Profile of the Economy

[Source: Office of Economic Policy, Office of Financial Analysis]

Real gross domestic product

Economic growth was very strong in 1996 with real gross domestic product (GDP) rising by 3.4 percent during the four quarters of the year. This rate was an improvement over the 1.3 percent in 1995 and in line with the 3.5 percent growth in 1994. [On an annual average basis, real GDP rose by 2.5 percent in 1996.]

Growth over the year was boosted by a 4.7 percent annual rate of gain in the final quarter, well above the 2.1 percent pace in the third quarter. In the fourth quarter, growth in the foreign trade sector improved dramatically, and consumer spending rebounded to a 3.4 percent annual rate from an increase of just 0.5 percent in the third quarter.

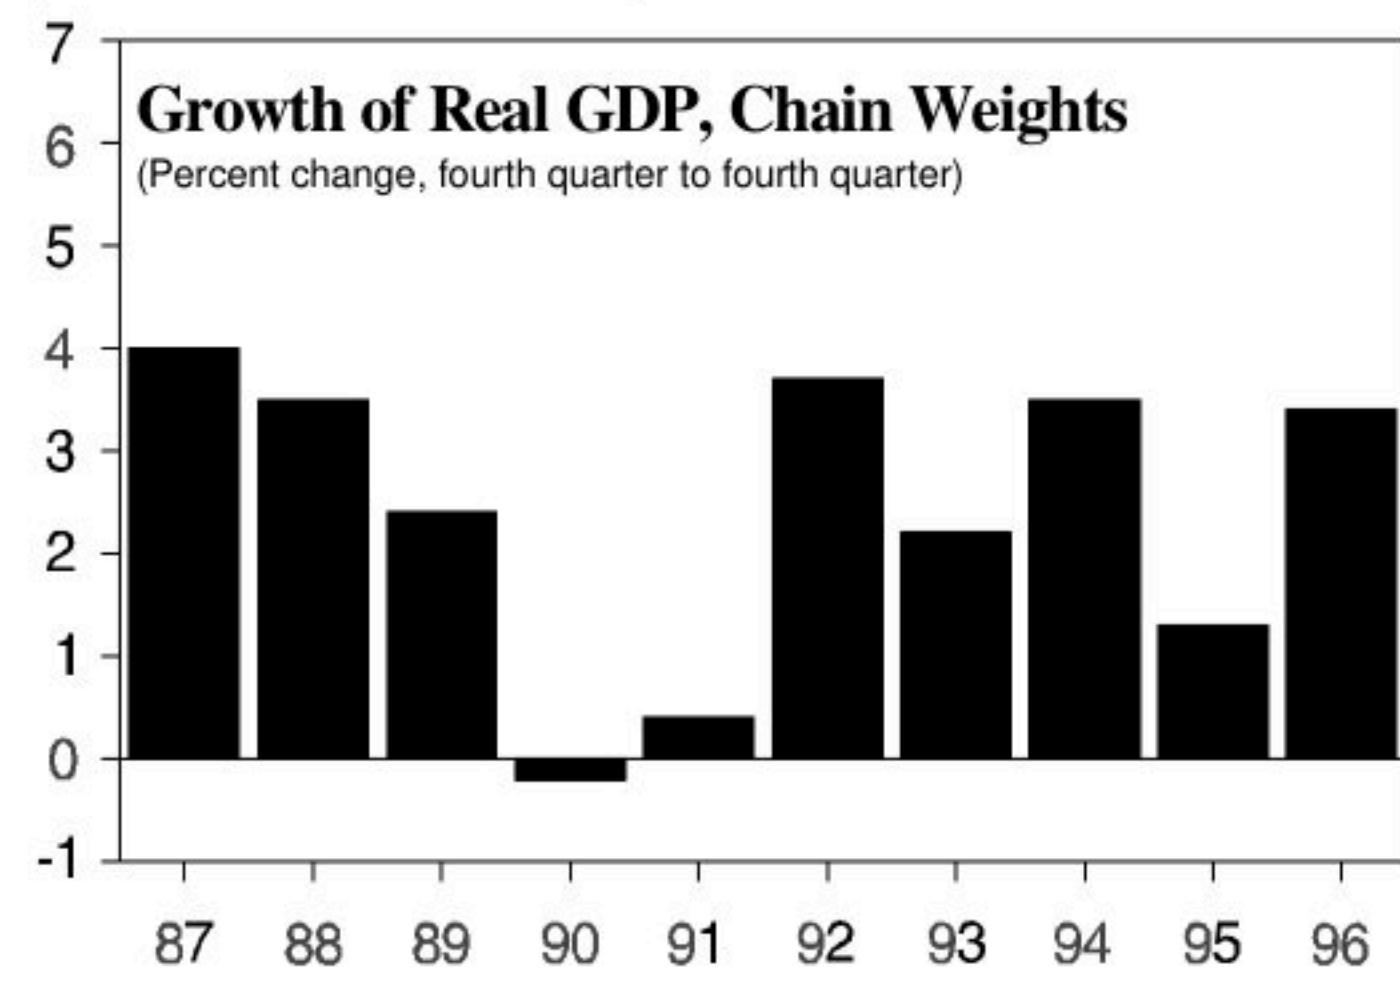

Private nonresidential investment continued to grow rapidly in 1996, as it has throughout the expansion. Equipment investment increased 9.4 percent, although growth eased in the final quarter of the year following a very rapid surge in the third quarter. Investment in structures accelerated to 8.4 percent in 1996, its fastest pace in 12 years.

Inflation was very low in the fourth quarter and throughout 1996 despite the pick-up in economic growth. The chain-weighted price index for GDP moderated to a 1.8 percent annual rate of gain in the fourth quarter from 2.0 percent in the third. Over the entire year the index grew just 2.1 percent, the lowest since 1965. Prices paid by U.S. residents, excluding exports and including imports, also posted the smallest rise since 1965.

Consumer and producer prices

Inflation was extremely favorable in 1996, aside from a pickup in food and energy prices. "Core" inflation, excluding the volatile food and energy components, showed signs of continued deceleration.

The consumer price index (CPI) rose by 3.3 percent last year, up from an increase of 2.5 percent during 1995. Food and energy prices were responsible for all of the accelera-

tion. The core CPI advanced only 2.6 percent last year, down from 3.0 percent during 1995 and matching the low 1994 increase which was the smallest since 1965.

The producer price index (PPI) for finished goods increased by 2.8 percent during 1996, up from 2.3 percent the previous year as food and energy boosted results. On a core basis, finished goods prices edged up by a mere 0.6 percent, very close to the 0.4 percent during 1993, the series low. At earlier stages of processing, core prices declined during 1996.

The cost of compensating labor, which typically rises when labor markets are tight, accelerated only a little last year. The employment cost index rose by 2.9 percent during 1996, little different from the 2.7 percent increase of 1995. A slight speedup in the growth of wages and salaries was partially offset by a further slowdown in benefit costs.

Real disposable personal income and consumer spending

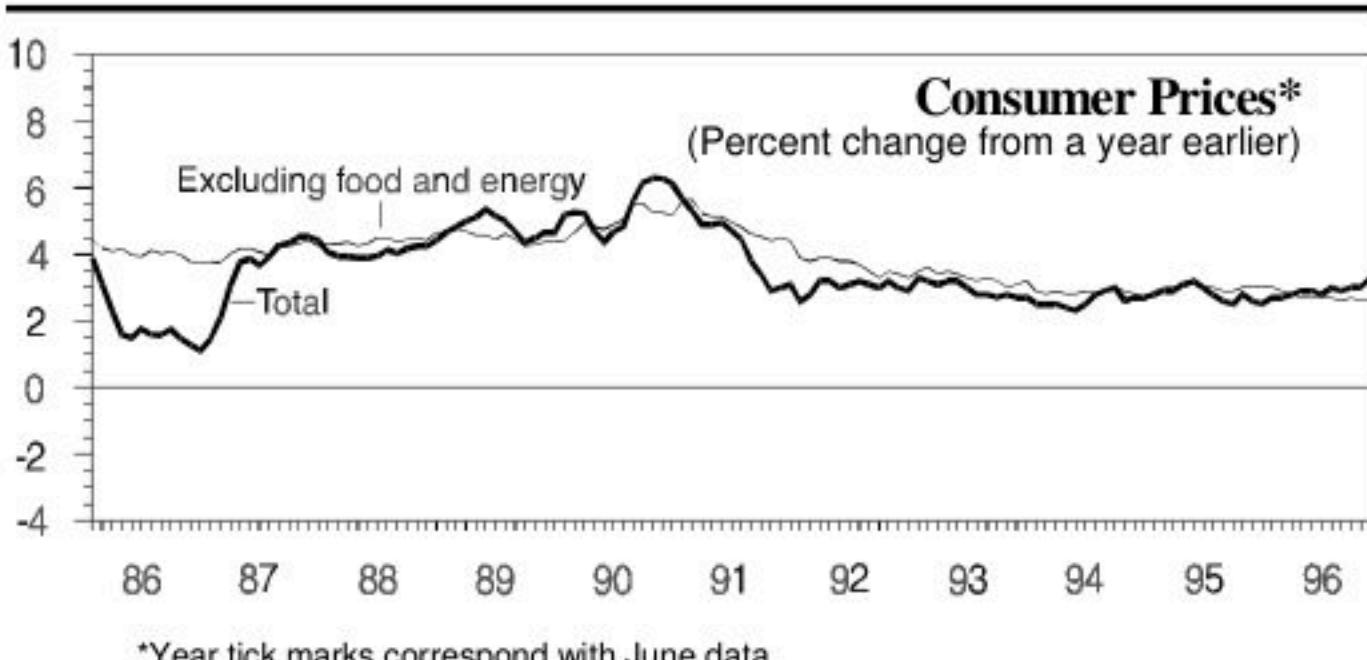

Real disposable (after-tax) personal income rose at a 2.5 percent annual rate in the fourth quarter and by 2.7 percent over the entire year, a little less than the 3.1 percent increase over all of 1995. The composition of growth in 1996 was nonetheless favorable, as real wage and salary income increased faster than in the previous year. A smaller rise in interest income, along with higher tax payments reflecting in part the last installment of the 1993 tax hike on upper-bracket incomes, accounted for most of the slowdown in total after-tax income.

Real consumer spending picked up in 1996, rising by 2.7 percent over the four quarters compared with 1.9 percent over all of 1995. Spending rose at a 3.5 percent annual rate during the first half of the year, slowed abruptly to only 0.5 percent in the third quarter, then rebounded to a 3.4 percent annual rate in the final quarter of the year.

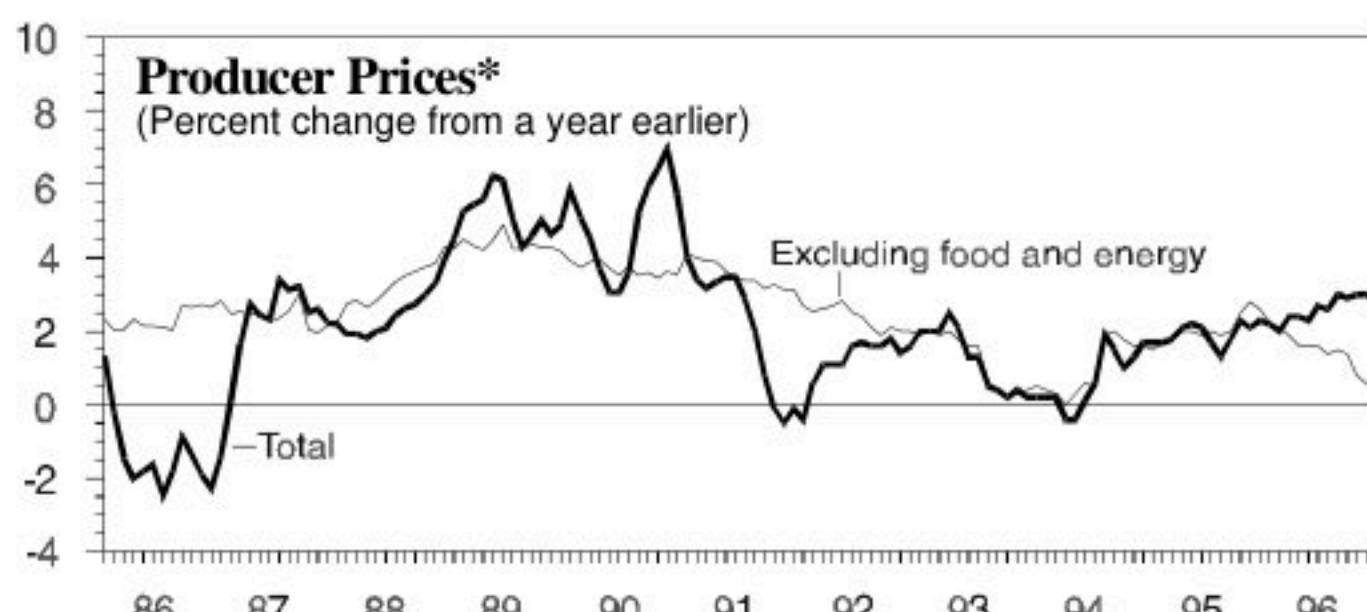

The share of after-tax income devoted to personal saving rose to 5.2 percent in the second half of last year from 4.6 percent in the first half. For the year as a whole, the personal saving rate averaged 4.9 percent, up slightly from 4.7 percent in 1995 and a low 3.8 percent in 1994.

