We want, of course, to reduce these expenses as much as possible, but obviously any cuts large enough to have any significant effect must come elsewhere.

Public works is an area in which cuts in expenditures are often urged during times of inflationary pressures. This counsel is sound, but total Federal expenditures for nonmilitary public works are estimated at only a little over \$1 billion for the present fiscal year. This includes the badly needed housing program.

One of the larger areas of Government expenditures is that composed of interest on the public debt, refunds of taxes, and veterans' benefits. Expenditures for these purposes are estimated at \$13 billion this year. This is made up of \$5 billion of interest on the public debt, \$6.2 billion of veterans' benefits, and \$1.9 billion of tax refunds. There is little prospect of any substantial reduction in these expenditures since they represent commitments already made in accordance with Congressional mandates.

Expenditures for international finance are estimated at \$4.2 billion. These expenditures are investments for the most part, but the figure does not make any allowance for future repayments and recoveries. International finance represents about 10% of total expenditures; and, while this is a lot of money, there is no doubt that these are wise outlays in the interest of our international responsibilities.

The new estimate for national defense for this fiscal year is \$18.5 billion in a total budget of \$41.5 billion. The January budget estimate was about \$15 billion. There are two principal reasons for the increase. One of these is the payment of terminal leave to enlisted men - amounting to nearly \$2.5 billion - most of which, as I have said, will be paid in terminal leave bonds. The other amounts to more than \$500 million for the increase in pay of the armed forces provided for in legislation recently enacted.

The determination of the amount or the necessity of particular expenditures does not lie within the province of the Treasury Department. I am not in a position to say whether national defense expenditures could be reduced without impairing our national security. I certainly want a strong America. I certainly do not want to repeat the mistake we made after the first World War. But I do want to emphasize that the size of this group of expenditures singles it out for special attention in looking for areas in which to reduce expenditures - keeping in mind, of course, that budgetary considerations must be

secondary in the determination of our needs for national defense.

Let me assure you that there is no man in this country more anxious than President Truman to accomplish the major objective of balancing the budget and reducing the public debt. This, the President feels, can be done without sacrifice of the forward looking policy he so persistently advocates. The President believes our great hope for the future lies in the vitality of our system of individual enterprise and in the enormous capacity of our country to produce and consume.

Turning from expenditures to receipts, tax collections continue to run at a high level. As a result of the rapid reconversion from war to peacetime production, our net receipts in this fiscal year are estimated at almost \$40 billion. This is only about \$7 billion less than the peak collections reached during the war.

The maintenance of the present level of taxes has served to reduce the deficit sharply. I believe, and I think that the Congress and the American people believe, that for our common good our present tax levels must be maintained for some time. This is inescapable if we are to achieve a balanced budget and a surplus to be used to reduce the public debt. I know you will agree that the debt should be cut as much as possible in exceptionally prosperous times such as these; and, as bankers, you will agree also, I think, that it is pure fantasy, if not plain demagogic, to talk of tax reduction and debt reduction in the same breath.

In the tax field, it is the role of the Treasury to make recommendations. What the law is, will depend upon the action of Congress.

Let us turn now to the management of the public debt. I use the term in an economic sense, rather than in a narrow, bookkeeping sense.

The public debt today is so big that it dwarfs all other debts in comparison. This debt is of vital significance to banks - and other investors, too - because Government securities are now one of their largest asset items.

Fifty-five percent of the total assets of all insured commercial banks are in United States

securities. For mutual savings banks, Federal securities constitute nearly two-thirds of all assets; and for insurance companies, the ratio is almost one-half. For nonfinancial corporations, about one-half of their liquid assets consists of Federal securities. Individuals also hold a large volume of United States securities - in fact, hold twice as many as all life insurance companies and mutual savings banks combined.

So, it is no wonder that the management of the public debt involves many issues. No wonder that there are many ideas as to what should be done. Frank discussion of these ideas - competition among them for survival - is a healthy manifestation of the democratic process in operation.

One aspect of public debt management which is frequently discussed has to do with the size of the short-term debt. The distribution of the debt by maturity classes is primarily a function of the distribution of ownership - that is to say, securities are tailored to the needs of the various investor classes as much as possible. Thus, short-term securities go to the banks and to business organizations. Almost half of bank holdings of securities are due or callable in less than one year. In the case of nonfinancial corporations, four-fifths of United States Government security holdings are either presentable on demand or fall due within one year.

In contrast, longer-term securities are designed for long-term savings investors, such as insurance companies, savings banks, and individuals. Three-fourths of the Federal securities held by insurance companies and savings banks are not due or callable for more than ten years. In the case of individuals, more than two-thirds of United States securities held are savings bonds, which were designed to avoid the risks of market fluctuations which proved so disastrous to the small holder of bonds after World War I.

Accordingly, this tailoring of securities to meet investors' needs sets the maturity structure almost automatically; and has resulted in a substantial volume of short-term securities. It may be noted in passing that the same idea was followed by the British and Canadian Governments in their war financing.

On the question of the short-term debt, I wonder if you know the extent of the Treasury's program of debt reduction in recent months. From

February 26 through September 1, the Treasury reduced the public debt by about \$14 billion as a result of the heavy pay-offs made on maturities of marketable securities each month. Preliminary figures indicate that commercial banks and Federal Reserve Banks reduced their holdings of Federal securities by about seven-eighths of the total debt reduction during the period. This is an example of public debt management tied in to the fiscal program of the Government with the objective of aiding the control of inflationary forces.

Now let's spend a minute on the savings bond program. In my opinion, this program is of prime importance to our postwar financing and is vital on the fiscal front at the present time. I do not believe that it would be helpful under present conditions to promote an all-out bond selling campaign like the War Loans or the Victory Loan. It is possible, however, to do a day-to-day job selling bonds in order to maintain and extend the payroll savings plan and to sell the American people on the idea of investing in savings bonds for their own good. Savings bond promotion actually is doing this. Sales this fiscal year will be about \$8 billion if the present rate of sale continues. This program is absorbing a considerable volume of funds which would otherwise have been spent, and is helping to achieve a broader distribution of the public debt. I urge your continued support of the savings bond program - especially of the payroll savings plan and other efforts of the savings bond sales group to absorb spendable money through the sale of Series E bonds.

Let us turn now for a moment to the subject of interest rates. It is sometimes urged that higher interest rates would aid in the control of inflationary forces.

It is my view that, for the present, no anti-inflationary purpose would be served by increasing interest rates. This is because it would interfere with the stability of the Government bond market and would introduce uncertainties, which themselves might contribute to inflation. The immediate effect of higher interest rates might very well be to increase, rather than to decrease, the volume of currency and deposits. This is because the typical investor's reaction to the higher rates might be "wait and see", rather than "run and invest".

The stability of the bond market since the end of the war has eased the financial problems of reconversion, both for the Government and for business firms. The stability of the Government bond market results in a degree of business confidence which is of tremendous value in achieving and maintaining full production. It contributes to the confidence of the public in the credit of the United States and in the enduring stability of the currency. We must not impair this confidence.

In closing, there is one thought I would leave with you - so general in its nature as to be applicable, not only to the problems discussed with you today, but also to any problem important in the formulation of a sound public policy. It

is - that all our major problems can best be met if we Americans, all of us, remembering our heritage of accomplishment, of achievement over adversity, approach the future with confidence.

Not because the path is easy, but because we as Americans have thrived and will thrive under conditions that call for extra effort and united effort on the part of all of us.

I appreciate the opportunity to speak to you today. Again, I extend the sincere thanks of the Treasury Department for the cooperation which the banks of the country, as a vital and integrated element in the nation's economic structure, have given to the conquest of our common economic problems.

Other Speeches by Treasury Officials

On September 23, 1946 Secretary Snyder addressed the Executives' Club of Milwaukee, Wisconsin. He spoke about inflation and the Federal Government's fiscal program.

On September 27, 1946 Secretary Snyder addressed the meeting of the Boards of Governors of the International Bank for Reconstruction and Development and the International Monetary Fund at Washington, D. C. The Secretary spoke in his capacity as Chairman of the two Boards of Governors.

Mr. Joseph J. O'Connell, Jr., General Counsel of the Treasury Department, spoke before a panel discussion on "Current Trends in Taxation," at the convention of the California State Bar at Coronado on September 26, 1946. Mr. O'Connell reviewed the transition toward a peacetime tax structure, and discussed long-run tax problems with particular emphasis on corporation taxes.

Copies of these speeches are available from the Office of the Director of Public Relations, Treasury Department, Washington 25, D. C.

Treasury Market Financing in September

Historical details of Treasury market financing operations involving bonds, notes, and certificates of indebtedness, beginning with the Fifth War Loan, are published in the tables on pages 29 and 30. Details of weekly Treasury bill offerings are shown on pages 31 and 32.

Cash Pay-Off and Refunding

On September 18, 1946 Secretary of the Treasury Snyder announced that payment would be made in cash for about \$2,000 million of the \$3,440 million of 7/8% certificates of indebtedness maturing on October 1, 1946. At the same time he announced that an offering of a new, one-year 7/8% certificate was being made, par for par, in exchange for the remainder. Exchange subscriptions were received subject to allotment to all holders on an equal percentage basis, except that subscriptions in amounts of \$25,000 and less were allotted in full. Cash subscriptions were not received.

The new certificates were dated October 1, 1946 and will mature October 1, 1947. They bear interest at 7/8% per annum, which will be subject to all Federal income taxes. Following the procedure instituted last month Secretary Snyder announced that interest on the new certificates will be paid with the principal at maturity.

The certificates were issued in bearer form only in denominations of \$1,000, \$5,000, \$10,000, \$100,000 and \$1,000,000. Subscription books were opened on September 18 and closed at the end of business on September 20, except for the receipt of subscriptions from holders of \$25,000 or less of the maturing certificates, for which the books remained open through September 23.

On September 30, the Secretary of the Treasury announced that exchange subscriptions for the new issue aggregated \$3,203 million. Subscriptions in amounts of \$25,000 or less were allotted in full in the amount of \$38 million. Subscriptions in amounts over \$25,000 were allotted 44% on a straight percentage basis, but not less than \$25,000 to any one subscriber, and with adjustments to the next highest thousand where necessary. Total allotments amounted to \$1,440 million with \$2,000 million paid off in cash.

Reports to the Treasury on the ownership of Government securities indicate that on August 31, 1946 about 78% of the \$3.4 billion of maturing certificates was owned by reporting commercial banks and Federal Reserve Banks. With such a

large part of the maturing certificates owned by banks, the \$2.0 billion pay-off had the direct effect of substantially reducing bank holdings of Government securities. The ownership figures for August 31, are the latest available.

Total Cash Pay-Offs to Date

On February 28, 1946 the public debt reached a new peak of \$279.8 billion reflecting the wind-up of deferred purchases of securities during the Victory Loan. On the same date the cash balance of the Treasury stood at \$26.0 billion. Subscriptions to the Victory Loan had exceeded the goal by a wide margin. Meanwhile, the budgetary outlook of the Government had improved considerably as compared with the expectations at the time of V-J day. Expenditures of the Government were running a little lower than expected while receipts ran well ahead, primarily because income payments to individuals continued at close to wartime peaks.