Industrial production and capacity utilization

Industrial production in manufacturing, mining, and utilities grew strongly by 4.3 percent during 1996. This was sub-

*Year tick marks correspond with June data.

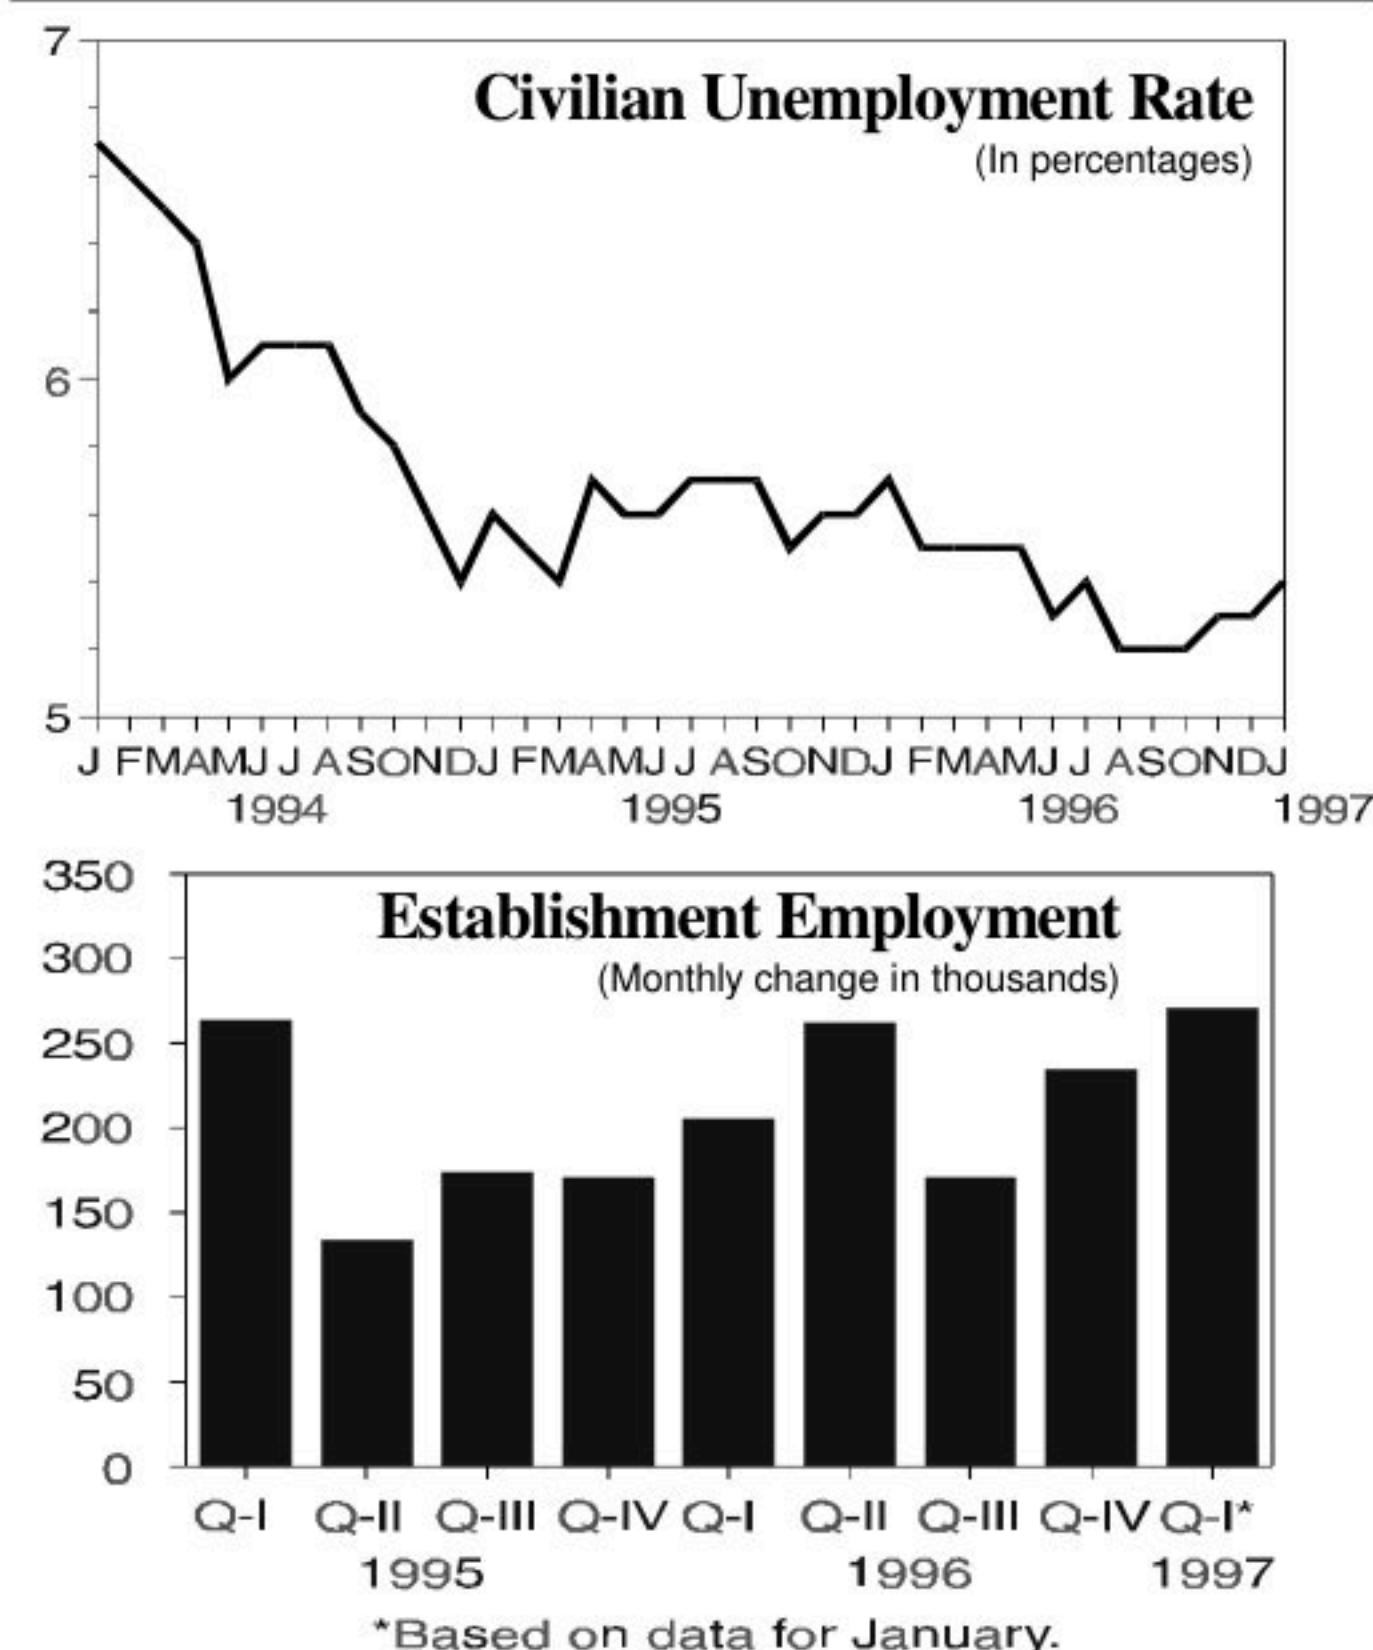

stantially above the growth of 1.1 percent registered during 1995.

Manufacturing production grew at a healthy rate of 4.8 percent during the last year. Within manufacturing, the production of computer equipment showed big advances; however, production of motor vehicles and parts on balance declined during the year. At the end of the year, weather affected the output of utilities. It weakened because the mild December weather reduced heating requirements.

The industrial capacity utilization rate closed 1996 at 83.5 percent. This was up from 83.0 percent a year earlier, but still 1.4 percentage points below the peak rate for the current business cycle expansion of 84.9 percent. The long-term average for the years 1967 through 1995 was 82.0 percent.

Employment and unemployment

Increases in jobs on nonfarm establishment payrolls accelerated to an average of 218,000 per month during 1996 from 185,000 per month during 1995, for a total of 2.6 million new jobs in 1996. In January of this year, employment rose by 271,000.

Strength over the past several years has been centered in the private service-producing sector of the economy, which has added 2.4 million jobs since December 1995. Manufacturing employment, which had fallen by 319,000 from its peak in March 1995 through last September, rose by 53,000 jobs from September through January 1997. Federal Government employment has been on a long-term decline: non-postal Federal employment has fallen by 320,000 since its May 1992 peak, and the level in January was the lowest since May 1996.

The unemployment rate in January was 5.4 percent. Unemployment has been in the narrow band between 5.2 to 5.7

percent of the labor force since October 1994, and has fallen 2.4 percentage points below the June 1992 peak of 7.8 percent. The share of the total working-age population that is employed rose to a new high of 63.6 percent in January.

Nonfarm productivity and unit labor costs

Nonfarm business productivity, or real output per hour worked, rose strongly by a 2.2 percent annual rate in the fourth quarter of 1996. Growth was 1.2 percent over all of 1996, near the long-term trend growth rate of 1.1 percent. That was a marked improvement over the last 3 years, when on balance there was no growth.

Hourly compensation costs in the nonfarm business sector rose by a 3.6 percent annual rate in the fourth quarter and during the entire year. Labor costs per unit of output, which combine the impact of growth of compensation and productivity, are a key indicator of potential inflation. The rate rose at a slow 1.4 percent annual rate in the fourth quarter and by 2.4 percent during all of 1996. Such a low rate of advance indicates little inflationary pressure.

Productivity in manufacturing, included in the nonfarm business sector, remains strong. It grew by 4.0 percent during 1996. Unit labor costs in manufacturing fell by 0.6 percent during 1996.

Current account balance

The current account is the broadest measure of U.S. transactions with the rest of the world, covering not only trade in goods and services but income flows as well. The deficit grew from a recent low of \$10 billion in 1991 to a high of \$148 billion in both 1994 and 1995. The widening reflected the faster pace of U.S. economic growth, which brought in imports at a more rapid rate than exports.

Through the first three quarters of 1996, the current account deficit widened even further, averaging \$164 billion at an annual rate. This still represented just 2.2 percent of GDP, however, little changed from the preceding 2 years.

The widening deficit in 1996 reflected deterioration in the balance on goods and on investment income. In contrast, the surplus in services trade improved. Growth in the investment income deficit was mainly due to rising interest payments on the rapidly growing foreign holdings of U.S. Treasury securities.

In the fourth quarter, the deficit balance on goods narrowed dramatically and the services surplus increased even further. This suggested an improvement in the current account deficit for the final quarter of the year.

Exchange rate of the dollar

The appreciation of the dollar began in the middle of 1995 and continued through 1996. So far in 1997 it has accelerated. Based on the Federal Reserve Board's trade-weighted index of the dollar against G-10 currencies, the dollar had risen by 8.4 percent by the end of 1996 from the all-time low reached in April 1995. In January, the dollar rose by a further 2.6 percent.

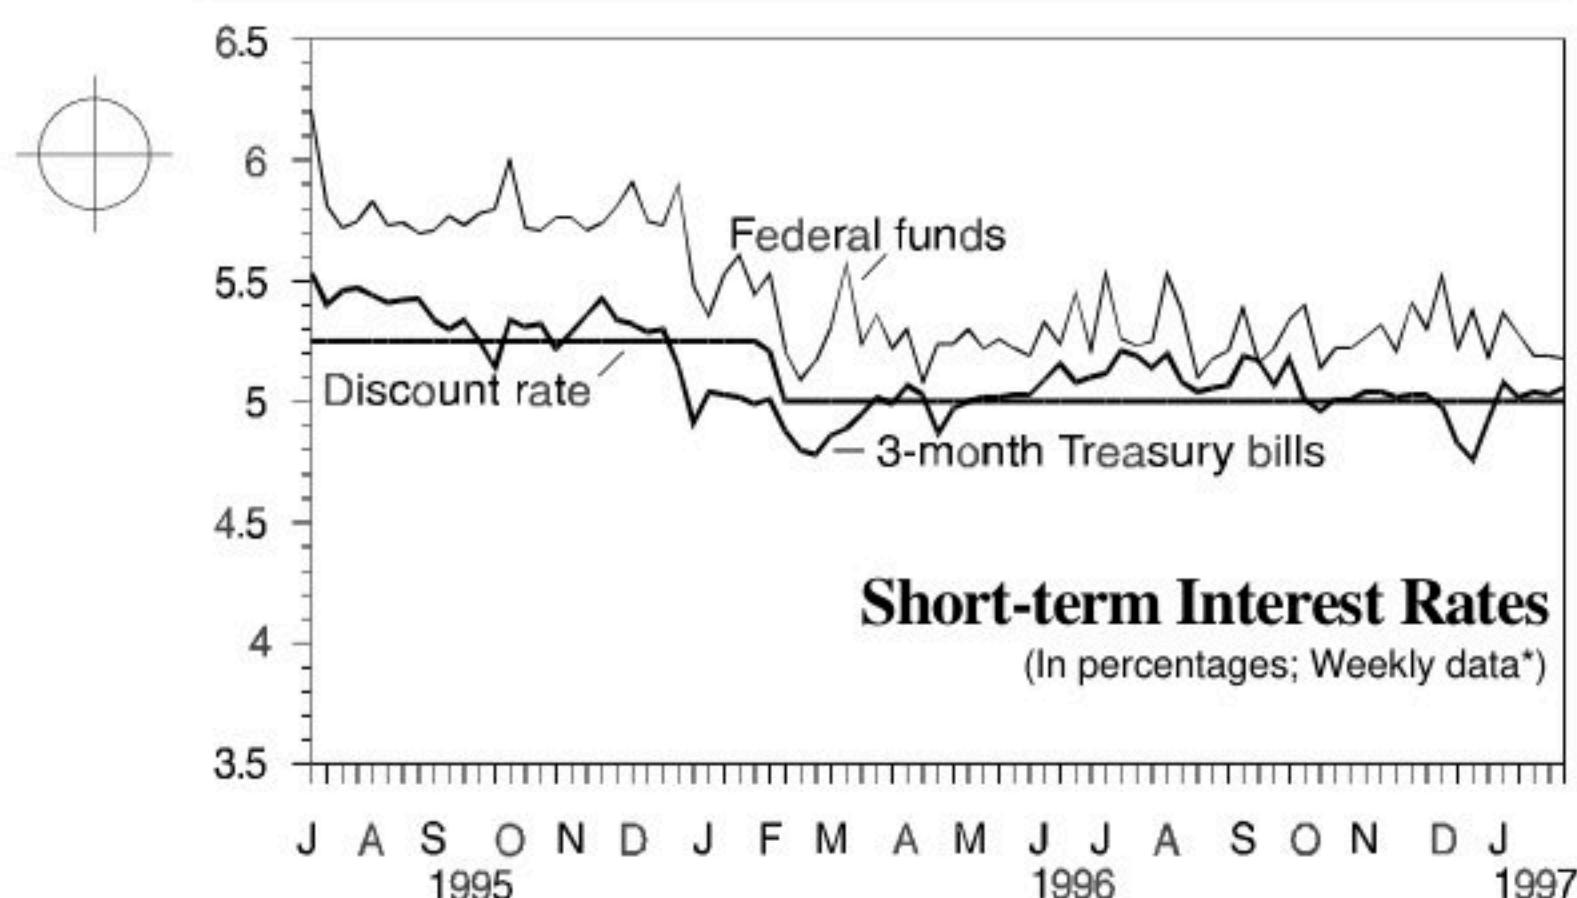

Most of the dollar deterioration that had occurred in 1994 was against the yen and the deutschemark, and the improvement was also greatest against these currencies. Between April 1995 and January 1997, the dollar rose by more than 40 percent against the yen and by more than 16 percent against the deutschemark.

Despite the improvement, the trade-weighted index of the dollar remains about 6 percent below its recent high of January 1994. Many factors determine the level of exchange rates in international currency markets. Underlying economic fundamentals in the United States are sound and confidence in the dollar is high.

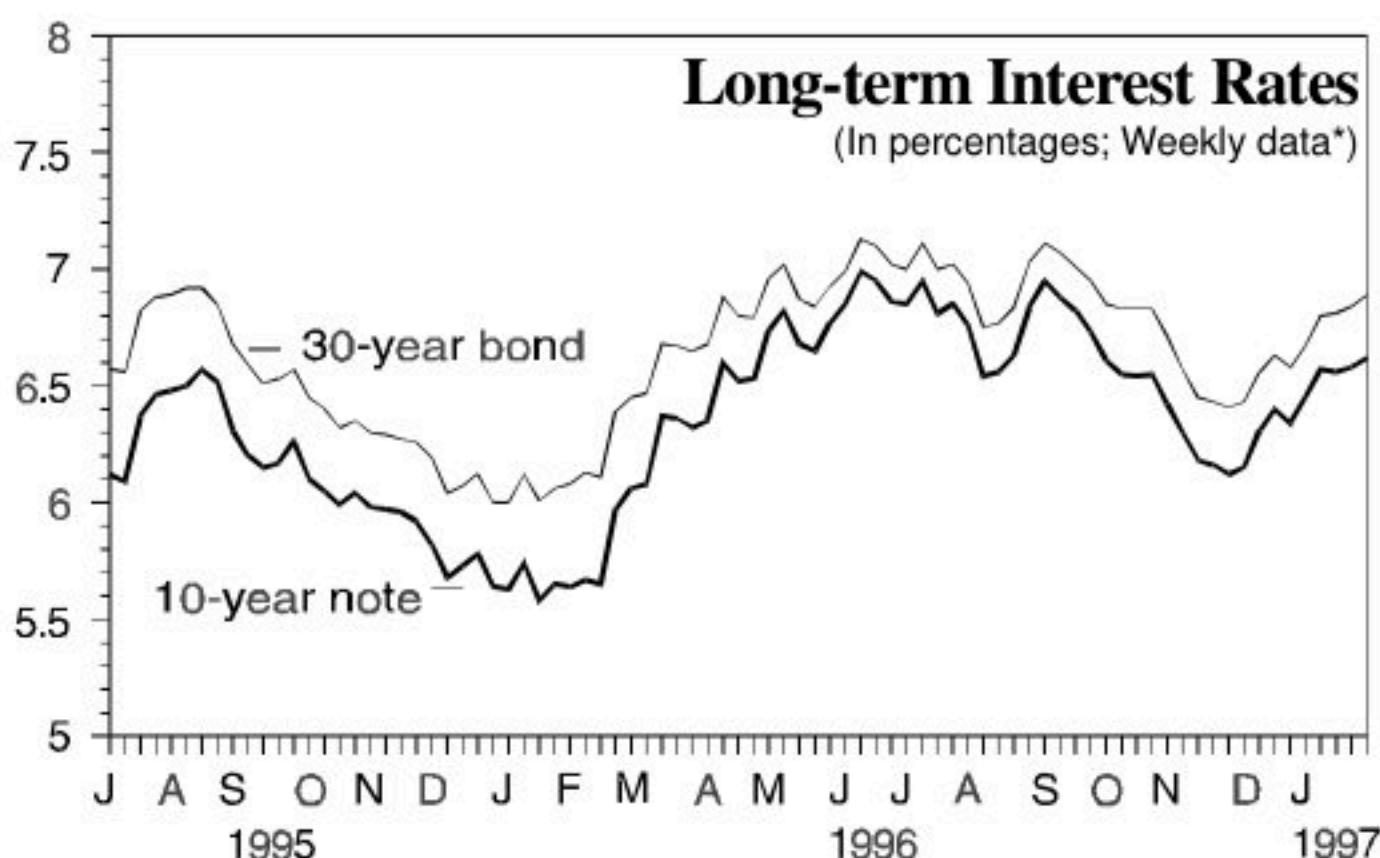

Interest rates

Since early last year, the Federal Reserve Board has held the Federal funds rate target constant at 5.25 percent. The unchanging target has been consistent with an economic situation of continuing growth and little inflationary pressure. Short-term interest rates have similarly remained stable since then, with the 3-month Treasury bill rate staying near 5.0 percent.

Long-term interest rates moved higher in the early part of 1996 and then eased. Since late last year, long-term rates

*Average for week ending Friday; Federal funds ending Wednesday.

have turned up a bit. The yield on the 30-year Treasury bond is currently around 6.8 percent, up from about 6.45 percent around last November.

Mortgage interest rates have been very favorable. Early in 1996, the rate for a 30-year fixed rate loan was about 7 percent, close to the 25-year lows reached in October 1993. This rate rose within the year and then fell to less than 7.75 percent by the end of the year, low by historical standards. In early 1997, the rate increased to around 7.8 percent.

Net national saving and investment

During the first three quarters of 1996, net national saving, which excludes depreciation to replace worn-out or obsolete equipment and structures used in production, rose to 6.1 percent of net national product (NNP). That rate was up from 5.1 percent in 1995 and as low as 2.7 percent in 1992. Despite the gains, net saving remains only half as high as the 12 percent of NNP averaged in the 1960's.

Recent improvement is mainly the result of the narrowing of the Federal deficit. That has reduced Government dissaving to 1.5 percent of NNP through the first three quarters of 1996 from 4.8 percent in 1992. Private saving, of households and businesses, was equivalent to 7.5 percent of NNP through the first three quarters of 1996, up a little from a historic low of 6.4 percent in 1994. Even so, private saving is still well below the nearly 10 percent of NNP averaged in the 1960's and 1970's.

Net domestic investment equaled 7.3 percent of NNP over the first three quarters of 1996, up from a low of 4.1 percent in 1991. Foreign inflows were equivalent to 2.2 percent of NNP, or about one-third of domestic investment. U.S. sources provided investment equivalent to 5.1 percent of NNP, less than half the share of NNP averaged in the 1960's and 1970's.

Housing

Housing activity was very strong in 1996. Although bad weather held down most indicators of the housing market in December, the year as a whole was one of the best for housing in many years.

Starts of new homes totaled 1.47 million in 1996, the best year for home building since 1988. Single-family starts increased nearly 8.0 percent over the 1995 level to 1.16 million units. Starts of new multi-family units improved by almost 13 percent in 1996 to 314,000 units.

Home sales also reached new expansion peaks in 1996, contributing to the rapid growth in new starts. Sales of new single-family homes reached 756,000 in 1996, up from 667,000 in 1995 and the highest in 18 years. Sales of existing homes topped the 4 million mark for the first time since that series began in 1968. The homeownership rate rose to 65.6 percent in the third quarter, the highest in 15 years, before easing back slightly in the fourth quarter.

Rapid growth in employment and income and very favorable readings of consumer confidence fueled the expansion in the housing market in 1996. Rising mortgage interest rates during the middle of the year were somewhat offset by a shift on the part of home buyers to lower-cost adjustable rate mortgages. Over the final 3 months of the year, fixed mortgage rates came down to below 8.0 percent for a 30-year loan, a very favorable rate by historical standards.

Federal budget deficit

The Federal budget deficit fell to \$107.3 billion in fiscal 1996, the lowest in 15 years and about \$57 billion below the level of the previous fiscal year. As a share of GDP, the deficit was 1.4 percent, the smallest share since 1974.

The deficit has been shrinking since fiscal 1992, when it reached an all-time high of \$290 billion. Since then, the deficit has been cut by almost two-thirds, or a total of \$183 billion. Strong economic growth and passage of the Omnibus Budget Reconciliation Act of 1993 set the deficit on its downward course.

Further deficit reduction is expected over the next 6 years, with the Administration's "Fiscal Year 1998 Budget" projecting balance by 2002. The deficit is projected to increase slightly in the current fiscal year as economic growth is expected to return to its long-term growth path, but then the deficit falls again in each of the next 5 years, showing a small surplus by fiscal 2002. Receipts are forecast to grow an average of 4.5 percent a year between fiscal 1996 and fiscal 2002, while growth in outlays is projected to be held to 3.2 percent a year.

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow *obligations* to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash--*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from

governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts which include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions--payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions--payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions--payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 U.S.C. 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays, and deficit of the Government.

Tables **FFO-1**, **FFO-2**, and **FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the Federal Reserve banks. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the

"Monthly Treasury Statement of Receipts and Outlays of the United States Government."

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.

- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.

- Table **FFO-3** details on- and off-budget outlays by agency.

- Table **FFO-4** summarizes internal revenue collections by States and other areas and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax

liability years because they consist of prepayments (i.e., estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), of payments made with tax returns, and of subsequent payments made after tax returns are due or are filed (i.e., payments with delinquent returns or on delinquent accounts).

It is important to note that these data do not necessarily reflect the Federal tax burden of individual States. Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the State where such a corporation reported its taxes from a principal office rather than other States where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one State and work in another.

Budget Results and Financing of the U.S. Government and Fourth-Quarter Receipts by Source

Fourth-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the fourth quarter of fiscal 1996 supplements fiscal data reported in the December issue of the "Treasury Bulletin." At the time of that issue's release, not enough data were available to analyze adequately collections for the quarter.

Individual income taxes—Individual income tax receipts were \$164.6 billion for the fourth quarter of fiscal 1996. This is an increase of \$16.7 billion over the comparable quarter for fiscal 1995. Withheld receipts increased by \$12.0 billion and non-withheld receipts increased by \$3.9 billion during this period. Refunds decreased by \$0.9 billion over the comparable fiscal 1995 quarter. There was a decrease of \$1.0 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal 1995.

Corporate income taxes—Net corporate receipts for the fourth quarter of fiscal 1996 totaled \$43.2 billion. This was \$4.3 billion higher than net receipts for the comparable quarter of fiscal 1995. The \$4.3 billion figure consists of \$4.3 billion in higher estimated and final payments with no change in refunds. The increase in net receipts mainly reflects higher corporate profits.

Employment taxes and contributions—Employment taxes and contributions receipts for the fourth quarter of fiscal 1996 were \$117.8 billion, an increase of \$9.0 billion over the comparable prior year quarter. Receipts to the Old-Age Survivors Insurance, Disability Insurance, and Hospital Insurance

trust funds increased by \$4.8 billion, \$0.6 billion, and \$3.5 billion, respectively, over receipts from the comparable prior year quarter. There was a \$1.0 billion adjustment for prior years liabilities made in the fourth quarter of fiscal 1996, an increase of \$1.0 billion over the comparable prior year quarter.

Contributions for other insurance and retirement—Contributions for other retirement were \$1.1 billion for the fourth quarter of fiscal 1996. There was a negligible decrease over receipts from the comparable quarter of fiscal 1995. The growth in contributions will remain flat over the next few years as the number of employees covered by the Federal employees' retirement system (FERS) falls slowly relative to those covered under the civil service retirement system (CSRS).