Starting in March, the Treasury Department instituted a debt reduction program by paying in cash each month some part of the securities which matured or were called for payment. With the payment in cash of \$2.0 billion on the October 1, 1946 maturing certificate, the total of cash pay-offs since February 28, 1946 has amounted to \$17.5 billion, or about 50% of the \$34.1 billion of securities maturing or called for payment since that date. The following table shows the details for each month:

Cash Pay-Offs on Maturing or Called Securities
March-October 1946

1946	Amount maturing or called	Cash pay-off	
		Amount	Percent of amount maturing or called

Total.....	<u><u>34.1</u></u>	<u><u>17.5</u></u>	51

Net Decline in the Public Debt

By October 1, 1946 there had been a net reduction in the public debt of \$16.0 billion from its peak of \$279.8 billion on February 28, 1946. Thus on October 1, 1946 the debt had been reduced to \$263.8 billion. The net decline in the debt was about \$1.5 billion less than the total cash pay-offs of \$17.5 billion. The difference was accounted for by other public debt transactions such as the continued sale of savings bonds and the sale of special issues to United States Government trust funds. The following table presents a reconciliation of cash pay-offs and the net decline in the debt from February 28, 1946 through October 1, 1946. Figures for August 31, 1946 are also shown since this is the latest date for which the ownership data presented in the next section are available.

Composition of Gross Public Debt and Guaranteed Obligations 1/

	Feb. 28, 1946	Aug. 31, 1946	Oct. 1, 1946
(In billions of dollars)

	<u>-11.8</u>	<u>-16.0</u>	
Cash balance.....	<u>26.0</u>	<u>11.0</u>	<u>8.1</u>

1/ Excludes guaranteed securities held by the Treasury.

2/ Bank-restricted issues may not be acquired by commercial banks (with minor exceptions) prior to specified dates. See footnote 2 on page 22 of this issue.

3/ On September 15, 1946, a bank-restricted Treasury bond issue, in the amount of \$3.8 billion, became eligible for bank ownership, since the specified period of restriction had lapsed.

4/ Includes matured debt, excess profits tax refund bonds, depositary bonds, and guaranteed obligations.

As the table shows, the cash balance of the Treasury declined from \$26.0 billion on February 28, 1946 to \$8.1 billion on October 1, 1946, a decrease of \$17.9 billion. The reduction in the debt during the period accounted for \$16.0 billion of the decline, while other net outlays of the Federal Government made up the remainder.

Ownership of the Debt

The debt reduction program has effectively furthered the Treasury policy of reducing bank ownership of the debt as a part of the fight against inflationary pressures. Thus from February 28, 1946 to August 31, 1946, the latest date for which complete ownership data are available, the interest-bearing debt declined \$11.7 billion. Of this decline, 95% occurred in the holdings of banks, and 5% in the holdings of nonbank investors.

The following table presents the estimated distribution of the ownership of the interest-bearing debt as of February 28, 1946 and August 31, 1946, and the change over the period. The figures for August 1946 are the latest complete ownership data available. Further historical data are available on page 47 of the statistical section of this issue.

Estimated Ownership of the Interest-Bearing Public Debt and Guaranteed Obligations 1/

	Feb. 28, 1946	Aug. 31, 1946	Change
		Amount	Percent of total
(In billions of dollars)			
Banks:			
Commercial banks	92.5	80.4	-12.1

Mutual savings banks.....	11.1	11.7	.6
Other corporations and associations..	29.0	26.1	-3.0
State and local governments...	6.4	6.0	-.4
Federal agencies and trust funds.....	28.0	30.0	+2.1
Total nonbank investors.....	<u>163.0</u>	<u>162.4</u>	<u>-.6</u>
			5
Total interest-bearing debt....	<u>278.5</u>	<u>266.7</u>	<u>-11.7</u>
			100

1/ Excludes guaranteed securities held by the Treasury.

As the table shows, there were substantial differences in the changes that occurred in the holdings of the various nonbank investors during the period of cash pay-offs. "Other corporations and associations" showed a decline of \$3.0 billion. This decrease reflects primarily payments on heavy 1945 tax liabilities and the need for funds for reconversion and expansion.

The largest increase, on the other hand, occurred in the securities held by "Federal agencies and trust funds." The \$2.1 billion increase in their holdings is a result for the most part

of sales of special issues to (1) the Federal old-age and survivors insurance trust fund, and (2) military insurance funds. Insurance companies and mutual savings banks also increased their holdings of Federal securities during the period primarily as the result of purchases in the market.

Individuals continue to be the largest non-bank holders of the Federal debt, accounting for more than \$63 billion, or about one-fourth of the total.

Source: Daily Treasury Statement, except as noted.

1/ Based upon the 1947 Budget document as revised August 3, 1946.

2/ Includes chiefly alcoholic beverage taxes, tobacco taxes, manufacturers' and retailers' excise taxes, and estate taxes.

3/ Includes deposits resulting from the renegotiation of war contracts. Information on the amount of such deposits is not available on the basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1945, \$2,041 million and fiscal year 1946, \$1,063 million. These figures include so-called voluntary returns.

4/ Administrative expenses in carrying out provisions of Act are included in miscellaneous war and defense activities except for the estimated fiscal year 1947, amounts for which are included in the figure \$2,418 million.

5/ Classification changed to reflect expenditures of surplus property disposal agencies for the fiscal years 1946 and 1947. Prior year expenditures are included under "Other."

6/ Includes transfers to trust accounts, etc. Expenditures for "Aid to agriculture" in fiscal year 1947 include \$921 million for restoration of capital impairment effected by the cancellation of notes pursuant to the Act of July 20, 1946.

7/ Includes expenditures for public works undertaken by Veterans' Administration, except for the estimated fiscal year 1947, figures for which are not yet available.

8/ Includes amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and excludes refunds of taxes under the social security program. For discussion of excess profits tax refund bonds, see following chapter, Table 3.

9/ Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Department of Labor, U. S. Employment Service (formerly Office for Emergency Management, War Manpower Commission, U. S. Employment Service), under authority of the Social Security Act, which are included in "Miscellaneous war and defense activities."

Sources: Daily Treasury Statement.

Note: Beginning with fiscal year 1945 certain revisions have been made in this table. See "Treasury Bulletin," September 1946, page 5.

1/ Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc. under special provisions of law.

2/ For further details, see Table 2.

3/ For explanation see tables which follow entitled "Social Security Program".

4/ For further details, see Table 3.

5/ For further details, see Table 4.

6/ For further details, see Table 5.

7/ For further details, see Table 6.

8/ Total expenditures less net receipts.

9/ For expenditures of Government corporations, etc. (net) see table on "Trust Accounts, Etc. Receipts and Expenditures" showing transactions in checking accounts of Government agencies, etc. (net).

10/ Includes recoveries of U. S. investments in capital funds. Such recoveries totaled \$54 million in the fiscal year 1940; \$319 million in the fiscal year 1941; \$18 million in the fiscal year 1942; and \$10 million in the fiscal year 1943.

11/ Receipts from reductions in capital stock and paid-in surplus available to be reissued under existing law are included as negative items under expenditures. Such reductions totaled \$315 million.

12/ Includes deposits resulting from the renegotiation of war contracts. Information on the amount of such deposits is not available on the basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1943, \$558 million; fiscal year 1944, \$2,235 million; fiscal year 1945, \$2,041 million, and fiscal year 1946, \$1,063 million. These figures include so-called voluntary returns.

Source: Daily Treasury Statement.

* Less than \$500 thousand.

1/ General expenditures now include expenditures for revolving funds; back figures have been revised accordingly.

2/ Includes public works undertaken by the Veteran's Administration.

3/ Does not include transfers to trust accounts, etc. These are shown in Table 5.

4/ "Refunds of taxes" include amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and exclude refunds of taxes under the Social security program. Excess profits tax refund bonds were formerly issued to corporations entitling them to a post-war credit equal to 10% of the excess profits tax paid. The Tax Adjustment Act of 1945 reduced by 10% the amount of excess profits tax to be paid and abolished the post-war credit. For amounts of excess profits tax refund bonds issued, see the first table in chapter entitled "Public Debt and Guaranteed Obligations of the United States Government". Outstanding excess profits tax refund bonds may be redeemed at the option of the holder commencing January 1, 1946; when such redemptions occur, they will appear as retirements of public debt.

5/ Consists of Department of Agriculture expenditures, except forest roads and trails which are included in Public works.

6/ Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Department of Labor, U. S. Employment Service (formerly Office for Emergency Management, War Manpower Commission, U. S. Employment Service), under authority of Social Security Act. For further details, see tables which follow on the Social security program.

7/ Includes public buildings, public highways (including forest roads and trails), river and harbor work and flood control, Tennessee Valley Authority, Federal Public Housing Authority (formerly U. S. Housing Authority), reclamation projects and the Public Works Administration. Excludes certain expenditures for public works in connection with war activities by the Federal Works Agency, beginning

July 1941.

8/ Excludes expenditures for the U. S. Maritime Commission, departmental expenditures under the Social security program and the Department of Agriculture departmental expenditures. Beginning July, 1946, includes expenditures formerly classified as departmental.

9/ For additional information, see "Treasury Bulletin" for August 1945, page 6.

10/ Includes expenditures for the following: Office of Education, and Public Health Service of the Federal Security Agency; Post Office Department postal deficiencies; Federal Housing Administration; Treasury Department investments in Federal savings and loan associations; certain expenditures of the Panama Canal; and capital stock of the Federal Deposit Insurance Corporation, Home Owners' Loan Corporation, Federal home loan banks, and Disaster Loan Corporation.

11/ Gross expenditures have been reduced \$315 million representing the repayment of capital funds by certain United States Government agencies. For further details see "Treasury Bulletin" for June 1946, page 9, footnote 12.

12/ Includes \$257 million for restoration of capital impairment of Commodity Credit Corporation applicable to fiscal years 1943 and 1944.

13/ Includes \$500 million for Commodity Credit Corporation - postwar price support of agriculture.

14/ Classified as miscellaneous expenditures commencing July 1, 1945.

15/ Expenditures during October 1945 include \$174 million and during March and April, 1946, \$100 million each for Export-Import Bank of Washington - capital stock. Expenditures for June 1946 also include \$158 million for International Bank under Bretton Woods Agreements Act.

16/ Includes \$921 million for restoration of capital impairment of Commodity Credit Corporation effected by cancellation of notes pursuant to the act of July 20, 1946.

17/ Includes expenditures of \$300 million for credit to United Kingdom.

* Less than \$500 thousand.

1/ Represents cash payments only, no bonds having been issued as of September 30, 1946. Administrative expenses in carrying out provisions of Act are included under War, Navy, and Treasury (Coast Guard) Departments.

2/ Includes war public housing functions.

3/ Includes war expenditures of Commerce, Justice, Interior, Labor, and State Departments; Civil Service Commission; Executive Office of the President (including Office for Emergency Management); Panama Canal; and capital stock of Smaller War Plants Corporation. Includes Defense Aid Special Fund through the fiscal year 1943; thereafter such expenditures are reflected within the respective departments.

4/ Classification changed to reflect expenditures for the fiscal year

1946 under "War activities". Prior year expenditures are included under "General".

5/ Payment of \$370 million was made on Dec. 29, 1945, by the Federal Surplus Commodities Corporation of the Department of Agriculture to the Commodity Credit Corporation in reimbursement for agricultural commodities procured in connection with the lend-lease program and reflected in previous expenditures by the Commodity Credit Corporation. Total payments for the fiscal year 1946 amounted to \$957 million.