Unemployment insurance—Unemployment insurance receipts for the fourth quarter of fiscal 1996 were \$6.1 billion, which is a \$0.2 billion decrease over the comparable quarter of fiscal 1995. State taxes deposited in the U.S. Treasury decreased by \$0.3 billion, and Federal Unemployment Tax Act (FUTA) receipts increased by \$0.1 billion. Railroad unemployment tax receipts increased negligibly from the comparable quarter of fiscal 1995.

Excise taxes—Net excise tax receipts for the fourth quarter of fiscal 1996 were \$13.9 billion, a decrease of \$1.8 billion over the comparable prior year quarter. Total excise tax refunds for the quarter were \$1.1 billion, an increase of \$0.6 billion over the comparable prior year quarter. The decrease in net receipts mainly reflects the expiration of certain excise taxes.

Budget Results and Financing of the U.S. Government and Fourth-Quarter Receipts by Source, con.

Estate and gift taxes—Estate and gift tax receipts were \$4.5 billion for the July through September quarter of fiscal 1996. These receipts represent a decrease of \$0.8 billion over the previous quarter, as well as an increase of \$0.7 billion over the same quarter in the previous year.

Customs duties—Customs receipts net of refunds were \$5.1 billion for the fourth quarter of fiscal 1996. This is approximately \$100 million more than the customs duties received in the Treasury from the comparable prior year quarter. This difference is attributable to an increase in merchandise imports.

Miscellaneous receipts—Net miscellaneous receipts for the fourth quarter of fiscal 1996 were \$6.6 billion, an increase of \$1.5 billion over the comparable prior year quarter. Deposits of earnings by Federal Reserve banks increased by \$1.3 billion over the comparable prior year quarter. Note: During the fourth quarter, fiscal year totals for miscellaneous receipts were increased by \$0.9 billion and \$0.8 billion for fiscal 1995 and fiscal 1996 respectively, to capture reporting for the “Universal Service Fund.” ◇

INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Treasury's operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include the Daily Balance Wire received from the FRBs and branches, and electronic transfers through the Letter of Credit Payment, Fedline Payment, and Fedwire Deposit Systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147, Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax and loan accounts in interest-bearing obligations participate under the

Note Option. The program permits Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury's account at FRBs do so under the Remittance Option.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments, which the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

¹Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.

²Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

³Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan

depositories as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970, and individual estimated income taxes beginning October 1988.

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the “Treasury Bulletin” reflect the total. Further detailed information is published in the “Monthly Statement of the Public Debt of the United States.” Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount are also listed by total Federal securities, securities held by Government accounts, and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)
- Table **FD-2** categorizes by type interest-bearing marketable and nonmarketable Treasury securities. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities--that is, unredeemed securities that have matured and are no longer accruing interest. Because the Federal Financing Bank is under the supervision of Treasury, its securities are held by a U.S. Government account.
- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in *par value* special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.
- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Fed-

eral agency borrowing from Treasury is presented in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”)

- Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt. The average length has increased gradually since it hit a low of 2 years, 5 months in December 1975. It had reached a high of 6 years, 4 months in May 1991. The average length has decreased over time so that during most of 1996 the average length has been at 5 years, 3 months. In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 percent which could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market rates of interest for the first time since 1965. In March 1976 the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971 authorizing Treasury to continue to issue long-term securities, and the ceiling on Treasury bonds was repealed on November 10, 1988. The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes, and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the Federal Reserve banks.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling. Changes in the non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, which can be redeemed on the next business day.

- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

CHARTS FD-A.--Average Length of Privately Held Marketable Debt

[Charts are plotted from figures provided by the Office of Market Finance. See Table FD-5.]

INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of the Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each marketable security is listed in the "Monthly Statement of the Public Debt of the United States." The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities, current bills, notes, and bonds.

- Table **PDO-1** provides a maturity schedule of interest-bearing marketable public debt securities other than regular weekly and 52-week bills. All unmatured Treasury notes and bonds are listed in maturity order, from earliest to latest. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks, so that the "all other investors" category includes all private holdings.
- Table **PDO-2** presents the results of weekly auctions of 13- and 26-week bills, as well as auctions of 52-week bills, which are held every four weeks. Treasury bills mature each Thursday. New issues of 13-week bills are *reopenings* of 26-week bills. The 26-week bill issued every fourth week to

mature on the same Thursday as an existing 52-week bill is a reopening of the existing 52-week bill. New issues of *cash management bills* are also presented. High, low, and average yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive basis.

Treasury accepts noncompetitive tenders of up to \$1 million for bills and \$5 million for notes and bonds in each auction of securities to encourage participation of individuals and smaller institutions.

- Table **PDO-3** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years. Included are: notes and bonds from table PDO-1; 52-week bills from table PDO-2; and data for cash management bills.
- Table **PDO-4** indicates the total amount of marketable securities allotted to each class of investor. The Federal Reserve banks tally into investor classes the tenders in each auction of marketable securities other than weekly auctions of 13- and 26-week bills.

TREASURY FINANCING: OCTOBER-DECEMBER

[Source: Bureau of the Public Debt, Office of Financing]

OCTOBER

Auction of 10-Year Notes

October 2 Treasury announced it would auction \$10,000 million of 10-year notes to refund \$7,614 million of notes maturing October 15 and to raise about \$2,375 million new cash. The notes offered were Treasury notes of Series D-2006, dated October 15, 1996, due October 15, 2006, with interest payable April 15 and October 15 until maturity. An interest rate of 6-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon e.d.t. for noncompetitive tenders and prior to 1 p.m. e.d.t. for competitive tenders on October 8, and totaled \$23,380 million, of which \$10,005 million was accepted at yields ranging from 6.494 percent, price 100.044, up to 6.510 percent, price 99.927. Tenders at the high yield were allotted 80 percent. Noncompetitive tenders were accepted in full at the average yield, 6.502 percent, price 99.985. These totaled \$284 million. Competitive tenders accepted from private investors totaled \$9,721 million.

In addition to the \$10,005 million of tenders accepted in the auction process, \$600 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities, and \$375 million was accepted from Federal Reserve banks for their own account.

The notes of Series D-2006 may be held in STRIPS form. The minimum par amount required is \$400,000.

Auction of 2-Year and 5-Year Notes

October 16 Treasury announced it would auction \$18,250 million of 2-year notes of Series AL-1998 and \$12,500 million of 5-year notes of Series P-2001 to refund \$26,936 million of securities maturing October 31 and to raise about \$3,825 million new cash.

The notes of Series AL-1998 were dated October 31, 1996, due October 31, 1998, with interest payable April 30 and October 31 until maturity. An interest rate of 5-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon e.d.t. for noncompetitive tenders and prior to 1 p.m. e.d.t. for competitive tenders on October 22, and totaled \$47,890 million, of which \$18,283 million was accepted. All competitive tenders at yields lower than 5.930 percent were accepted in full. Tenders at 5.930 percent were allotted 56 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 5.930 percent with an equivalent price of 99.898. The median yield was 5.920 percent; and the low yield was 5.890 percent. Noncompetitive tenders totaled \$1,011 million. Competitive tenders accepted from private investors totaled \$17,272 million.

TREASURY FINANCING: OCTOBER-DECEMBER, con.

In addition to the \$18,283 million of tenders accepted in the auction process, \$2,070 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$825 million was accepted from Federal Reserve banks for their own account.

The notes of Series P-2001 were dated October 31, 1996, due October 31, 2001, with interest payable April 30 and October 31 until maturity. An interest rate of 6-1/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon e.d.t. for noncompetitive tenders and prior to 1 p.m. e.d.t. for competitive tenders on October 23, and totaled \$29,181 million, of which \$12,501 million was accepted. All competitive tenders at yields lower than 6.325 percent were accepted in full. Tenders at 6.325 were allotted 55 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.325 percent with an equivalent price of 99.683. The median yield was 6.300 percent; and the low yield was 6.240 percent. Noncompetitive tenders totaled \$326 million. Competitive tenders accepted from private investors totaled \$12,175 million.

In addition to the \$12,501 million of tenders accepted in the auction process, \$1,550 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$570 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

October 4 tenders were invited for approximately \$19,250 million of 364-day Treasury bills to be dated October 17, 1996, and to mature October 16, 1997. The issue was to refund \$18,482 million of maturing 52-week bills and to raise about \$775 million new cash. The bills were auctioned on October 10. Tenders totaled \$48,960 million, of which \$19,310 million was accepted, including \$752 million of noncompetitive tenders from the public and \$5,259 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$868 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 5.34 percent.

October 29 tenders were invited for approximately \$17,000 million of 48-day bills to be issued November 1, 1996, representing an additional amount of bills dated June 20, 1996, maturing December 19, 1996. The issue was to raise new cash. Tenders were opened on October 31. They totaled \$54,347 million, of which \$17,048 million was accepted. The average bank discount rate was 5.17 percent.

NOVEMBER

November Quarterly Financing

October 30 Treasury announced it would auction \$18,500 million of 3-year notes of Series Z-1999, \$10,000 million of 9-year 11-month 6-1/2 percent notes of Series D-2006, and \$10,000 million of 30-year bonds of November 2026 to refund

\$36,667 million of Treasury securities maturing November 15 and to raise about \$1,825 million new cash.

The notes of Series Z-1999 were dated November 15, 1996, due November 15, 1999, with interest payable May 15 and November 15 until maturity. An interest rate of 5-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on November 5, and totaled \$42,195 million, of which \$18,501 million was accepted at yields ranging from 5.872 percent, price 100.008, up to 5.889 percent, price 99.962. Tenders at the high yield were allotted 10 percent. Noncompetitive tenders were accepted in full at the average yield, 5.879 percent, price 99.989. These totaled \$564 million. Competitive tenders accepted from private investors totaled \$17,937 million.

In addition to the \$18,501 million of tenders accepted in the auction process, \$1,635 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$2,716 million was accepted from Federal Reserve banks for their own account.

The 6-1/2 percent notes of Series D-2006 were an additional issue of notes dated October 15, 1996, due October 15, 2006, with interest payable April 15 and October 15 until maturity. Accrued interest of \$5.53571 per \$1,000, covering the period from October 15, 1996, to November 15, 1996, was payable with each accepted tender.

Tenders were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on November 6, and totaled \$24,061 million, of which \$10,002 million was accepted at yields ranging from 6.260 percent, price 101.739, up to 6.283 percent, price 101.570. Tenders at the high yield were allotted 46 percent. Noncompetitive tenders were accepted in full at the average yield, 6.273 percent, price 101.643. These totaled \$306 million. Competitive tenders accepted from private investors totaled \$9,696 million.

In addition to the \$10,002 million of tenders accepted in the auction process, \$1,470 million was accepted from Federal Reserve banks for their own account.

The notes of Series C-2006 may be held in STRIPS form. The minimum par amount required is \$400,000.

The bonds of November 2026 were dated November 15, 1996, due November 15, 2026, with interest payable May 15 and November 15 until maturity. An interest rate of 6-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the bonds were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on November 7, and totaled \$26,841 million, of which \$10,000 million was accepted at yields ranging from 6.618 percent, price 98.470, up to 6.625 percent, price 98.380. Tenders at the high yield were allotted 51 percent. Noncompetitive tenders were accepted in full at the average yield, 6.619

TREASURY FINANCING: OCTOBER-DECEMBER, con.

percent, price 98.457. These totaled \$258 million. Competitive tenders accepted from private investors totaled \$9,742 million.

In addition to the \$10,000 million of tenders accepted in the auction process, \$1,470 million was accepted from Federal Reserve banks for their own account.

The bonds of November 2026 may be held in STRIPS form. The minimum par amount required is \$400,000.

Auction of 2-Year and 5-Year Notes

November 13 Treasury announced it would auction \$18,250 million of 2-year notes of Series AM-1998 and \$12,500 million of 5-year notes of Series Q-2001 to refund \$28,336 million of securities maturing November 30 and to raise about \$2,425 million new cash.

The notes of Series AM-1998 were dated December 2, 1996, due November 30, 1998, with interest payable May 31 and November 30 until maturity. An interest rate of 5-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on November 19, and totaled \$38,440 million, of which \$18,255 million was accepted. All competitive tenders at yields lower than 5.662 percent were accepted in full. Tenders at 5.662 percent were allotted 29 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 5.662 percent with an equivalent price of 99.931. The median yield was 5.640 percent; and the low yield was 5.580 percent. Noncompetitive tenders totaled \$928 million. Competitive tenders accepted from private investors totaled \$17,327 million.

In addition to the \$18,255 million of tenders accepted in the auction process, \$1,950 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$285 million was accepted from Federal Reserve banks for their own account.

The notes of Series Q-2001 were dated December 2, 1996, due November 30, 2001, with interest payable May 31 and November 30 until maturity. An interest rate of 5-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on November 20, and totaled \$35,821 million, of which \$12,504 million was accepted. All competitive tenders at yields lower than 5.950 percent were accepted in full. Tenders at 5.950 percent were allotted 42 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 5.950 percent with an equivalent price of 99.680. The median yield was 5.910 percent; and the low yield was 5.850 percent. Noncompetitive tenders totaled \$310 million. Competitive tenders accepted from private investors totaled \$12,194 million.

In addition to the \$12,504 million of tenders accepted in the auction process, \$1,320 million was accepted from Federal Reserve banks as agents for foreign and international monetary

authorities, and \$190 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

November 1 tenders were invited for approximately \$19,250 million of 364-day Treasury bills to be dated November 14, 1996, and to mature November 13, 1997. The issue was to refund \$18,870 million of maturing 52-week bills and to raise about \$375 million new cash. The bills were auctioned on November 7. Tenders totaled \$57,496 million, of which \$19,387 million was accepted, including \$701 million of non-competitive tenders from the public and \$5,000 million of the bills issued to Federal Reserve banks for themselves. An additional \$734 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 5.20 percent.

Cash Management Bills

October 30 tenders were invited for approximately \$13,000 million of 34-day bills to be issued November 15, 1996, representing an additional amount of bills dated June 20, 1996, maturing December 19, 1996. The issue was to raise new cash. Tenders were opened on November 13. They totaled \$61,368 million, of which \$13,217 million was accepted. The average bank discount rate was 5.20 percent.

DECEMBER

Auction of 2-Year and 5-Year Notes

December 11 Treasury announced it would auction \$18,250 million of 2-year notes of Series AN-1998 and \$12,500 million of 5-year notes of Series R-2001 to refund \$27,768 million of securities maturing December 31 and to raise about \$2,975 million new cash.

The notes of Series AN-1998 were dated December 31, 1996, due December 31, 1998, with interest payable June 30 and December 31 until maturity. An interest rate of 5-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on December 18, and totaled \$40,634 million, of which \$18,250 million was accepted. All competitive tenders at yields lower than 5.874 percent were accepted in full. Tenders at 5.874 percent were allotted 16 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 5.874 percent with an equivalent price of 99.769. The median yield was 5.850 percent; and the low yield was 5.800 percent. Noncompetitive tenders totaled \$1,340 million. Competitive tenders accepted from private investors totaled \$16,910 million.

In addition to the \$18,250 million of tenders accepted in the auction process, \$1,450 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$875 million was accepted from Federal Reserve banks for their own account.

The notes of Series R-2001 were dated December 31, 1996, due December 31, 2001, with interest payable June 30

TREASURY FINANCING: OCTOBER-DECEMBER, con.

and December 31 until maturity. An interest rate of 6-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on December 19, and totaled \$34,899 million, of which \$12,508 million was accepted. All competitive tenders at yields lower than 6.165 percent were accepted in full. Tenders at 6.165 percent were allotted 27 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.165 percent with an equivalent price of 99.830. The median yield was 6.150 percent; and the low yield was 6.110 percent. Noncompetitive tenders totaled \$412 million. Competitive tenders accepted from private investors totaled \$12,096 million.

In addition to the \$12,508 million of tenders accepted in the auction process, \$850 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$600 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

November 29 tenders were invited for approximately \$19,250 million of 364-day Treasury bills to be dated December 12, 1996, and to mature December 11, 1997. The issue was to refund \$18,792 million of maturing 52-week bills and to raise about \$450 million new cash. The bills were auctioned on December 5. Tenders totaled \$44,292 million, of which \$19,327 million was accepted, including \$795 million of non-competitive tenders from the public and \$5,527 million of the bills issued to Federal Reserve banks for themselves. An additional \$1,201 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 5.16 percent.

Cash Management Bills

November 26 tenders were invited for approximately \$9,000 million of 14-day bills to be dated December 3, 1996, and to mature December 17, 1996. The issue was to raise new cash. Tenders were opened on December 2. They totaled \$44,395 million, of which \$9,060 million was accepted. The average bank discount rate was 5.18 percent.

**TABLE PDO-3.--Public Offerings of Marketable Securities
Other than Regular Weekly Treasury Bills, con.**

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the average bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-2.	⁴² Accepted yields ranged up to 5.360% (price 99.523) in this single-price auction.
² From date of additional issue in case of a reopening.	⁴³ Yields accepted ranged from 5.037% (price 99.898) up to 5.046% (price 99.873) with the average at 5.043% (price 99.882).
³ In reopenings the amount issued is in addition to the amount of original offerings.	⁴⁴ Yields accepted ranged from 5.639% (price 99.894) up to 5.660% (price 99.736) with the average at 5.649% (price 99.819).
⁴ Includes securities issued to U.S. Government accounts and Federal Reserve banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.	⁴⁵ Yields accepted ranged from 6.110% (price 98.496) up to 6.130% (price 98.226) with the average at 6.119% (price 98.374).
⁵ Eligible for STRIPS.	⁴⁶ Accepted yields ranged up to 5.235% (price 99.794) in this single-price auction.
⁶ Interest began to accrue before the issue date (settlement date) of this loan.	⁴⁷ Accepted yields ranged up to 5.680% (price 99.763) in this single-price auction.
⁷ Accepted yields ranged up to 7.57% (price 99.872) in this single-price auction.	⁴⁸ Accepted yields ranged up to 6.144% (price 99.965) in this single-price auction.
⁸ Accepted yields ranged up to 7.79% (price 99.837) in this single-price auction.	⁴⁹ Accepted yields ranged up to 6.415% (price 99.832) in this single-price auction.
⁹ Yields accepted ranged from 7.30% (price 99.867) up to 7.34% (price 99.762) with the average at 7.34% (price 99.762).	⁵⁰ Accepted yields ranged up to 5.939% (price 99.881) in this single-price auction.
¹⁰ Yields accepted ranged from 7.54% (price 99.723) up to 7.55% (price 99.653) with the average at 7.54% (price 99.723).	⁵¹ Accepted yields ranged up to 6.279% (price 99.877) in this single-price auction.
¹¹ Yields accepted ranged from 7.65% (price 99.708) up to 7.66% (price 99.591) with the average at 7.65% (price 99.708).	⁵² Yields accepted ranged from 6.350% (price 100.067) up to 6.400% (price 99.933) with the average at 6.390% (price 99.960).
¹² Accepted yields ranged up to 6.999% (price 99.772) in this single-price auction.	⁵³ Yields accepted ranged from 6.890% (price 99.893) up to 6.906% (price 99.779) with the average at 6.902% (price 99.807).
¹³ Accepted yields ranged up to 7.125% (price 100.000) in this single-price auction.	⁵⁴ Accepted yields ranged up to 6.053% (price 99.902) in this single-price auction.
¹⁴ Accepted yields ranged up to 6.717% (price 99.830) in this single-price auction.	⁵⁵ Accepted yields ranged up to 6.565% (price 99.727) in this single-price auction.
¹⁵ Accepted yields ranged up to 6.994% (price 99.505) in this single-price auction.	⁵⁶ Accepted yields ranged up to 6.300% (price 99.908) in this single-price auction.
¹⁶ Accepted yields ranged up to 6.524% (price 99.956) in this single-price auction.	⁵⁷ Accepted yields ranged up to 6.674% (price 99.795) in this single-price auction.
¹⁷ Accepted yields ranged up to 6.815% (price 99.729) in this single-price auction.	⁵⁸ Yields accepted ranged from 7.005% (price 99.964) up to 7.019% (price 99.865) with the average at 7.016% (price 99.886).
¹⁸ Yields accepted ranged from 6.140% (price 99.959) up to 6.200% (price 99.798) with the average at 6.165% (price 99.892).	⁵⁹ Accepted yields ranged up to 6.288% (price 99.930) in this single-price auction.
¹⁹ Yields accepted ranged from 6.576% (price 99.449) up to 6.680% (price 98.702) with the average at 6.608% (price 99.219).	⁶⁰ Accepted yields ranged up to 6.625% (price 100.000) in this single-price auction.
²⁰ Accepted yields ranged up to 6.170% (price 99.917) in this single-price auction.	⁶¹ Yields accepted ranged from 6.110% (price 99.703) up to 6.124% (price 99.665) with the average at 6.118% (price 99.681).
²¹ Accepted yields ranged up to 6.250% (price 100.000) in this single-price auction.	⁶² Yields accepted ranged from 6.514% (price 103.494) up to 6.553% (price 103.207) with the average at 6.535% (price 103.339).
²² Accepted yields ranged up to 5.690% (price 99.879) in this single-price auction.	⁶³ Yields accepted ranged from 6.764% (price 99.821) up to 6.778% (price 99.643) with the average at 6.768% (price 99.770).
²³ Accepted yields ranged up to 5.905% (price 99.872) in this single-price auction.	⁶⁴ Accepted yields ranged up to 6.170% (price 99.917) in this single-price auction.
²⁴ Accepted yields ranged up to 5.955% (price 99.851) in this single-price auction.	⁶⁵ Accepted yields ranged up to 6.568% (price 99.715) in this single-price auction.
²⁵ Accepted yields ranged up to 6.219% (price 99.601) in this single-price auction.	⁶⁶ Accepted yields ranged up to 6.080% (price 99.851) in this single-price auction.
²⁶ Yields accepted ranged from 5.950% (price 99.797) up to 6.019% (price 99.610) with the average at 5.997% (price 99.670).	⁶⁷ Accepted yields ranged up to 6.409% (price 99.856) in this single-price auction.
²⁷ Yields accepted ranged from 6.498% (price 100.015) up to 6.508% (price 99.942) with the average at 6.501% (price 99.993).	⁶⁸ Yields accepted ranged from 6.494% (price 100.044) up to 6.510% (price 99.927) with the average at 6.502% (price 99.985).
²⁸ Yields accepted ranged from 6.895% (price 99.748) up to 6.909% (price 99.572) with the average at 6.906% (price 99.610).	⁶⁹ Accepted yields ranged up to 5.930% (price 99.898) in this single-price auction.
²⁹ Accepted yields ranged up to 6.090% (price 99.833) in this single-price auction.	⁷⁰ Accepted yields ranged up to 6.325% (price 99.683) in this single-price auction.
³⁰ Accepted yields ranged up to 6.370% (price 99.493) in this single-price auction.	⁷¹ Yields accepted ranged from 5.872% (price 100.008) up to 5.889% (price 99.962) with the average at 5.879% (price 99.989).
³¹ Accepted yields ranged up to 5.860% (price 99.796) in this single-price auction.	⁷² Yields accepted ranged from 6.260% (price 101.739) up to 6.283% (price 101.570) with the average at 6.273% (price 101.643).
³² Accepted yields ranged up to 6.141% (price 99.932) in this single-price auction.	⁷³ Yields accepted ranged from 6.618% (price 98.470) up to 6.625% (price 98.380, with the average at 6.619% (price 98.457).
³³ Accepted yields ranged up to 5.705% (price 99.851) in this single-price auction.	⁷⁴ Accepted yields ranged up to 5.662% (price 99.931) in this single-price auction.
³⁴ Accepted yields ranged up to 5.810% (price 99.743) in this single-price auction.	⁷⁵ Accepted yields ranged up to 5.950% (price 99.680) in this single-price auction.
³⁵ Yields accepted ranged from 5.543% (price 99.884) up to 5.550% (price 99.865) with the average at 5.549% (price 99.867).	⁷⁶ Accepted yields ranged up to 5.874% (price 99.769) in this single-price auction.
³⁶ Yields accepted ranged from 5.890% (price 99.884) up to 5.910% (price 99.735) with the average at 5.900% (price 99.810).	⁷⁷ Accepted yields ranged up to 6.165% (price 99.830) in this single-price auction.
³⁷ Accepted yields ranged up to 5.479% (price 98.806) in this single-price auction.	
³⁸ Accepted yields ranged up to 5.625% (price 100.000) in this single-price auction.	
³⁹ Accepted yields ranged up to 5.289% (price 99.927) in this single-price auction.	
⁴⁰ Accepted yields ranged up to 5.550% (price 99.784) in this single-price auction.	
⁴¹ Accepted yields ranged up to 5.068% (price 99.872) in this single-price auction.	

Note.--All notes and bonds, except for foreign-targeted issues, were sold at auction through competitive and noncompetitive bidding. Foreign-targeted issues were sold at auction through competitive bidding only.

¹ Includes trust funds and accounts that comprise Government accounts under the unified budget concept.

² Exclusive of banks and insurance companies.

³ Included with "All other" investors are certain Government deposit accounts and Government-sponsored agencies, formerly included with Government accounts.

Note.--For detail of offerings, see table PDO-3.

INTRODUCTION: Savings Bonds and Notes

Series EE bonds, on sale since January 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for Series E and EE savings bonds and savings notes. Series A-D were sold from March 1, 1935, through April 30, 1941. Series E was on sale from May 1, 1941, through December 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through April 30, 1952. Series H was sold from June 1, 1952, through December 31, 1979. Series HH bonds were sold for cash from January 1, 1980, through October 31, 1982. Series J and K were sold from

May 1, 1952, through April 30, 1957. U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds.

The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the "Treasury Bulletins" of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal 1974.

TABLE SBN-1.--Sales and Redemptions by Series, Cumulative through Dec. 31, 1996

[In millions of dollars. Source: "Monthly Statement of the Public Debt of the United States"; Bureau of the Public Debt, Office of Public Debt Accounting]

Series	Sales ¹ (1)	Accrued discount (2)	Sales plus accrued discount (3)		Redemptions ¹ (4)	Amount outstanding	
			Redemptions ¹ (4)	Interest- bearing debt (5)		Matured non-interest- bearing debt (6)	
Savings bonds:							
Series A-D ²	3,949	1,054	5,003	5,002	-	-	1
Series E, EE, H, and HH.....	340,786	181,172	521,958	337,547	196,654	-	2,284
Series F and G	28,396	1,125	29,521	29,517	-	-	3
Series J and K	3,556	198	3,754	3,753	-	-	-
Savings notes	862	673	1,535	1,162	341	-	-
Total.....	377,549	184,222	561,771	376,981	196,995	2,288	

¹ Sales and redemption figures include exchange of minor amounts of (1) matured series E bonds for series G and K bonds from May 1951 through April 1957; (2) series F and J bonds for series H bonds beginning January 1960; and (3) U.S. savings notes for series H bonds beginning January 1972; however, they exclude exchanges of series E bonds for series H and

HH bonds.