6/ Effective September 1, 1946, expenditures of the War Shipping Administration are included with the expenditures of the U. S. Maritime Commission to which all functions were transferred for the purpose of liquidation by December 31, 1946, pursuant to Sec. 202, public law 492, approved July 5, 1946.

* Less than \$500 thousand.

1/ Includes transactions on account of RFC Mortgage Company, Federal National Mortgage Association, Office of Metals Reserve, Office of Rubber Reserve, Office of Defense Plants, Office of Defense Supplies, U. S. Commercial Company, War Damage Corporation, and Rubber Development Corporation.

2/ Payments of \$957 million have been made during the fiscal year 1946 by the Agriculture Department (charged as war and defense activities) to the Commodity Credit Corporation in reimbursement for agricultural commodities procured in connection with the lend-lease program and

reflected in previous expenditures of the Commodity Credit Corporation. Similar payments during the fiscal year 1945 amounted to \$1,182 million.

3/ Represents payment to Commodity Credit Corporation under act of February 18, 1946.

4/ The act of July 20, 1946, authorized the Secretary of the Treasury to cancel notes of the Commodity Credit Corporation in the amount of \$921 million for the restoration of its capital impairment. This amount is treated as a general expenditure with a corresponding credit under Government corporations (wholly-owned), etc. (net).

Source: Daily Treasury Statement.

Note: Beginning with fiscal year 1945 certain revisions have been made in this table. See "Treasury Bulletin," September 1946, page 5.

1/ Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law, and beginning with fiscal year 1945, includes Government corporations

(wholly owned), etc. (net).

2/ Comprises trust accounts, checking accounts of Government agencies, etc., increment on gold, seigniorage on silver, miscellaneous funds and accounts, and beginning with July, 1946, a clearing account for outstanding checks. Increment on gold excludes expenditures for national bank note retirements.

* Less than \$50 thousand.

1/ Formerly Title VIII of the Social Security Act.

2/ Formerly Title IX of the Social Security Act. Includes amounts equal to appropriations to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected with respect to the period from January 1936 to June 1939, inclusive, from employers subject to the Railroad Unemployment Insurance Act (See Table 3 of Section I).

3/ Prior to January 1, 1940, figures represent amounts transferred to the Old-Age Reserve Account. From January 1 to July 1, 1940 "Transfers" were made to the Federal Old-Age and Survivors Insurance Trust Fund. Subsequently receipts have been deposited in the General Fund of the Treasury and "appropriated" directly to the Federal Old-Age and Survivors Insurance Trust Fund. Amounts shown as transfers reflect deductions made for reimbursement to the General Fund account to cover administrative expenses, which are shown as expenditures in Section II, Table I.

4/ Includes only expenditures from appropriations made specifically for

administrative expenses relating to the Social Security Act; namely, Social Security Administration, Department of Commerce, and Department of Labor; and administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended. Beginning July 1, 1940, includes also administrative expenses under the Wagner-Peyser Act. Excludes administrative expenses payable from other appropriations, principally for the following agencies: Bureau of Internal Revenue of the Treasury Department, and Public Health Service and Office of Education of the Federal Security Agency.

Beginning July 1, 1945, payments previously made under the Social Security Act were discontinued, and thereafter made under provisions of the Public Health Service Act of 1944.

5/ Classified as "Executive Office, Office for Emergency Management, War Manpower Commission" through July 31, 1946.

6/ Covered by appropriations by Congress.

7/ Second Deficiency Appropriation Act, fiscal year 1938, appropriated \$41 million for refunding to certain States portions of Federal employers' tax for 1936 collected under the Social Security Act.

* Less than \$50 thousand.

1/ Operated as Railroad Unemployment Insurance Administration Fund.

2/ Represents 10% of contributions under the Railroad Unemployment Insurance Act; the remaining 90% is deposited in the Railroad Unemployment Insurance Account, Unemployment Trust Fund (See Section II, Table 3). Excludes amounts appropriated to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected for the period January 1936 through June 1939 from employers subject to the Railroad Unemployment Insurance Act. These amounts aggregated \$17.7 million and were distributed by calendar

years, as follows: 1936, \$2.7 million; 1937, \$5.3 million; 1938, \$6.8 million; and for the first six months of the calendar year 1939, \$2.9 million. These amounts are included in Table 1 under Federal Unemployment Tax Act (unemployment insurance).

3/ Includes only expenditures from appropriations made specifically for administrative expenses relating to the Railroad Unemployment Insurance Act.

4/ Represents excess funds of the Railroad Unemployment Insurance Administration Fund (under Act of Oct. 10, 1940).

5/ Covered by appropriations by Congress.

Source: Daily Treasury Statement.

1/ Excludes advance of \$15 million from the Treasury and subsequent repayment, both taking place in the fiscal year 1940.

2/ Represents 90% of contributions under the Railroad Unemployment Insurance Act; the remaining 10% is used for administrative expenses. (See Section I, Table 3.)

3/ Represents amounts transferred from States to Railroad Unemployment

Insurance Account equivalent to amounts of taxes collected, with respect to period from January 1936 to June 1939, inclusive, from employees and employers who come within the purview of the Railroad Unemployment Insurance Act.

4/ Represents excess funds of the Railroad Unemployment Insurance Administration Fund (under Act of Oct. 10, 1940).

5/ For railroad unemployment benefits and refunds.

Source: Daily Treasury Statement.

Note: Beginning with fiscal year 1945 certain revisions have been made in this table. See "Treasury Bulletin," September 1946, page 5.

* Less than \$500 thousand.

1/ This is the net budgetary deficit (-) or surplus. Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law and beginning with fiscal year 1945 includes Government corporations (wholly owned) etc. (net).

2/ Comprises Federal Old-Age and Survivors Insurance Trust Fund, National Service Life Insurance Fund, Unemployment Trust Fund, Railroad Retirement Account, Government insurance and retirement funds and other trust accounts. (See footnote 4.)

3/ Charges for retirement of national bank notes are reflected in this statement directly against increment on gold, in the years during which the retirements were actually made. (See footnote 8.)

4/ Comprises Public Works Administration revolving fund, special de-

posits (net), and, during the fiscal years 1940 through 1945, transactions in commodity food stamps by the Department of Agriculture. Commencing July 1, 1945, such transactions are classified in the column "Trust accounts".

5/ Beginning with fiscal year 1945 represents sales and redemptions of obligations of Government corporations, etc., in the market (net).

6/ Represents outstanding checks, see Note.

1/ Includes inactive gold in the amount of \$1,087 million.

8/ Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1937 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1937, \$99 million; 1938, \$51 million; and 1939, \$5 million. The increases in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.

* Less than \$500 thousand.

1/ Guaranteed securities held by the Treasury and securities guaranteed as to interest only are not included in this table.

2/ Bank restricted issues are those which commercial banks (banks accepting demand deposits) are not permitted to acquire prior to a specified date, with three exceptions: (1) concurrently with the 4th, 5th and 6th War Loans and the Victory Loan, commercial banks were permitted to subscribe for limited investment of their savings deposits; (2) commercial banks may temporarily acquire such issues through forfeiture of collateral; (3) commercial banks may hold a limited amount of such issues for trading purposes. (See "Treasury Bulletin" July 1946, pages A-9, A-10.)

3/ The face value of any yearly series of United States savings bonds

and Treasury savings notes maturing from month to month which are not currently presented for retirement are included in the interest-bearing debt until all the bonds or notes of the series have matured.