² Details by series on a cumulative basis and by period of series A-D combined can be found in the February 1952 and previous issues of the "Treasury Bulletin."

Note.--Series E and EE include U.S. savings notes (Freedom Shares) on sale from May 1, 1967, through June 30, 1970, to E bond buyers.

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes, and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

- Table **OFS-1** presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the Federal Reserve banks, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The Federal Reserve banks acquire Treasury securities in the market as a means of executing monetary policy.

- Table **OFS-2** presents the estimated amount of public debt securities held by private investors. Information is obtained from sources such as the Federal financial institution regulatory agencies. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

TABLE OFS-1.--Distribution of Federal Securities by Class of Investors and Type of Issues

¹ U.S. savings bonds, series A-F and J, are included at current redemption value.² Includes domestically chartered banks, U.S. branches and agencies of foreign banks, New York investment companies majority owned by foreign banks, and Edge Act corporations owned by domestically chartered and foreign banks.³ Includes partnerships and personal trust accounts.⁴ Includes U.S. savings notes. Sales began May 1, 1967, and were discontinued June 30, 1970.⁵ Exclusive of banks and insurance companies.⁶ The State and local governments category has been redefined to include its fully defeased

debt that is backed by nonmarketable Federal securities. Includes State and local pension funds.

⁷ Consists of the investments of foreign and international accounts (both official and private) in United States public debt issues. Estimates reflect 1978 benchmark to December 1984; the 1984 benchmark to December 1989; and the 1989 benchmark to date.⁸ Includes savings and loan associations, credit unions, nonprofit institutions, mutual savings banks, corporate pension trust funds, dealers and brokers, certain Government deposit accounts, and Government-sponsored enterprises.

INTRODUCTION: Market Yields

The tables and charts in this section present yields on Treasury marketable securities, and compare long-term yields on Treasury securities with yields on long-term corporate and municipal securities.

• Table **MY-1** lists Treasury market bid yields at constant maturities for bills, notes, and bonds. The Treasury yield curve in the accompanying chart is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. on the last business day of the calendar quarter.

The Treasury uses quotations obtained by the Federal Reserve Bank of New York to derive the yield curve, based on semiannual interest payments and read at constant maturity points to develop a consistent data series. Yields on Treasury bills are coupon equivalent yields of bank *discount rates* at

which Treasury bills trade in the market. The Board of Governors of the Federal Reserve System publishes the Treasury constant maturity data series in its weekly H.15 press release.

• Table **MY-2** shows average yields of long-term Treasury, corporate, and municipal bonds. The long-term Treasury average yield is the 30-year constant maturity yield. The corporate bond average yield is developed by Treasury by calculating reoffering yields on new long-term securities maturing in at least 20 years and rated Aa by Moody's Investors Service. The municipal bond average yield prior to 1991 was compiled by Treasury. Beginning with January 1991, the average yield is the "Municipal Bond Yield Average," published by Moody's Investors Service for 20-year reoffering yields on selected Aa-rated general obligations. See the footnotes for further explanation.

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation, and includes some old and current rare issues that do not circulate, or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, various U.S. Mint offices, the Federal Reserve banks, and the Federal Reserve Board.

INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on the U.S. Government's reserve assets, liabilities to *foreigners*, and its international financial position. All monetary figures are in dollars or dollar equivalents.

• Table **IFS-1** shows reserve assets of the United States, including its gold stock, *special drawing rights* held in the Special Drawing Account in the *International Monetary Fund (IMF)*, holdings of convertible foreign currencies, and reserve position in the IMF.

- Table **IFS-2** contains statistics on liabilities to *foreign official institutions*, and selected liabilities to all other *foreigners*, which are used in the U.S. balance of payments statistics.

- Table **IFS-3** shows nonmarketable bonds and notes that Treasury issues to official institutions and other residents of foreign countries.

1997 - Jan.....	68,200	11,048	9,793	32,987	14,372

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

² Treasury values its gold stock at \$42.222 per fine troy ounce and pursuant to 31 U.S.C. 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs.

⁴ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions.

⁵ The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

¹ Beginning April 1993, includes current value (principal and accrued interest) of zero-coupon, 30-year maturity Treasury bond issue to the government of Argentina. Face value of the issue is \$6,685 million.

million.

² Includes current value of the following zero-coupon Treasury bond issues to the government of Mexico: Beginning March 1988, 20-year maturity issue with remaining face value of \$1,058 million; and beginning March 1990, 30-year maturity issue with remaining face value of \$20,412

million. ³ Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Remaining face value of issue is \$7,162 million.

INTRODUCTION: Capital Movements

Treasury collects information about the transference of financial assets and other portfolio capital movements between the United States and foreigners, and has since 1935. Commercial banks and other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States file capital movement reports with district Federal Reserve banks.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System, and in consultation with representatives of banks, securities firms, and nonbanking enterprises. Copies of the reporting forms and instructions may be obtained from the Office of International Financial Analysis, Office of the Assistant Secretary for Economic Policy, Department of the Treasury, Washington, D.C., 20220, or from district Federal Reserve banks.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. However, information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records, and so may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any country, but are accounted for in regional groupings of such organizations. The only exception is information pertaining to the Bank for International Settlements, which is reported opposite 'Other Europe.'

Banks and other depository institutions, bank holding companies, International Banking Facilities (IBFs), securities brokers and dealers, and nonbanking enterprises in the United States must file reports. These enterprises include the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Those with liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks and other depository institutions, and some brokers and dealers, file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, June 30 and December 31, they also report the same liabilities and claims items attributed to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed for liabilities and claims denominated in foreign currencies. The exemption level applicable to these banking reports is \$15 million.

Banks and other depository institutions, securities brokers and dealers, and other enterprises report monthly their transactions with foreigners in long-term securities. They must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$2 million during the covered month.

Exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and brokers), and other nonbanking enterprises must file reports quarterly if liabilities to, or claims on, unaffiliated foreigners amount to \$10 million or more at the end of the covered quarter.

Nonbanking enterprises also report each month their aggregate U.S. dollar denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices), and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

- **Section I** presents liabilities to foreigners reported by U.S. banks and other depository institutions, as well as brokers and dealers. Dollar liabilities are reported monthly; those denominated in foreign currencies are reported quarterly. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners.

- **Section II** presents claims on foreigners reported by U.S. banks and other depository institutions, brokers, and dealers. Data on banks' claims held for their own account are collected monthly. Information on claims held for their domestic customers as well as on foreign currency claims, is collected on a quarterly basis only. Maturity data are reported according to time remaining to maturity. Reporting also covers certain items held by brokers and dealers in the United States.

- **Section III** contains supplementary data on dollar liabilities to, and dollar claims on, countries not listed separately on the monthly reports submitted by banks, other depository institutions, brokers and dealers in the United States. The supplementary reports are filed semiannually as of the end of June and December.

- **Section IV** shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and brokers), and other nonbanking enterprises in the United States. Information does not include accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. These are reported by business enterprises to the Department of Commerce on its direct investment forms. Data exclude claims on foreigners held through banks in the United States.

- **Section V** contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, brokers, and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners, and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly issued securities as well as transactions in, and redemptions of, outstanding issues. However, the data do not include nonmarketable Treasury bonds and notes shown in table IFS-3.

The geographical breakdown of the transactions data does not necessarily reflect the domicile of the ultimate owners of, or the original issuers of, the securities. This is because the path of a security is not tracked prior to its being purchased from, or after it is sold to, a foreigner in a reportable transaction. That is, before it enters and after it departs the reporting system,

ownership of a security may be transferred between foreigners of different countries. Such transfers may occur any number of times and are concealed among the net figures for U.S. transactions opposite individual countries. Hence, the geo-

graphical breakdown shows only the country of domicile of the foreign buyers and sellers of securities in a particular round of transactions.

SECTION I.--Liabilities to Foreigners Reported by Banks in the United States

¹ These data as of Sept. 30, 1996.² Excludes negotiable time certificates of deposit, which are included in "Other liabilities."³ U.S. Treasury bills and certificates held in custody for the account of oil-exporting countries in "Other Asia" and "Other Africa" amount to \$1,124 million.⁴ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."⁵ Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

CHART CM-A.--U.S. Liabilities to Foreigners Reported by U.S. Banks, Brokers, and Dealers with Respect to Selected Countries

Country	1992	1993	1994	1995	1996
United Kingdom	125,388	150,912	187,081	161,112	176,795
All other Europe	221,194	273,626	253,586	261,083	256,952
Caribbean banking centers ¹	260,020	292,335	361,659	360,352	364,098
Japan	77,735	79,241	87,304	139,056	131,477
All other Asia	87,870	84,510	92,999	135,110	131,797
Subtotal	772,207	880,624	982,629	1,056,713	1,061,119
All other countries	110,848	124,307	121,625	152,548	184,448
Grand total	883,055	1,004,931	1,104,254	1,209,261	1,245,567

¹ Includes Bahamas, Bermuda, British West Indies, Netherlands Antilles, and Panama.

U.S. banking liabilities to foreigners, excluding liabilities represented by long-term securities, are concentrated in international financial centers. The chart and table show that nearly two-thirds of U.S. liabilities are currently reported opposite the United Kingdom, the rest of Europe and, most notably, the offshore banking centers in the Caribbean. An additional 21 percent of U.S. liabilities are held by foreigners domiciled in Japan and the rest of Asia.

After declining moderately through the third quarter of 1996, total U.S. banking liabilities to foreigners expanded \$44.6 billion in the fourth quarter, bringing the level to \$1,245.6 billion. This represents an increase of \$36.3 billion, or 3 percent, over

the 1995 level, which is the lowest annual rate of growth in U.S. liabilities over the period shown. For the year, U.S. liabilities increased substantially opposite the United Kingdom (\$15.7 billion) and "all other countries" (\$31.9 billion), with \$28.4 billion of the latter amount attributable to Canada, Mexico, and several other countries in Latin America. Heaviest activity occurred in the fourth quarter. Despite a fourth quarter increase of \$16.6 billion opposite the British West Indies, U.S. liabilities to the Caribbean banking centers overall grew only marginally in 1996. Liabilities to other Europe, Japan, and other Asia fell by \$15.1 billion combined.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

All other countries.....	83,399	108,500	107,601	110,811	124,214
Grand total.....	626,726	650,643	671,088	735,467	763,635

¹ Includes Bahamas, Bermuda, British West Indies, Netherlands Antilles, and Panama.

U.S. banking claims on foreigners, excluding claims represented by long-term securities, are highly concentrated in international financial centers. The chart and table show that close to two-thirds of U.S. claims are currently reported opposite the United Kingdom, other Europe and, most notably, the offshore banking centers in the Caribbean. An additional 21 percent of U.S. claims are on foreigners domiciled in Japan and the rest of Asia.

Total U.S. banking claims on foreigners, which were virtually static through the first half of 1996, expanded \$30.2 billion in the third quarter to \$763.6 billion. This new high for U.S. claims represents an

increase of \$28.1 billion, or 3.8 percent, over the 1995 level. Compared with yearend 1995, third quarter claims were up \$25 billion opposite the United Kingdom, and strong gains (\$29.8 billion combined) were also realized for other Europe, other Asia, and "all other countries." Canada was one important area of growth for the latter group, accounting for \$7.7 billion of new U.S. claims. Claims on the Caribbean banking centers and Japan changed little in the third quarter, remaining off from 1995 levels by \$26.5 billion combined. Banking claims on Japan remained at one of their lowest levels in recent years.

**SECTION IV.--Liabilities to, and Claims on, Foreigners
Reported by Nonbanking Business Enterprises
in the United States**

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

CHART CM-C.--Net Purchases of Long-Term Domestic Securities by Foreigners, Selected Countries

(In billions of dollars)

Country	1993	1994	1995	Jan. - Dec. 1996	Oct. - Dec. 1996

Grand total.....	111,130	140,350	231,937	384,140	128,711

¹ Includes Bahamas, Bermuda, British West Indies, Netherlands Antilles, and Panama.

As reported by U.S. banks, brokers, and other persons, foreigners' transactions in long-term U.S. securities (i.e., U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks) are conducted largely through international financial centers. The table presents aggregate net purchases on an annual basis for 1993 through 1996, as well as cumulative activity during the fourth quarter of 1996. The figures show an overall, steady increase in foreigners' net purchases, or gross purchases minus gross sales, of U.S. securities.

Total net purchases of U.S. securities by foreigners reached a record annual high of \$384.1 billion during 1996. This represents an increase of \$152.2 billion, or 65.6 percent, over cumulative net

purchases in 1995. For the areas shown, 1996 increases were concentrated in the fourth quarter. In the case of the Caribbean banking centers, net fourth quarter activity of \$35.5 billion constituted 71 percent of that area's 1996 net purchases. The United Kingdom's net purchases, which alone accounted for 32 percent of total 1996 net purchases, were equally heavy in the fourth quarter. In other Europe, annual net purchases were greatest opposite Germany and Spain. And in other Asia, foreigners in China, Hong Kong and Singapore were the major purchasers of U.S. securities. For the year, nearly 64 percent of foreigners' total net purchases was comprised of U.S. Treasury bonds and notes.

SECTION V.--Transactions in Long-Term Securities by Foreigners Reported by Banks and Brokers in the United States

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

³ Includes Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates (Trucial States).