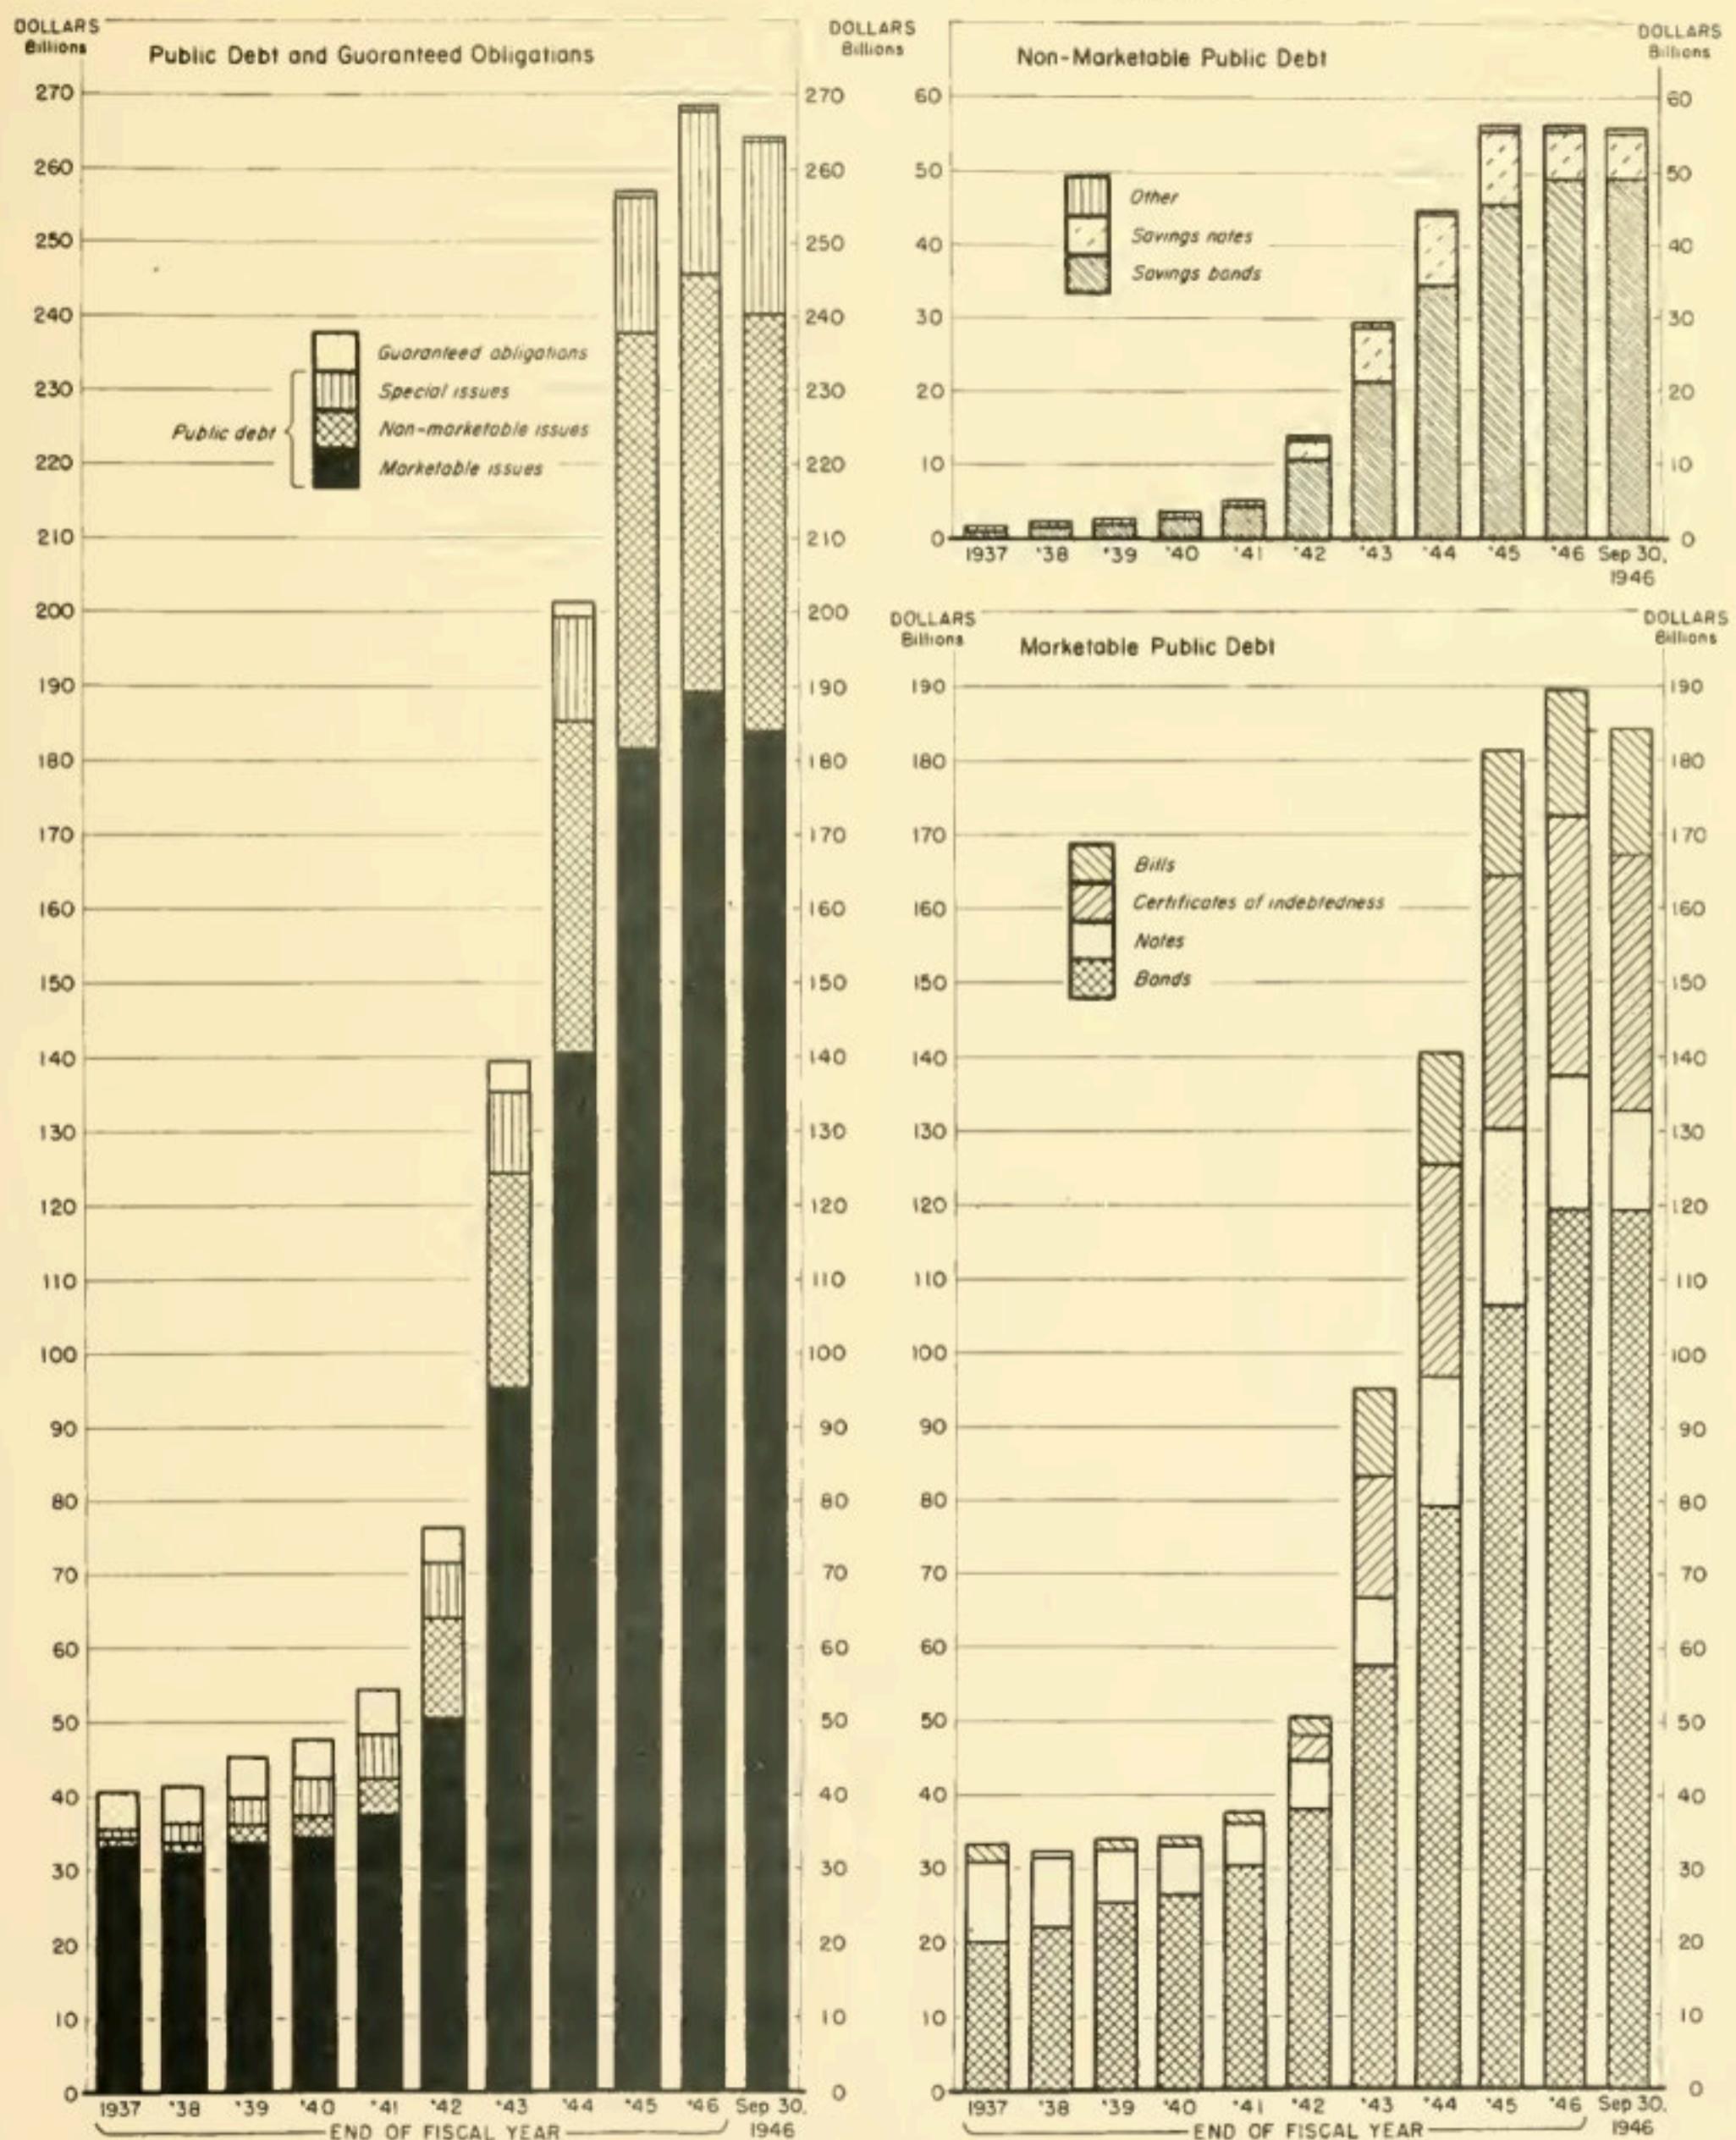

4/ Demand obligations stated as of the previous month to agree with the Statement of Guaranteed Obligations in the Daily Treasury Statement.

5/ Consists of Reconstruction Finance Corporation notes, Series I-A, I-B, and I-C, which were held by United States Government corporations and credit agencies.

6/ Includes prepayments on securities.

7/ On September 15, 1946, the 2-1/4% bank restricted Treasury bond 1956-59, in the amount of \$3.8 billion, became eligible for bank ownership, since the specified period of restriction had lapsed.

Source: Daily Treasury Statement.

1/ Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rate of

interest on United States savings bonds, Series A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.53%.

2/ Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

* Less than \$500 thousand.

1/ These securities are not included in preceding statements of guaranteed obligations outstanding.

Statutory Limitation on the Public Debt

Section 21 of the Second Liberty Bond Act, as amended, provides that the face amount of obligations issued under authority of that Act, and the face amount of obligations guaranteed as to principal and interest by the United States (except such guaranteed obligations as may be held by the Secretary of the Treasury),

shall not exceed in the aggregate \$275 billion outstanding at any one time. The current redemption value of any obligation issued on a discount basis which is redeemable prior to maturity at the option of the holder thereof shall be considered, for the purposes of this section, to be the face amount of such obligation.

Source: Daily Treasury Statement, and reports to the Treasury.

1/ Excludes (1) postal savings bonds and (2) Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).

2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities.

3/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and

surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates.

"Taxable" securities are subject to both normal and surtax rates. Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to a specified date. See footnote 2, page 22.

4/ On September 15, 1946 this bond issue became eligible for bank ownership since the specific period of restriction had elapsed.

mant accounts.

n.a. Not available.

4/ Bank restricted issue. See preceding table (maturity schedule of interest-bearing public marketable securities) for earliest date on which commercial banks may acquire this issue.

1/ In the case of the reopening of a previously offered security, the period to first call and to maturity are calculated from the date interest commences on the reopening.

5/ Reopening of previously offered security.

2/ Consists of all public cash subscriptions and of subscriptions by U. S. Government agencies and trust funds.

6/ Interest commenced on June 26, 1944.

3/ Figures on amount of War Loan securities issued consist both of amounts issued in connection with the Drive, and of amounts issued concurrently with Drive to commercial banks and Treasury invest-

7/ Interest commenced on September 15, 1944.

8/ This is the same security that was offered in the Sixth War Loan.

9/ Exchanged as of December 15, 1944 and accrued interest charged from December 1 to December 15.

p Preliminary.

n.s. Not available.

1/ Original call and maturity dates are used.

2/ Bank restricted issue.

3/ Prior to the refunding operation of March 1, 1946, maturing

issues were either paid off in full or the holders were given the privilege to exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

Offerings and Maturities of Treasury Bills

Sales and Redemptions of United States Savings Bonds

United States savings bonds were first offered for sale in March 1935. Bonds of series A-D were sold between March 1935 and April 1941. Series E, F, and G bonds have been on sale since May 1, 1941.

Series A-E bonds are 10-year discount bonds sold at 75% of maturity value, and yield 2.90% per annum if held to maturity. Series F bonds are 12-year discount bonds sold at 74% of maturity value, and yield 2.53% per annum if held to maturity. Series G bonds are 12-year current income bonds, sold at par, bearing interest at 2-1/2% per annum, and redeemable at par at maturity or at stated prices less than par before maturity.

Purchases of series A-D bonds were limited to \$7,500 issue price in any one calendar year. These bonds were available to all subscribers prior to April 1, 1940, and to individuals only after that date. Purchases of series E bonds are limited to \$3,750 issue price in any one calendar year, and may be made only by individuals (defined as natural persons only). The limit for series F and G combined is \$100,000 issue price in any one calendar year (\$50,000 in calendar year 1941). Series F and G bonds are available to all

subscribers except commercial banks. Commercial banks, however, were permitted to purchase these bonds during certain periods and with certain restrictions. For details concerning these periods and restrictions see "Treasury Bulletin" for December 1944, page 36, footnote 9, and "Treasury Bulletin" for February 1946, page 37, footnote 9, and page A-22. For details concerning features, investment yields, and redemption values see "Treasury Bulletin" for October 1945, pages A-4 and A-5.

Series A bonds matured in 1945, and bonds of series B began to mature in January 1946. Matured bonds turned in for redemption are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of series G outstanding are quoted at par.

Table 1.- Summary of Sales and Redemptions, by Series, as of September 30, 1946

United States savings bonds	Sales	Accrued discount	Sales plus accrued discount	Redemptions	Amounts outstanding		Percent of redemptions to sales plus accrued discount

Sales and Redemptions of Treasury Savings Notes

Treasury savings notes were issued in three series, series A from August 1, 1941 through June 22, 1943, series B from August 1, 1941 through September 12, 1942, and series C which have been on continuous sale since September 14, 1942. All of series A and B and some of series C notes have matured.

Series C notes are sold at par, and accrue in value each month, yielding 1.07% per annum if held to maturity (3 years from date of issue). These notes may be used in payment of taxes any time after 2 months after issue, or may be redeemed for cash any time after 6 months after issue. For details concerning features, investment yields, and tax payment or redemption values, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning the features of series A

and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes turned in for redemption (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement. For sales and redemptions of series A and B notes by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

Table 1.- Summary of Sales and Redemptions, by Series, as of September 30, 1946

(In millions of dollars)

Treasury savings notes	Sales	Redemptions			Amount outstanding	
		Total	For cash	For taxes	Matured debt	Interest-bearing debt
Series A.....	407	398	63 1/2	335	8	-

Source: Daily Treasury Statement.

Note: See "Treasury Bulletin", July 1946 for back figures.

^{1/} Stamps sold prior to October 1, 1942 were known as postal savings stamps and were obligations of the Postal Savings System but subsequently became public debt obligations.

^{2/} Estimated on the basis of samples made by the Post Office Department.

^{3/} Net of sales less redemptions. See footnote 1.

^{4/} Does not include amounts transferred from Postal Savings System to the Treasury to cover outstanding stamps.

^{5/} Includes minor amounts which were exchanged for postal savings certificates. These aggregated \$55 thousand for the period July 1, 1942 through October 31, 1942.

* Less than \$50 thousand.

^{1/} Consists of purchases or sales made by the Treasury. Treasury investment accounts comprise (1) trust funds which by law are under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain

U. S. Government agencies whose investments are handled through the facilities of the Treasury Department. This table also includes purchases under Section 19 of the Second Liberty Bond Act, as amended, and excludes the Exchange Stabilization Fund.

**Treasury Survey of Ownership of Securities Issued by the United States
Government and by Federal Agencies, August 31, 1946**

The tables in Section I present summary data as of August 31, 1946 from the Treasury Survey of Ownership of Securities Issued or Guaranteed by the United States. The banks and insurance companies covered in the survey account for approximately 95 percent of the

amount of such securities owned by all banks and insurance companies in the United States.

Section II presents summary data on the ownership of Federal land bank bonds, Federal intermediate credit bank debentures and Federal home loan bank debentures.

Section I - Securities Issued or Guaranteed by the United States Government

Table 1.- Summary: All Interest-Bearing Securities

(In millions of dollars)

Classification	Total amount outstanding	Held by investors covered in Treasury Survey						Held by all other investors ^{3/}	
		Banks ^{1/}			Insurance companies		All U. S. Government agencies and trust funds, and Federal Reserve Banks		
		7,356 commercial banks ^{2/}	34 stock savings banks	540 mutual savings banks	311 life insurance companies	642 fire, casualty, and marine insurance companies			
Public securities:									
Marketable securities.....	186,394	73,511	482	11,422	21,523	2,858	30,510	46,088

Notes: The Treasury Survey commenced with data for March 31, 1941 and has been published regularly in the "Treasury Bulletin" since May 1941. Revisions of data for September 30, 1944 appeared in the February 1945 issue, page 53; reclassification of data on banks for the period November 1943 through February 1944 appeared in the May 1944 issue, pages 52-57; revisions of data on insurance companies for May 31, 1943 and prior months appeared in the November 1943 issue, pages 52-63.

* Less than \$500 thousand or less than .05%.

1/ Securities held in trust departments are excluded.

2/ Includes trust companies.

3/ This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See headnote to this section.

4/ Issues which commercial banks may not acquire prior to a specified

date (with minor exceptions). See footnote 2, page 22.

5/ Guaranteed securities held by the Treasury are not included.

6/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.

"Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5 thousand of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

7/ Includes an estimated amount of Federal Housing Administration debentures.

8/ Actual figures by tax status are available only for total amount outstanding.

* Less than \$500 thousand.

1/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.

"Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5 thousand of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

2/ Securities held in trust departments are excluded.

3/ Includes trust companies.

4/ This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See headnote to this section.

5/ United States savings bonds, Series B-D, E, and F are shown at current redemption values. They were reported at maturity value by the banks and insurance companies covered in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

6/ Series B-D savings bonds sold prior to March 1, 1941 are partially tax-exempt; those sold on and after that date are taxable.

7/ Guaranteed securities held by the Treasury are not included.

8/ C.C.C. demand obligations in the amount of \$326 million held by all commercial banks are shown only in total amount outstanding.

- 1/ Excludes Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).
 2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.
 3/ Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.
 4/ Included in the Average Yield of Long-Term Taxable Treasury Bonds.

- 5/ Issues which commercial banks may not acquire prior to a specified date (with minor exceptions).
 6/ Quoted on a yield basis.
 7/ Not quoted on September 30, 1946; quoted on a price basis at par from September 20 through September 27, 1946; prior thereto quoted on a yield basis.
 8/ For amount of this security issued on September 1, 1946, see table entitled "Offerings of Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness" in the section on the "Public Debt and Guaranteed Obligations of the United States Government."
 9/ Excludes postal savings bonds.

Over-the-Counter Closing Quotations on Public Marketable Securities Issued by the
United States Government and by Federal Agencies

1/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "When issued" prices for all securities except Federal Intermediate Credit Bank debentures are included beginning November 1, 1941. Dates of highs and lows, in case of recurrence, are the latest dates.

2/ Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

3/ Quoted on a yield basis. Series D debantures were issued to refund

a like amount of series C debentures which were issued on July 1, and matured on August 15, 1946. Series C and D were inadvertently omitted from this table for July 31 and August 30, respectively.