⁴ Includes Algeria, Gabon, Libya, and Nigeria.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

CHART CM-D.--Net Purchases of Long-Term Foreign Securities by U.S. Investors *

(In billions of dollars)

Type	1980-89 ¹	1993	1994	1995	Jan. - Dec. 1996	Oct. - Dec. 1996
Foreign bonds	4,883	80,377	9,224	48,405	45,217	17,431
Foreign stocks	2,834	62,691	48,071	50,291	57,876	9,924
Total.....	7,717	143,068	57,295	98,696	103,093	27,355

* Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.

¹ Annual average.

U.S. net purchases of foreign bonds and stocks in the 1990's stand in marked contrast to the comparatively low levels of average annual activity throughout the 1980's. The heightened activity in foreign securities is due largely to continuing international diversification among U.S. institutional investors, including pension funds and investment companies. The table presents aggregate U.S. net purchases on an annual average basis for 1980 through 1989, and on an annual basis for 1993 through 1996. It also gives U.S. net purchases during the fourth quarter of 1996.

The chart and table show that U.S. net purchases of foreign securities continued at a strong pace in 1996. Net purchases of foreign bonds surged during the second half of the year, particularly during the fourth quarter. However, net purchases for the year remained below 1995 levels. U.S. net purchases of

foreign bonds amounting to \$3 billion or more were transacted with foreigners in the United Kingdom, Germany, Bermuda, Hong Kong, and Australia. U.S. investors recorded \$3.7 billion net sales of foreign bonds opposite Japan. For foreign stocks, the first quarter of 1996 was the strongest quarter ever for U.S. net purchases, and activity through the first half of the year was at near record levels. Net purchases stalled in the second half, though, falling to levels not seen since late 1994 and early 1995. Nevertheless, net purchases of foreign stocks for 1996 were up over 1995. U.S. net purchases of foreign stocks of \$3 billion or more were reported opposite France, Germany, the United Kingdom, Canada, Hong Kong, and Japan. Although strong, 1996 net purchases opposite Japan were down more than 50 percent from 1995.

INTRODUCTION: Foreign Currency Positions

The “Treasury Bulletin” publishes series on foreign currency holdings of large foreign exchange market participants. The series provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, German mark, Japanese yen, Swiss franc, and pound sterling). U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 U.S.C. 5315; 31 C.F.R. 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold. Exemptions from filing the monthly report are given to banking institutions that file the Federal Financial Institution Examination Council (FFIEC) 035 report (“Monthly Consolidated Foreign Currency Report”).

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$1 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December). Exemptions from filing the quarterly report are given to major nonbank market participants that file weekly and monthly reports, and banking institutions that file FFIEC 035 reports.

This information is published in five sections corresponding to each of the major currencies covered by the reports. Tables I-1 through V-1 present the foreign currency data reported weekly by major market participants. Tables I-2 through V-2 present more detailed currency data of major market participants, based on monthly Treasury and FFIEC 035 reports. Tables I-3 through V-3 present quarterly consolidated foreign currency data reported by large market participants and FFIEC reporters which do not file weekly reports.

Principal exchanged under cross currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal is also separately noted on monthly and quarterly reports. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option’s value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established under the Gold Reserve Act of January 30, 1934 (31 U.S.C. 5302), which authorized establishment of a Treasury Department fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *special drawing rights* (*SDRs*), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

- Table **ESF-1** presents the assets, liabilities, and *capital* of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the *IMF*. Gains and losses are reflected in the cumulative net income (+) or loss (-) account.

- Table **ESF-2** shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. “Profits (+) or losses (-) on foreign exchange” includes realized profits or losses. “Adjustment for change in valuation of *SDR holdings and allocations*” reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

¹ Beginning July 1974, the International Monetary Fund adopted a technique for valuing the special drawing rights (SDRs) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

² Excludes foreign exchange transactions for future and spot delivery.

Note.--Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception to September 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

Miscellaneous liability accounts, includes checks outstanding.....	1,906	¹ 4,790
Accounts payable and accruals of Government agencies ²	185,515	216,369
Total liabilities	3,973,201	³ 3,883,255

¹ This is a revised fiscal 1995 amount obtained from "Schedule 1-U.S. Summary General Ledger Account Balances, 1996 Annual Report-Appendix."

² Figures includes both public and Federal accounts.

³ Revised fiscal 1995 amount.

* Decrease is due to the Department of Energy's change in its reporting of Environmental compliance. For fiscal 1995, the entire Environmental compliance is reported as a liability.

CHART SLOFC-A-- Commitments and Contingencies

This report contains totals for commitments of the Government that represent the value of goods and services ordered and obligated but not yet received. It also includes other commitments against appropriations, all pursuant to section 1311 of the Supplemental Appropriation Act of 1955 (31 U.S.C. 200). Contingencies represent conditional commitments that may become liabilities due to events beyond the control of the Government. The amounts are agency projections stated in terms of maximum theoretical risk exposure. The data for commitments and contingencies come from agency notes reports, which have been submitted to the Financial Management Service.

Note.--Financial Management Service (FMS) expects to compile 1996 contingencies data by May 31, 1997. A copy of the detailed schedules can be obtained from the Financial Reports Branch (202) 874-9922. Amounts presented in Chart SLOFC-A were compiled from reports submitted by the agencies in accordance with vol. I, part 2, chapter 4000 of the "Treasury Financial Manual" (Transmittal Letter No. 565). The information furnished by some reporting agencies was based on estimates. Amounts presented in Table SLOFC-1 were compiled from "Schedule 1-U.S. General Ledger Account Balances, 1996 Annual Report-Appendix" and Treasury internal documents.

INTRODUCTION: Airport and Airway Trust Fund

The Airport and Airway Trust Fund was established on the books of the Treasury in fiscal 1971, according to provisions of the Airport and Airway Revenue Act of 1970 [49 U.S.C. 1742 (a)]. The trust fund was re-established in the Internal Revenue Code (26 U.S.C. 9502) as a result of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248, dated September 3, 1982), effective September 1, 1982.

Amounts equivalent to the taxes received in the Treasury on transportation of persons and property by air, gasoline and jet fuel used in noncommercial aircraft, and an international departure tax are appropriated from the general fund of the Treasury to the trust fund. The Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508, dated November 5, 1990) increased rates for the excise taxes transferred to the fund.

These transfers are made based on estimates made by the Secretary of the Treasury, subject to adjustments in later transfers in the amount of actual tax receipts.

On January 1, 1996, authority to collect these taxes and to transfer them from the general fund to the trust fund (26 U.S.C. 9502) expired. Public Law 104-188, the Small Business Job

Protection Act of 1996, reinstated this authority as of August 27, 1996. The taxes and transfer authority expired again on January 1, 1997.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities with the interest credited to the fund. Additional sums from the general fund are also credited as authorized and made available by law, if necessary, to meet outlay requirements.

Amounts required for outlays to carry out the airport and airway program are made available to the Federal Aviation Administration, Department of Transportation.

Other charges to the trust fund are made by the Secretary of the Treasury for transfers of certain refunds of taxes and certain outlays under section 34 of the Internal Revenue Code of 1986.

Annual reports to Congress, required by 26 U.S.C. 9602 (a), are submitted by the Secretary of the Treasury, after consultation with the Secretary of Transportation. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: Uranium Enrichment Decontamination and Decommissioning Fund

The Uranium Enrichment Decontamination and Decommissioning Fund was established on the books of the Treasury in fiscal 1993, according to provisions of the Energy Policy Act of 1992 [42 U.S.C. 2297 (g)]. Receipts represent (1) fees collected from domestic public utilities based on their pro rata share of purchases of separative work units from the Department of Energy and (2) appropriations toward the Government contribution based on the balance of separative work unit purchases.

Expenditures from the fund are for the purpose of (1) decontamination and decommissioning of the three gaseous diffusion plants, (2) remedial actions and related environmental restoration costs at the gaseous diffusion plants, and (3) reimbursement to uranium/thorium producers for the costs of decontamination, decommissioning, reclamation, and remedial action of uranium/thorium sites that are incident to sales to the U.S. Government. Amounts available in the fund exceeding current needs may be invested by the Secretary of the Treasury

in obligations of the United States (1) having maturities congruent with the needs of the fund, and (2) bearing interest at rates determined appropriate, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to these investments.

The Secretary of the Treasury is required by 42 U.S.C. 2297 (g) to provide an annual report to Congress, after consultation with the Secretary of Energy. This report must present the financial condition and the results of operations of the fund during the preceding fiscal year.

The Energy Policy Act of 1992 [42 U.S.C. 2297 (g)(1)] authorizes appropriations to ensure annual deposits to the fund of \$480 million before adjustments for inflation. Between fiscal 1993 and 1996, Government contributions of \$1,379.7 million were authorized. However, only \$680.9 million was appropriated. The shortfall of Government contributions from appropriations is approximately \$698.8 million.

¹ In past fiscal years, the October 1 and September 30 balances have been presented in whole dollars instead of thousands of dollars as figures in other sections of the report have been presented. This error was detected during the update for the fiscal year 1996 report. The

October 1 and September 30 balances have been converted to thousands of dollars with fiscal year 1996's Report of Expected Condition and Results of Operations, Fiscal Years 1997-2001.

INTRODUCTION: Black Lung Disability Trust Fund

The Black Lung Disability Trust Fund was established on the books of the Treasury in fiscal 1978 according to the Black Lung Benefits Revenue Act of 1977 (Public Law 95-227). The Black Lung Benefits Revenue Act of 1981 (Public Law 97-119), re-established the fund in the IRC, 26 U.S.C. 9501.

The Consolidated Omnibus Budget Reconciliation Act of 1985 (Public Law 99-272), enacted April 7, 1986, provided for an increase in the coal tax effective April 1, 1986, through December 31, 1995, and a 5-year forgiveness of interest retroactive to October 1, 1985. The 5-year moratorium on interest payments ended on September 30, 1990. Payment of interest on advances resumed in fiscal 1991. The Omnibus Budget Reconciliation Act of 1987 (Public Law 100-203), signed December 22, 1987, extends the temporary increase in the coal tax through December 31, 2013.

The Code designates the following receipts to be appropriated and transferred from the general fund of the Treasury to the trust fund: excise taxes on mined coal, taxable expenditures of self-dealing by, and excess contributions to, private black lung benefit trusts; reimbursements by responsible mine operators; and related fines, penalties, and interest charges.

Estimates made by the Secretary of the Treasury determine monthly transfers of amounts for excise taxes to the trust

fund subject to adjustments in later transfers to actual tax receipts.

After retirement of the current indebtedness, amounts available in the fund exceeding current expenditure requirements will be invested by the Secretary of the Treasury in interest-bearing public debt securities. Any interest earned will be credited to the fund. Also credited, if necessary, will be repayable advances from the general fund to meet outlay requirements exceeding available revenues.

To carry out the program, amounts are made available to the Department of Labor. Also charged to the fund are administrative expenses incurred by the Department of Health and Human Services and the Department of the Treasury, repayments of advances from the general fund and interest on advances.

The Code requires the Secretary of the Treasury to submit an annual report to Congress after consultation with the Secretary of Labor and the Secretary of Health and Human Services (26 U.S.C. 9602(a)). The report must present the financial condition and results of operations of the fund during the past fiscal year and the expected condition and operations of the fund during the next 5 fiscal years.

INTRODUCTION: Harbor Maintenance Trust Fund

The Harbor Maintenance Trust Fund was established on the books of the Treasury on April 1, 1987, according to the Water Resources Development Act of 1986 (Public Law 99-962, November 17, 1986) (26 U.S.C. 9505).

The Harbor Maintenance Trust Fund consists of such amounts as may be appropriated provided by section 9505 (b), transferred by the Saint Lawrence Seaway Development Corporation (SLSDC) according to section 13 (a) of the Act of May 13, 1954, or credited as provided in section 9602 (b). Amounts are appropriated equivalent to the user fees in the Treasury under section 4461 (relating to harbor maintenance tax).

Amounts in the Harbor Maintenance Trust Fund are available as provided by appropriation acts for making expenditures to carry out section 210 (a) of the Water Resources Development Act of 1986. The appropriations act for the Department of Transportation for fiscal 1995 (Public Law 103-331, September 28, 1994), section 13, waived collection of charges or tolls on the Saint Lawrence Seaway in accordance with section 13 (b) of the Act of May 13, 1954 (as in effect on April 1, 1987). Legislation was passed in the North American Free

Trade Agreement (NAFTA) Implementation Act of 1994 (Public Law 103-182, Sec. 683), which amends paragraph (3) of section 9505 (c) of the Internal Revenue Code of 1986, to authorize payment of up to \$5 million annually to the Department of the Treasury, for all expenses of administration incurred by the Department of the Treasury, the U.S. Army Corps of Engineers, and the Department of Commerce related to the administration of subchapter A of chapter 36 (relating to harbor maintenance tax).

Section 201 of the Water Resources Development Act (WRDA) 1996, authorizes use of the Harbor Maintenance Trust Fund for construction of dredged material disposal facilities associated with the operation and maintenance of Federal navigation projects for commercial navigation.

Annual reports to Congress are required by Section 330 of the Water Resources Development Act of 1992, (Public Law 102-580). These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and its expected condition and operations during the next 5 fiscal years.