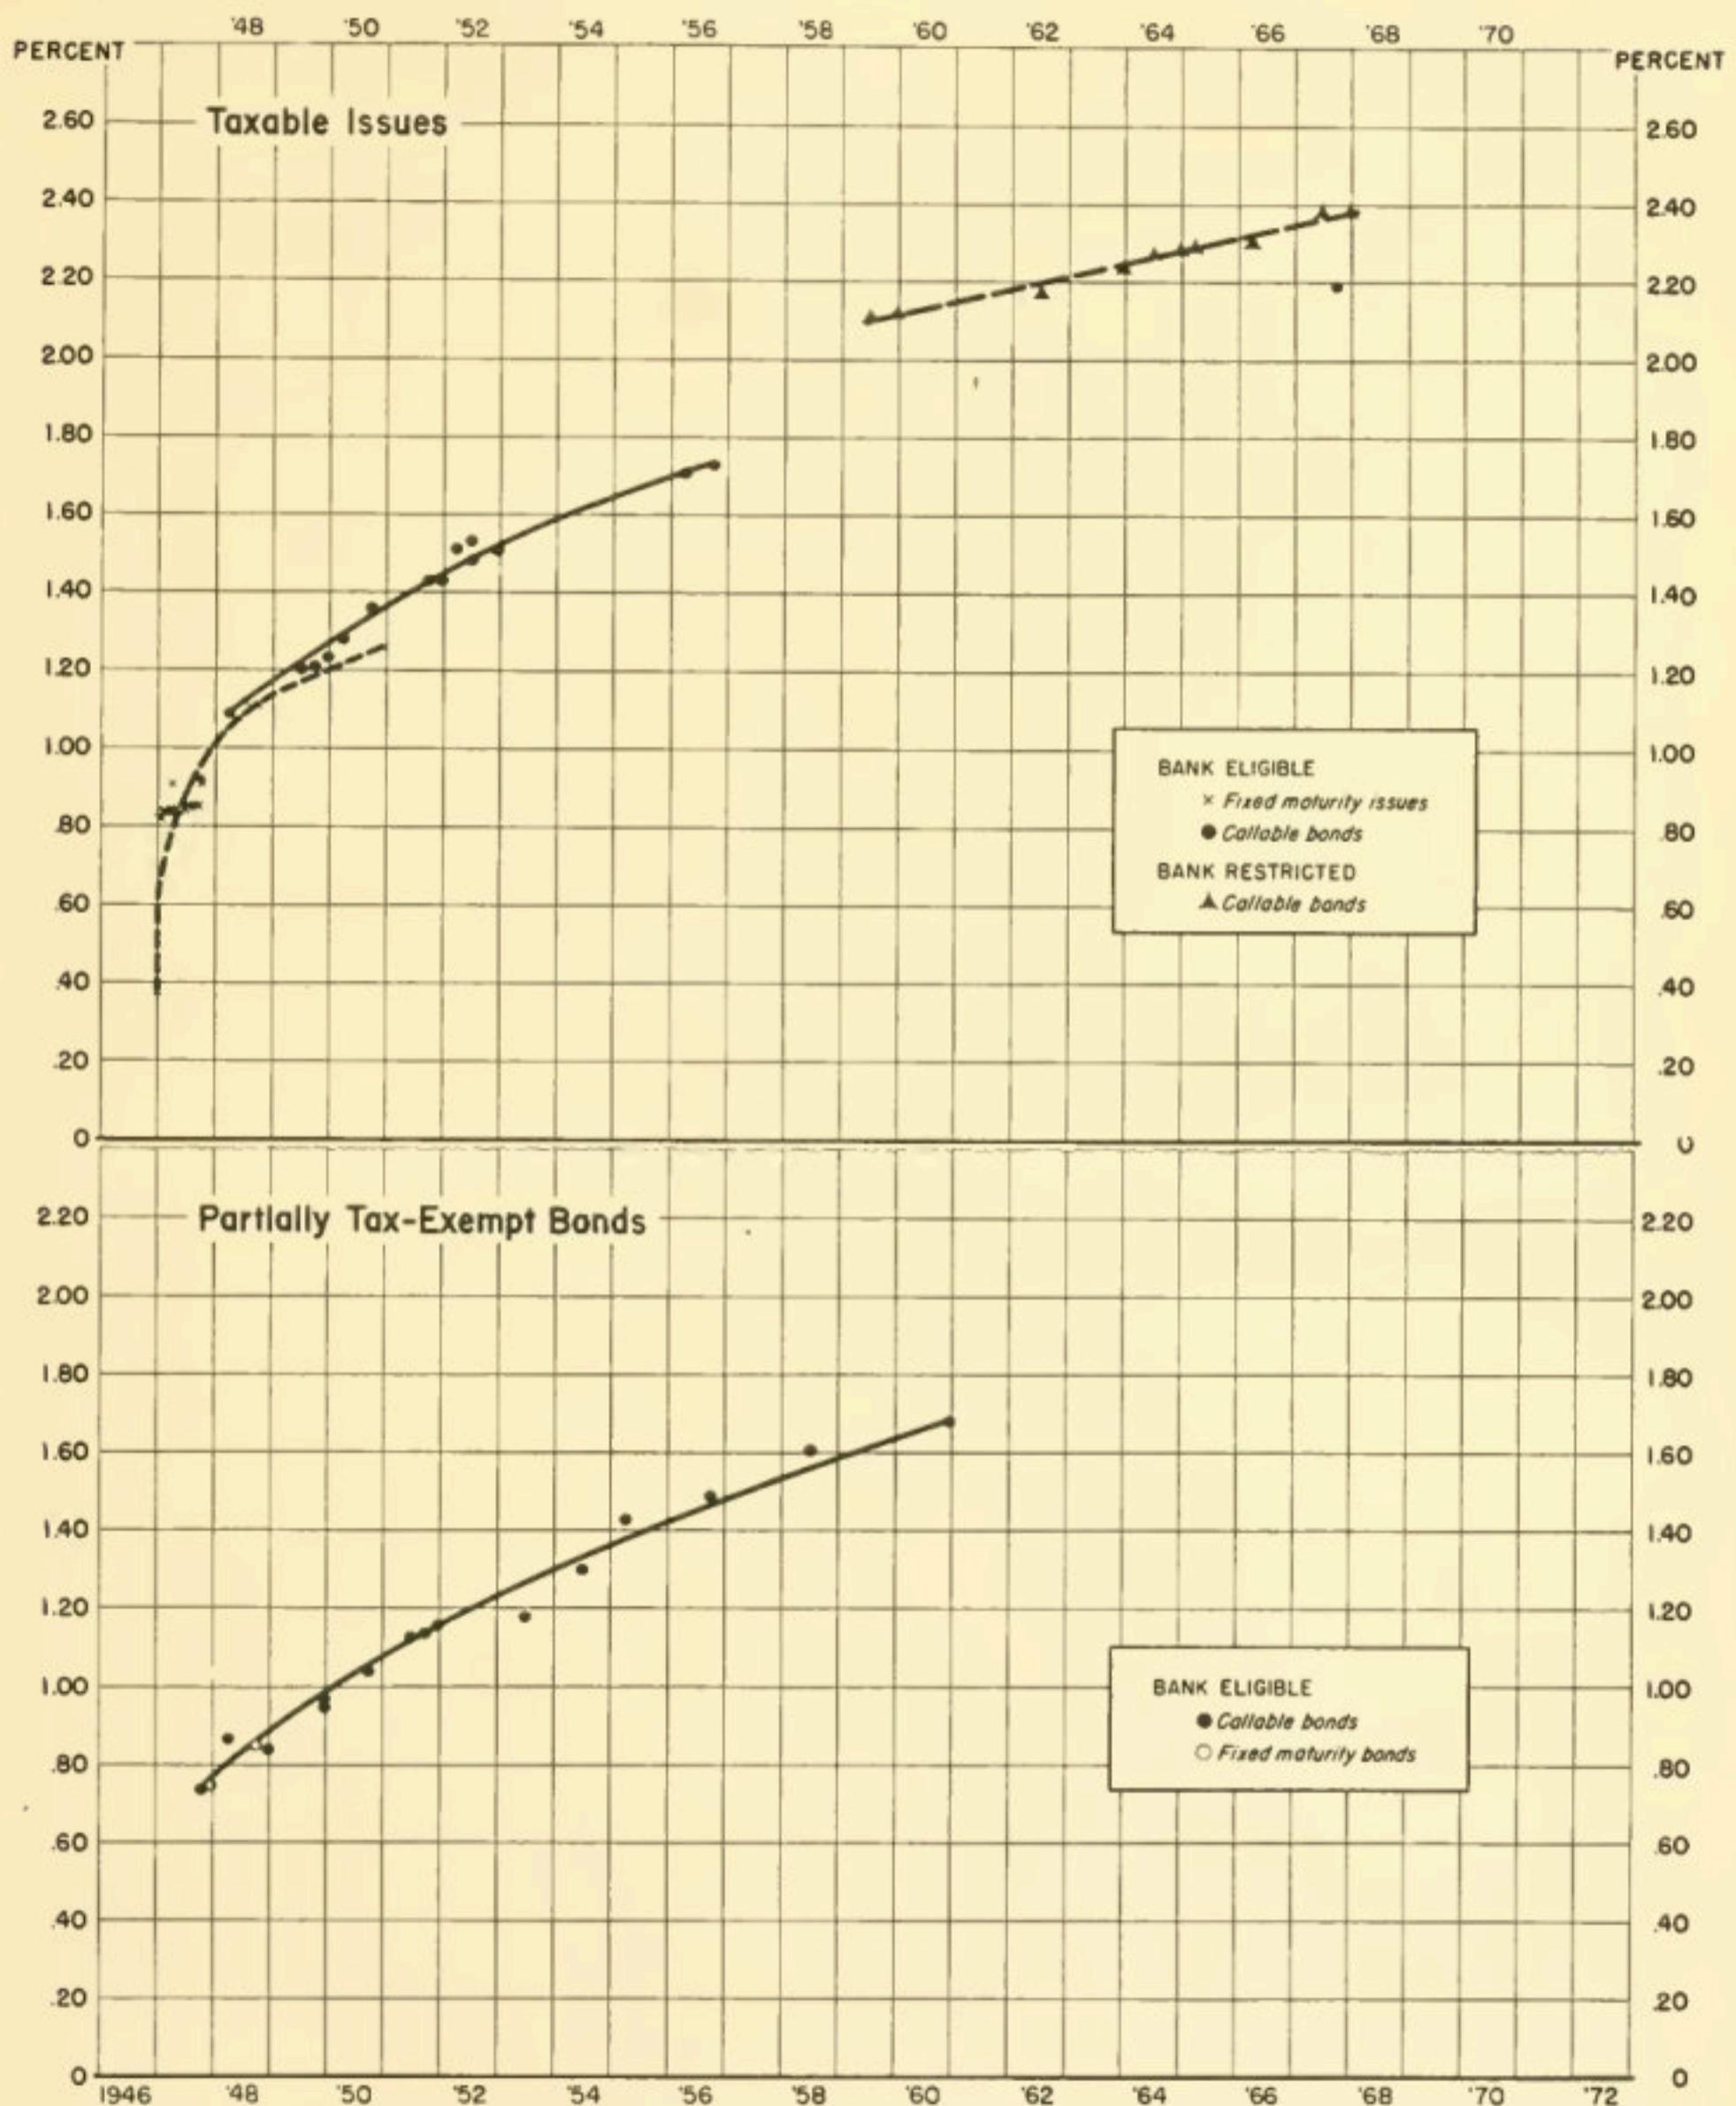

4/ Prices quoted are subject to a dealer's commission. These securities are not shown until date of issue.

5/ Not quoted on September 30, 1946.

6/ Excludes issues completely held by Farm Credit Administration agencies.

YIELDS OF TREASURY SECURITIES SEPT. 30, 1946

Based on Mean of Closing Bid and Asked Quotations

Explanation: The points represent yields to call date when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Note: Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. Monthly and weekly data for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944, pages 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of average see "Treasury Bulletin" for March 1944, page 58. The partially tax-exempt series was discontinued on December 15, 1944 because there were no longer any bonds of this classification due or callable in 15 or more years. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax, except that in the

case of partially tax-exempt Treasury and United States savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

2/ For discussion of present composition of high-grade corporate bond average, see "Treasury Bulletin" for January 1945, page 56; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treasury Bulletin" for April 1943, page 61.

3/ Monthly averages of daily figures. Prior to April 1, 1938, corporate bonds are averages of Saturday figures.

4/ The composition of the high-grade corporate bond average was revised commencing with November 1, 1944. The old average for November 1944 was 2.56%. See footnote 2.

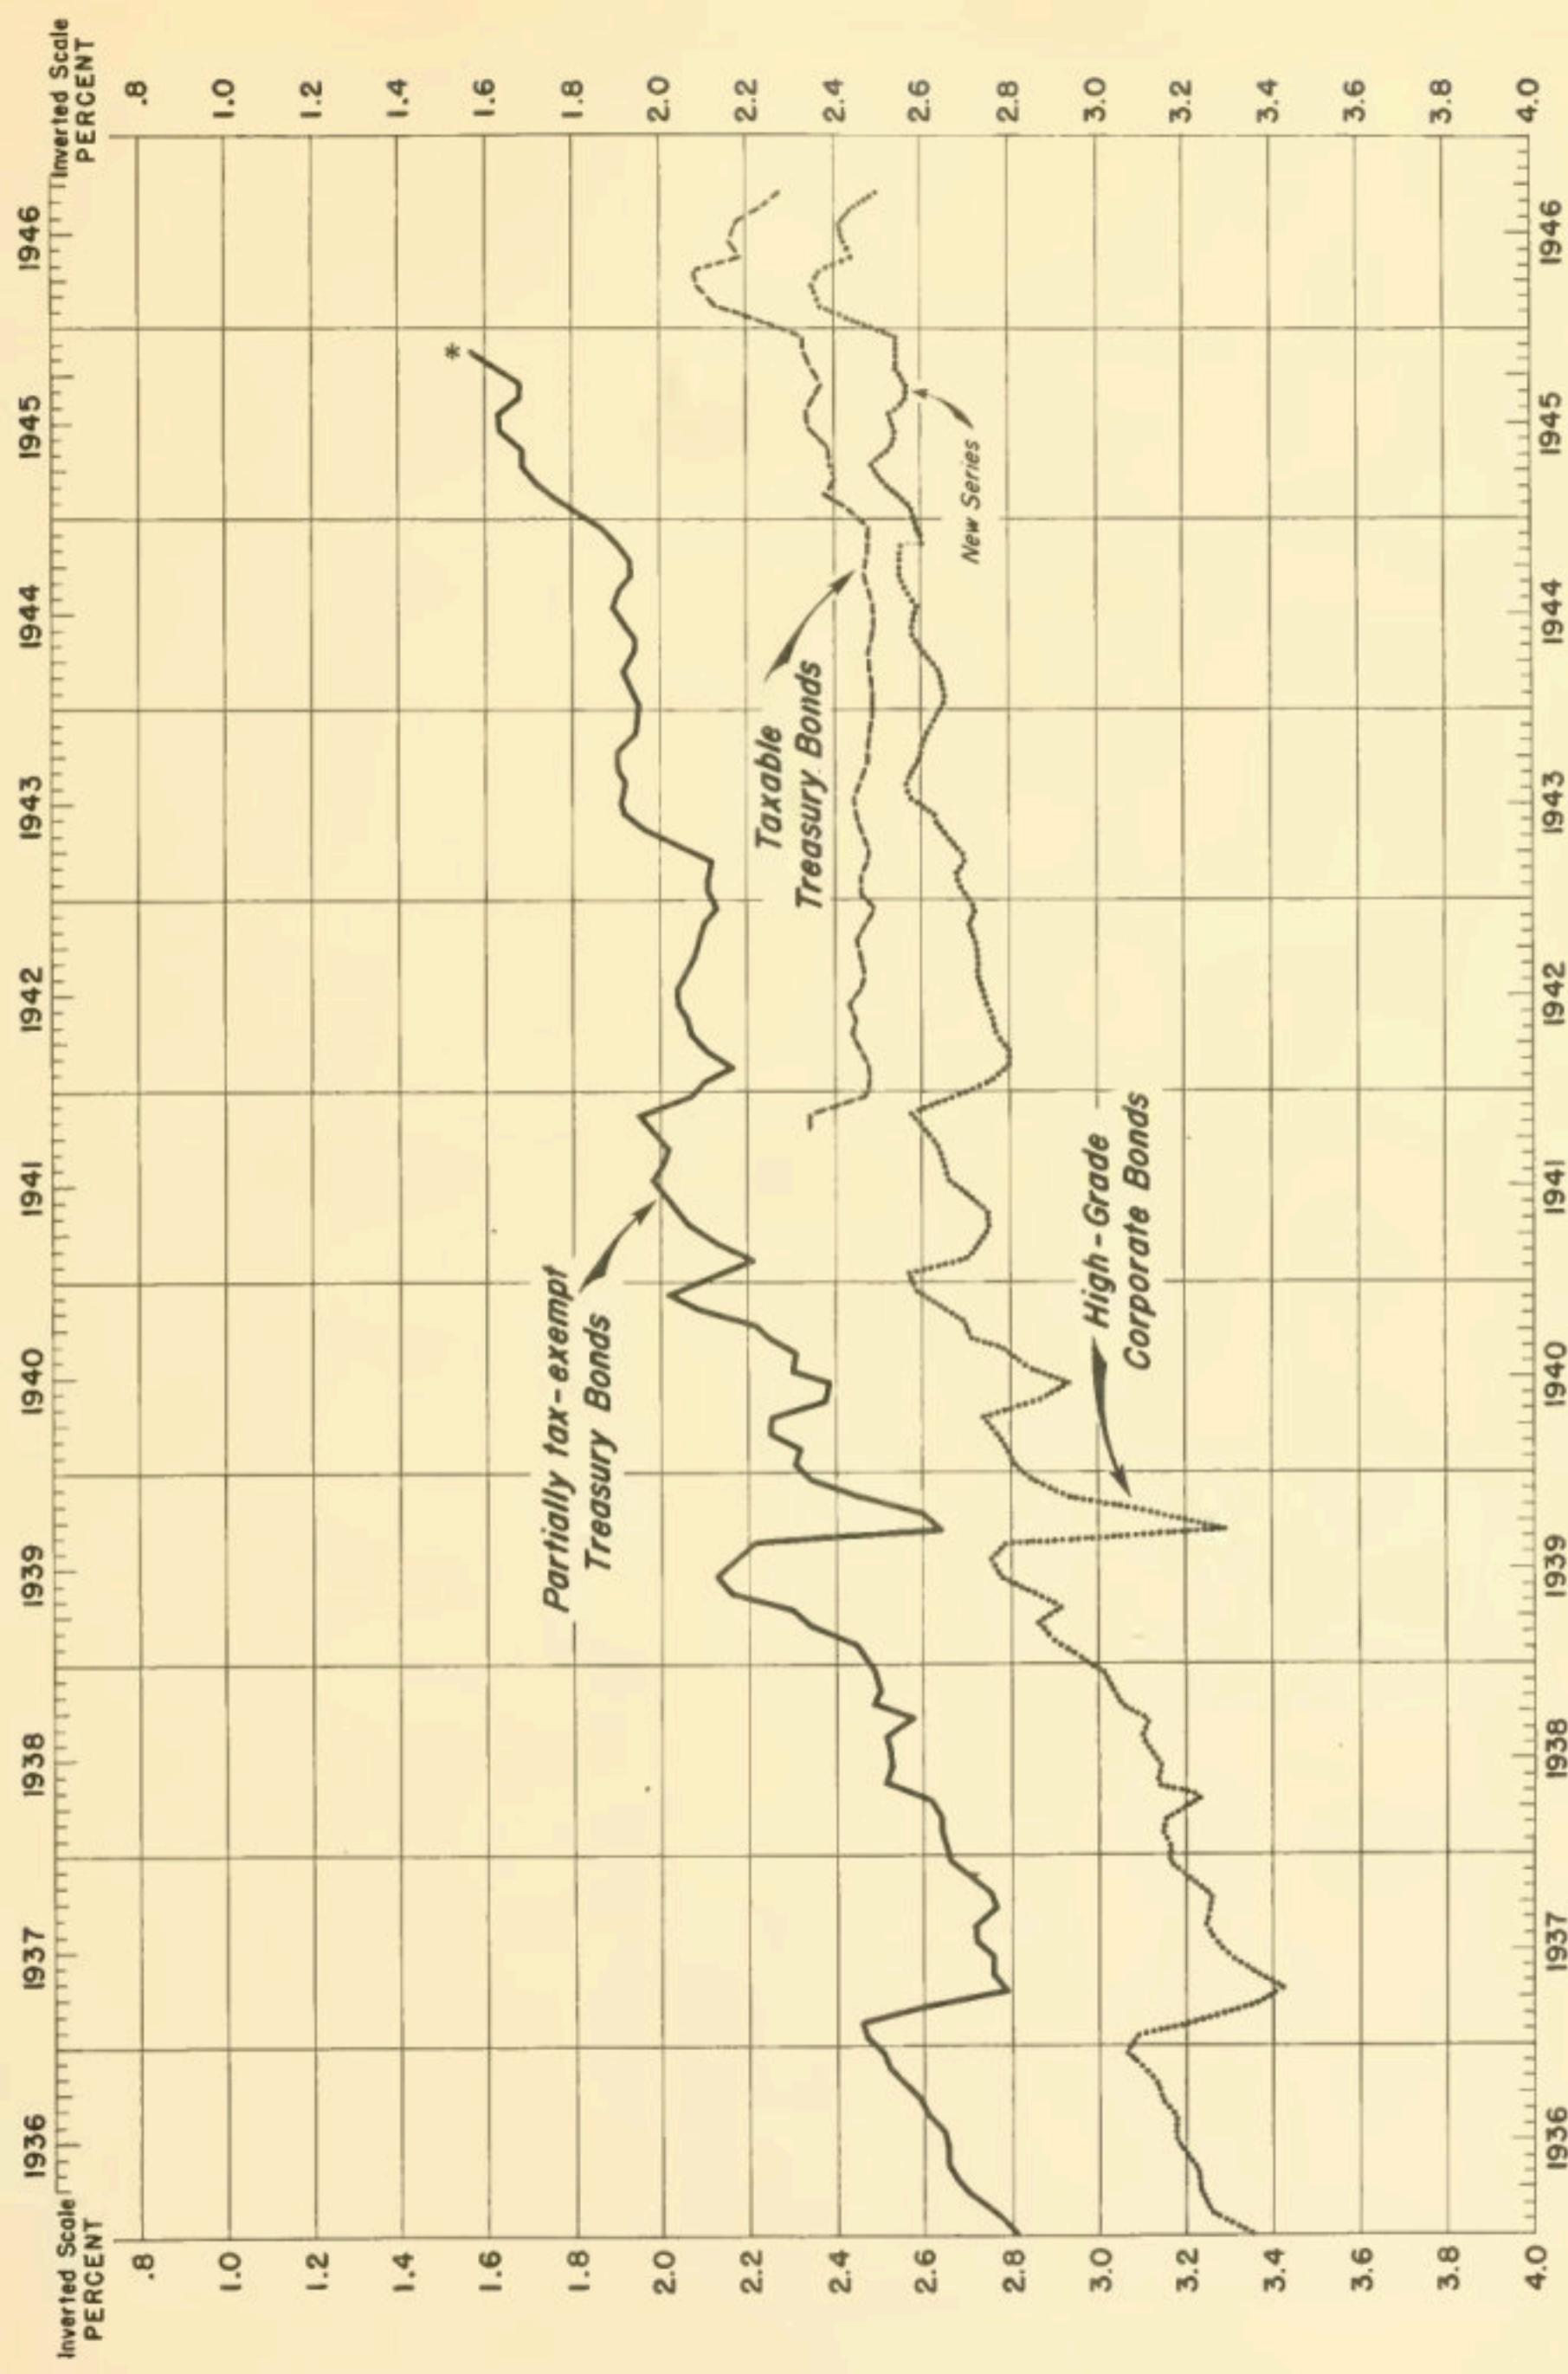

5/ On days when the exchanges are closed, the date and prices of the previous day are used.

6/ Holiday.

1/ Market closed.

Source: (1) Total receipts from internal revenue: Daily Treasury Statement;

(2) Detailed collections by type of tax: Reports of collections made by collectors of internal revenue.

1/ Excludes collections for credit to certain trust accounts for territories and insular possessions, etc.

2/ Includes collection of taxes withheld by employers pursuant to the Revenue Act of 1942 and the Current Tax Payment Act of 1943.

3/ Includes income tax collections on Alaskan Railroads. The excess profits tax included in this column is that imposed under the Second Revenue Act of 1940, as amended.

4/ Consists of the declared value excess profits tax, the profit limit-

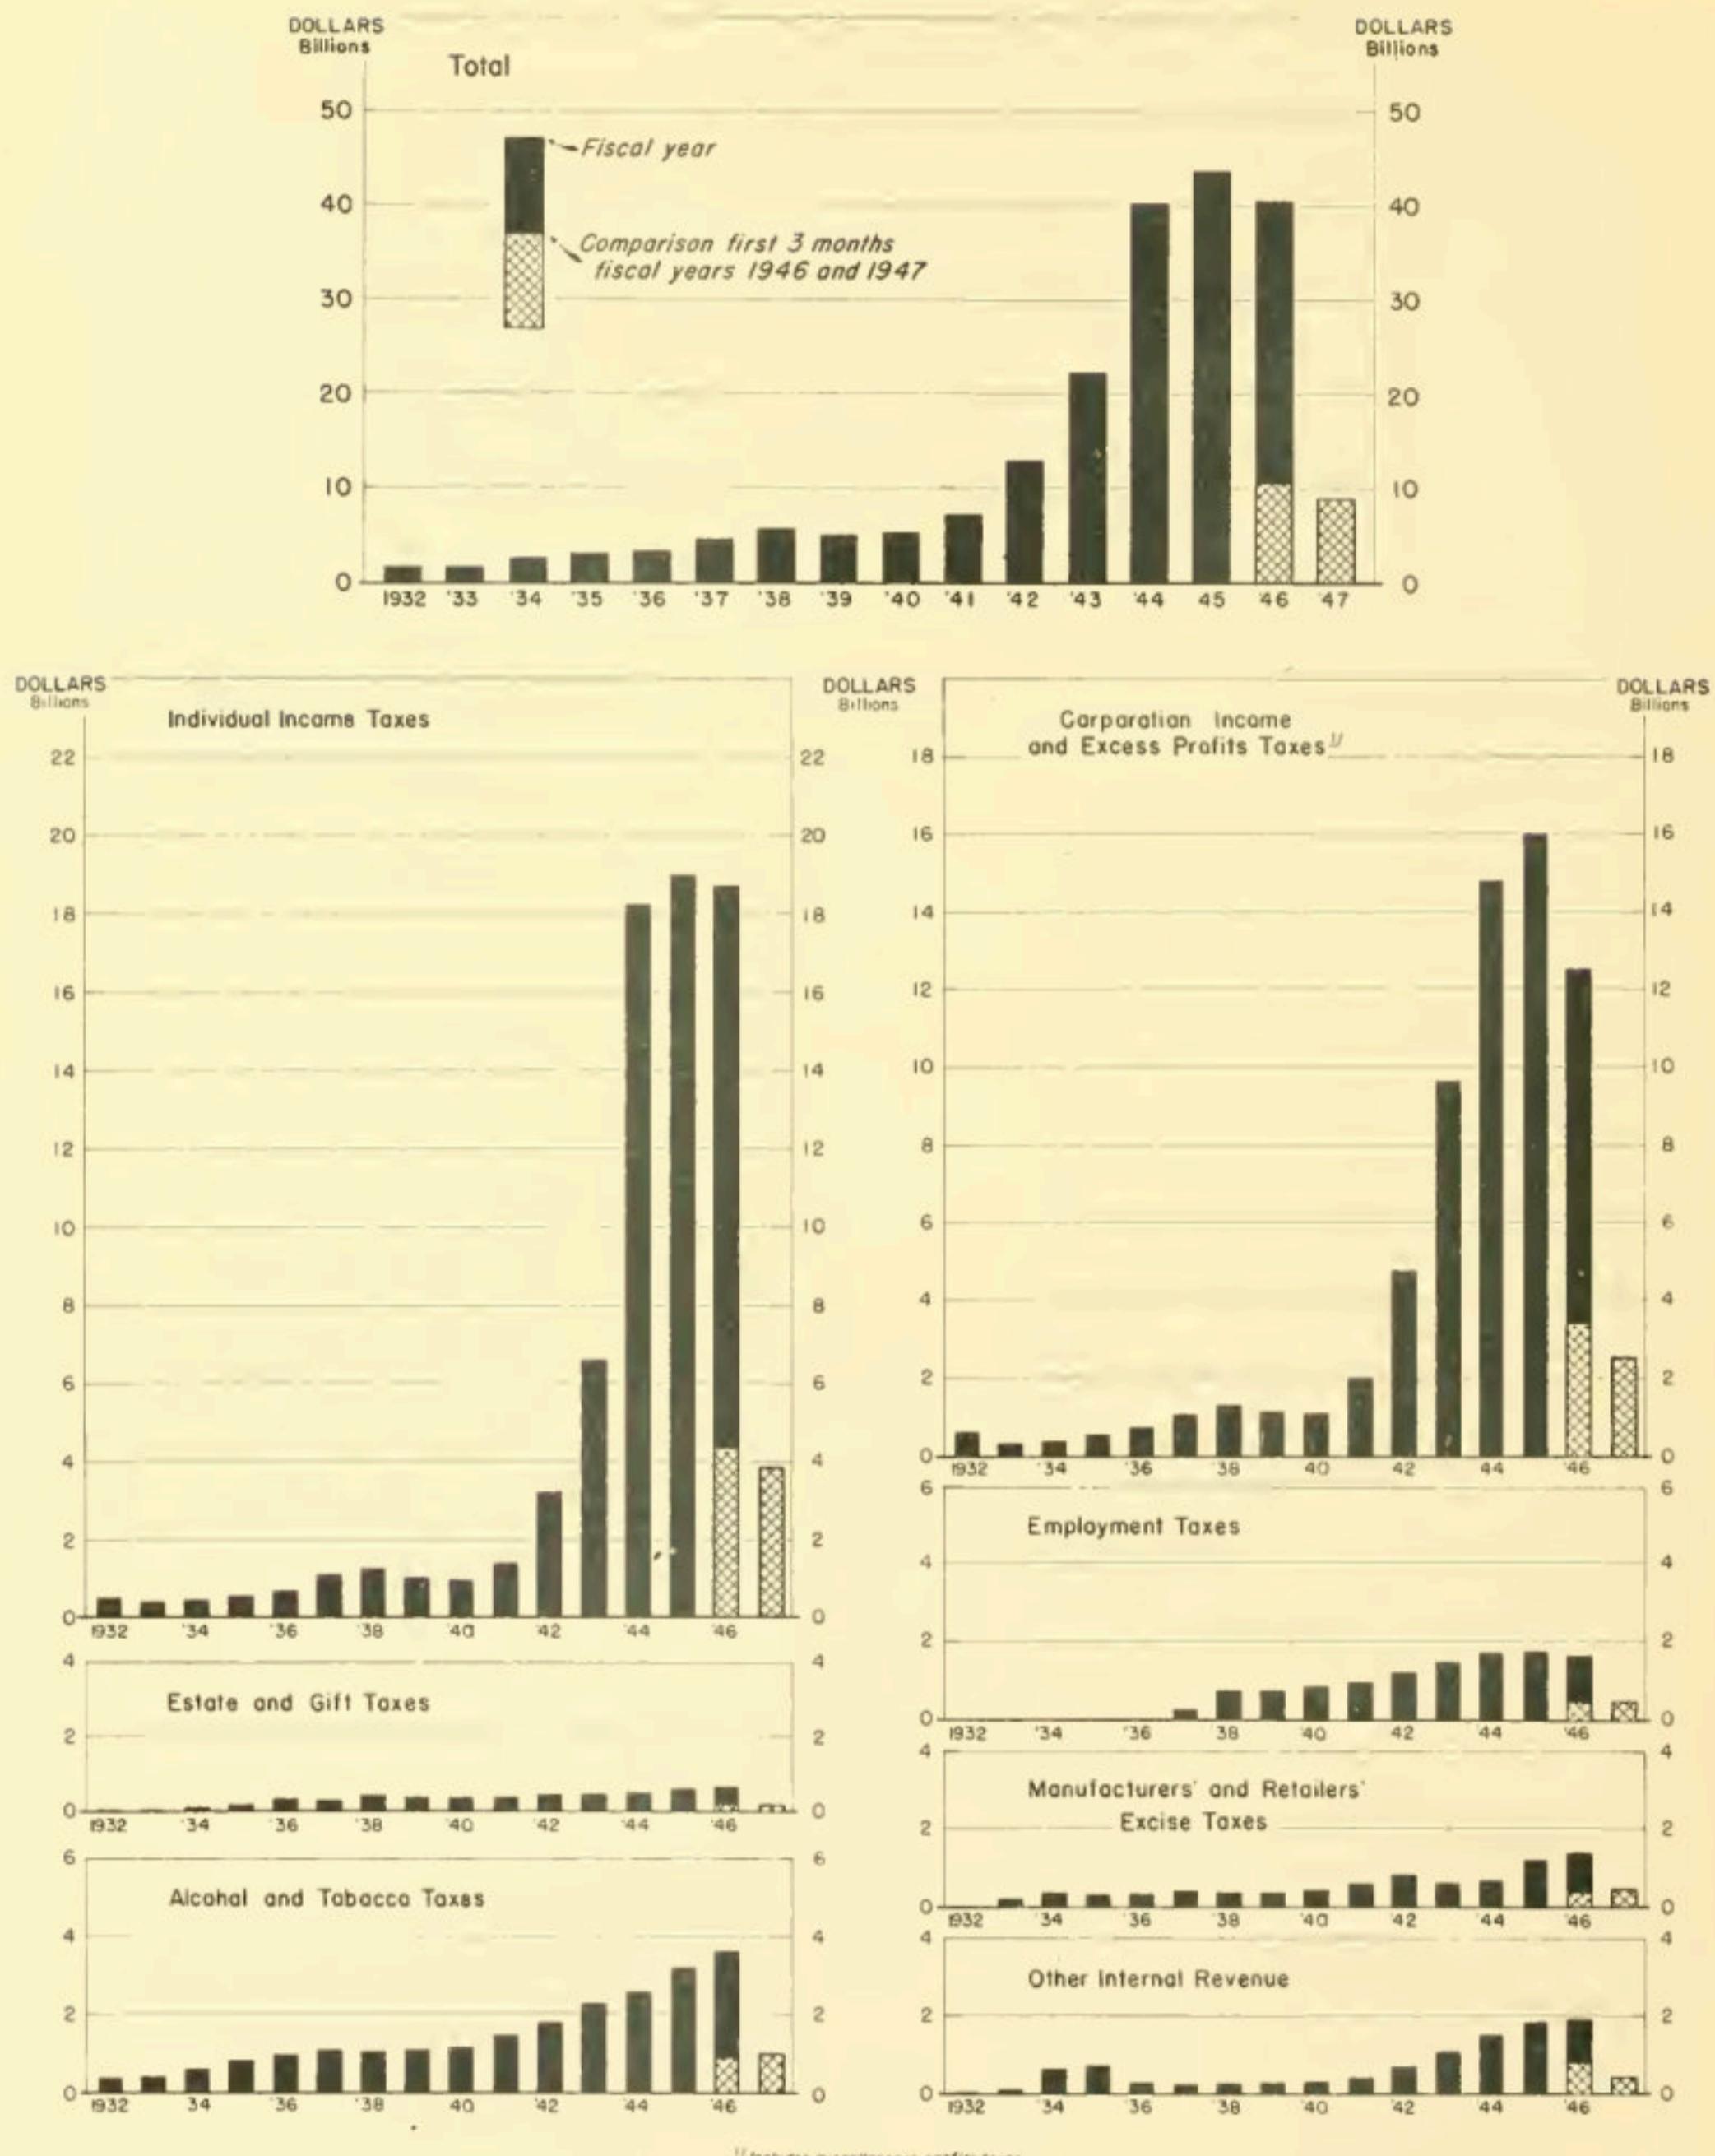

ing provisions of the Vinson Act, and the tax on unjust enrichment.

5/ Represents collections under the Federal Insurance Contributions Act commencing September 1939; prior thereto, collections under Title VIII of the Social Security Act.

6/ Represents collections under the Federal Unemployment Tax Act commencing September 1939; prior thereto, collections under Title IX of the Social Security Act.

7/ Represents collections under

p Preliminary.

r Revised.

1/ Excludes (1) money held by the Treasury, (2) money held by or for the account of the Federal Reserve Banks and their agents, and (3) coin estimated to be held outside the continental limits of

the United States. Includes paper currency held outside the continental limits of the United States.

2/ Gold certificates and Treasury notes of 1890 in circulation are being canceled and retired upon receipt by the Treasury.

3/ Federal Reserve Bank notes and National bank notes are covered by deposits of lawful money and are in process of retirement.

**CAPITAL MOVEMENTS BETWEEN THE UNITED STATES
AND FOREIGN COUNTRIES AND NET POSITION
IN FOREIGN CURRENCIES**

Capital Movements Between the United States and Foreign Countries

This chapter on Capital Movements between the United States and Foreign Countries and Position in Foreign Currencies is divided into four main groups. Section I of Capital Movements, the Historical Summary, contains data regarding capital movements, by the principal types of data and by years, starting with 1935. The last thirteen months are also shown. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for the last thirteen months. The total capital movements are given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Details with respect to capital movements and short-term claims and liabilities are presented in Section III as of the latest month for which the data are

available.

The last group contains information regarding the net position in foreign currencies of United States banks and brokers, their outstanding foreign exchange contracts and purchases and sales of foreign exchange, both spot and forward. This section covers a twelve-month period.

Figures for previous periods may be obtained from the following sources:

Supplement to the "Treasury Bulletin" on "Capital Movements between the United States and Foreign Countries, January 1942 through April 1945", for details during that period.

"Treasury Bulletin", November 1945, for capital movements, and position in foreign currencies by months, 1942-1945.

"Treasury Bulletin", March 1942 and earlier, for details covering years back to January 2, 1935.