INTRODUCTION: Hazardous Substance Superfund

The Hazardous Substance Response Trust Fund was established on the books of the Treasury in fiscal 1981, in accordance with provisions of the Hazardous Substance Response Revenue Act of 1980 (42 U.S.C. 9631 (a)). Effective fiscal 1987, the trust fund was re-established as the Hazardous Substance Superfund (Superfund) in accordance with provisions of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (Public Law 96-510), as amended by the Superfund Amendments and Re-authorization Act (SARA) of 1986 (Public Law 99-499, dated October 17, 1986).

The Internal Revenue Service collects excise taxes on petroleum and chemicals, and an environmental tax from all corporations with modified alternative minimum taxable income in excess of \$2 million. In addition, the Superfund is authorized to be appropriated general revenues from the general fund not otherwise appropriated. Cost recoveries, and other miscellaneous receipts (e.g. interest revenue) are deposited directly to the Superfund. Also appropriated to the Super-

fund, if required, are repayable advances from the general fund to meet outlay requirements in excess of available revenues. Amounts available in the Superfund, in excess of current expenditure requirements, are invested by the Secretary of the Treasury in interest-bearing Government securities (e.g., Treasury bills). All interest earned is credited directly to the Superfund.

To carry out the Superfund program, amounts are appropriated from the Superfund to the Environmental Protection Agency (EPA) for programmatic and administrative expenses, repayment of advances to the general fund, and interest expense associated with outstanding advances from the general fund.

An annual report to Congress by the Secretary of Treasury is required by section 9633 (b) (1) of CERCLA, as amended. These reports present the financial condition of the Superfund and the results of operation for the past fiscal year, and its expected condition and operations during the next 5 years.

¹ Forecasts for these fiscal years assume reauthorization of the Superfund by Congress.

² On January 1, 1998, the corporate environmental tax expires unless reauthorized by Congress. The estimate includes only the first quarter fiscal 1998 corporate collections.

INTRODUCTION: Highway Trust Fund

The Highway Trust Fund was established on the books of the Treasury in fiscal 1957, according to provisions of the Highway Revenue Act of 1956. It has been amended and extended by various highway and surface transportation acts since 1959. The Intermodal Surface Transportation Efficiency Act of 1991 extended the Highway Trust Fund and its taxes through September 30, 1999. It has also been modified by the Deficit Reduction Act of 1984, the Omnibus Budget Reconciliation Act of 1990, and the Omnibus Budget Reconciliation Act of 1993. Amounts equivalent to taxes on gasoline, diesel fuel, special motor fuels, certain tires, vehicles, and truck use, are designated by the Act to be appropriated and transferred from the general fund of the Treasury to the trust fund. These transfers are made monthly based on estimates by the Secretary of the Treasury, subject to adjustments in later transfers to the amount of actual tax receipts. Amounts available in the fund exceeding outlay requirements are invested in public debt securities and interest is credited to the fund.

Within the fund is a mass transit account, funded by a portion of the excise tax collections under sections 4041, 4081, and 4091 of the Internal Revenue Code (26 U.S.C.). The funds

from this account are used for expenditures according to section 21 (a) (2) of the Urban Mass Transportation Act of 1964 or the Intermodal Surface Transportation Efficiency Act of 1991. The remaining excise taxes collected are included in a higher account within the trust fund, and expenditures from this account are made according to the provisions of various transportation Acts.

Amounts required for outlays to carry out the Federal Highway program are made available to the Federal Highway Administration, Department of Transportation. Other charges to the trust fund are made by the Secretary of the Treasury for transfer of certain taxes to the land and water conservation fund and to the Aquatic Resources Trust Fund and refunds of certain taxes.

Annual reports to Congress are required by 26 U.S.C. 9602 (a) Internal Revenue Code as amended, to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Transportation. These reports cover the financial condition and results of operations of the fund for the past fiscal year and expected condition and operations during the next 5 fiscal years.

TABLE TF-15A.--Highway Trust Fund

The following information is released according to the provisions of the Byrd Amendment to the Intermodal Surface Transportation Efficiency Act of 1991 and represents data concerning the Highway Trust Fund. The figure described as "unfunded authorizations" is the latest estimate received from three Department of Transportation for fiscal 1996. The 24-

and 12-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from the Department of Treasury's Office of Tax Analysis for excise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal 1996.

INTRODUCTION: Inland Waterways Trust Fund

The Inland Waterways Trust Fund was established by the Treasury in fiscal 1984, according to provisions of the Inland Waterways Revenue Act of 1978 (Public Law 95-502) and continued according to the Water Resources Development Act of 1986 (26 U.S.C. 9506). Amounts determined by the Secretary of the Treasury to be section 4042 of the Internal Revenue Code of 1986 (relating to tax on fuel used in commercial transportation on Inland Waterways) shall be appropriated to the trust fund.

The Technical and Miscellaneous Revenue Act of 1988 (Public Law 100-647, approved November 10, 1988) increased the tax each year, 1990 through 1995. These amounts are transferred quarterly from the general fund based on estimates made by the Secretary, subject to adjustments in later transfers to the amounts of actual tax receipts.

The Secretary of the Treasury invests in interest-bearing obligations of the United States that portion of the trust fund,

in his judgment, not required to meet current withdrawals. The interest on, and proceeds from the sale or redemption of, any obligation held in the trust fund is credited to the trust fund. The act provides that amounts in the trust fund shall be available, by appropriations acts, for making construction and rehabilitation expenditures for navigation on the inland and intracoastal waterways of the United States described in 33 U.S.C. 1804. Expenditures must be otherwise authorized by law.

Annual reports to Congress are required by 26 U.S.C. 9602 to be submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and its expected condition and operations during the next 5 fiscal years.

¹ Outyear projections are based on economic conditions and agencies' best projections of revenues and expenditures. These are planning numbers and are not to be construed as representing the "President's Budget for Fiscal Year 1998."

² Includes unrealized discounts on investments as reported by the Department of Treasury's Financial Management Service's Sept. 30, 1995, "Inland Waterways Trust Fund Income Statement."

INTRODUCTION: Leaking Underground Storage Tank Trust Fund

The Leaking Underground Storage Tank (LUST) Trust Fund was established in fiscal 1981 according to provisions of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (Public Law 96-510), as amended by the Superfund Amendments and Re-authorization Act (SARA) of 1986 (Public Law 99-499, dated October 17, 1986) and the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508, dated November 5, 1990).

The LUST Trust Fund is financed by taxes collected on gasoline, diesel fuels, special motor fuels, aviation fuels, and fuels used in commercial transportation on inland waterways. Amounts available in the LUST Trust Fund, exceeding current

expenditure requirements, are invested by the Secretary of the Treasury in interest-bearing Government securities (e.g., Treasury bills). All interest earned is credited directly to the LUST Trust Fund.

To carry out the LUST program, amounts are appropriated for the LUST Trust Fund to the Environmental Protection Agency (EPA) for programmatic and administrative expenses.

An annual report to Congress by the Secretary of the Treasury is required by 26 U.S.C. 9602 (a). These reports present the financial condition of the LUST Trust Fund and results of operations for the past fiscal year, and its expected condition and operations during the next 5 fiscal years.

INTRODUCTION: Nuclear Waste Fund

The Nuclear Waste Fund was established on the books of the Treasury in fiscal 1983, according to provisions of the Nuclear Waste Policy Act of 1982 [42 U.S.C. 10222 (c)]. Receipts represent fees collected from public utilities based on electricity generated by nuclear power reactors and spent nuclear fuel. Expenditures from the fund are for purposes of radioactive waste disposal activities.

Amounts available in the fund exceeding current needs may be invested by the Secretary of the Treasury in obligations of the United States (1) having maturities in tandem with the needs of the waste fund, and (2) bearing interest at rates

determined appropriate, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

An annual report to Congress by the Secretary of the Treasury, after consultation with the Secretary of Energy, is required by 42 U.S.C. 10222 (e) (1). This report must present the financial condition and the results of operations of the waste fund during the preceding fiscal year.

INTRODUCTION: Reforestation Trust Fund

The Reforestation Trust Fund was established on the books of the Treasury in fiscal 1981 to continue through September 30, 1985, according to provisions of Title III--Reforestation, of the Recreational Boating Safety and Facilities Improvement Act of 1980 [16 U.S.C. 1606a (a)].

The act provides that the Secretary of the Treasury shall transfer to the trust fund tariffs, limited to not more than \$30 million for any fiscal year, received in the Treasury from October 1, 1979, through September 30, 1985, on (1) rough and primary wood products and wood waste; (2) lumber, flooring, and moldings; and (3) wood veneers, plywood, and other wood-veneer assemblies, and building boards. Public Law 99-190 extended the receipts for the trust fund. Amounts available in the reforestation trust fund exceeding current withdrawals are invested in interest-bearing obligations of the

United States or in obligations guaranteed as to both principal and interest by the United States. The interest on, and the proceeds from the sale or redemption of, any obligations are credited to the trust fund.

The Secretary of Agriculture is authorized to obligate available sums in the trust fund (including any amounts not obligated in previous years) for (1) reforestation and timber stand improvement and (2) administrative costs of the Government for these activities.

Annual reports are required by 16 U.S.C. 1606 a (c) (1) to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Agriculture, on the financial condition and the results of the operations of the trust fund during the past fiscal year and on its expected condition and operations during the next fiscal year.

INTRODUCTION: Aquatic Resources Trust Fund

Aquatic Resources Trust Fund was established on the books of the Treasury pursuant to the Deficit Reduction Act of 1984 (Public Law 98-369, approved July 18, 1984). The fund consists of two accounts: the Sport Fish Restoration Account and Boat Safety Account.

Motorboat fuel taxes are transferred, in amounts up to \$70 million per fiscal year, from the Highway Trust Fund to the Boat Safety Account. Authority for such transfers expires on October 1, 1997.

Amounts equivalent to the excise taxes received on sport fishing equipment and import duties on fishing tackle, yachts, and pleasure craft are appropriated into the Sport Fish Restoration Account. Motorboat fuel taxes not transferred to the Boat Safety Account or to the Land and Water Conservation Fund are transferred from the Highway Trust Fund to the Sport Fish Restoration Account. Transfers of motorboat fuel taxes from the Highway Trust Fund to the Land and Water Conservation Fund are limited to \$1 million per fiscal year. In addition, pursuant to the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508), small engine gasoline taxes are transferred to the Sport Fish Restoration Account.

Amounts in the Sport Fish Restoration Account are used, as provided by appropriation acts, for the purposes of carrying out "An Act to provide that the United States shall aid the States in fish restoration and management projects, and for other purposes," approved August 9, 1950 (as in effect on October 1, 1988) and the Coastal Wetlands Planning, Protection and Restoration Act, as in effect on November 29, 1990.

Amounts in the Boat Safety Account, as provided by appropriations acts are available to carry out the purposes of Public Law 92-75 related to recreational boating safety assistance.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the two accounts exceeding outlay requirements are invested in public debt securities with the interest credited to the respective accounts.

Annual reports to Congress, required by 26 U.S.C. 9602 (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: Oil Spill Liability Trust Fund

The Oil Spill Liability Trust Fund was established on the books of the Treasury by the Omnibus Budget Reconciliation Act 1986 (Public Law 99-509). It was made effective on January 1, 1990, by the Omnibus Budget Reconciliation Act of 1989 (Public Law 101-239), and amended by the Oil Pollution Act of 1990 (Public Law 101-380).

Amounts equivalent to the taxes received from the environmental tax on petroleum, but only to the extent of the Oil Spill Liability Trust Fund rate, are appropriated to the fund. The tax is not applied during any calendar quarter if the Secretary of the Treasury estimates that, as of the close of the preceding calendar quarter, the unobligated balance in the fund exceeds \$1 billion.

Certain amounts were transferred from other funds and were appropriated to the Oil Spill Liability Trust Fund as

provided by U.S.C. 26 9509 (b). certain paid penalties and amounts recovered for damages are also appropriated to the fund.

Amounts in the fund are available for oil spill cleanup costs and certain other related purposes as provided by appropriations acts or section 6002 (b) of the Oil Pollution Act of 1990.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities. Interest is credited to the fund.

Annual reports to Congress, required by 26 U.S.C. (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: Vaccine Injury Compensation Trust Fund

The Vaccine Injury Compensation Trust Fund (VICTF) was created on the books of the Treasury by the Revenue Act of 1987 (Public Law 100-203, approved December 22, 1987). Excise taxes on DPT, DT, MMR and polio vaccines (26 U.S.C. 4131) are appropriated into the fund which serves as a source of funds to pay claims for compensation for vaccine-related injury or death occurring after October 1, 1988. Under current law, the excise tax imposed by the VICTF expires if the project

balance of the VICTF, as of the calendar quarter ending December 31, 1992, is not negative.

Annual reports to Congress, required by 26 U.S.C. (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: National Recreational Trails Trust Fund

Provisions relating to a National Recreational Trails Trust Fund were enacted as part of the Intermodal Surface Transportation Efficiency Act of 1991 (Public Law 102-240, approved December 18, 1991). The Act provides that amounts equivalent to the taxes imposed on fuel used in vehicles on recreational trails or back country terrain and in camp stoves and other non-engine uses in outdoor recreational equipment shall be paid from the Highway Trust Fund to the National Recreational Trails Trust Fund [26 U.S.C. 9503 (c) (6)]. Transfers to the fund are limited to amounts obligated under section 1302 of the Act. Obligated amounts cannot exceed \$30 million per fiscal year over the 1992-97 period. Obligations cannot be

made until amounts are appropriated; there have not yet been appropriations to the fund.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities with the interest credited to the fund.

Annual reports to Congress, required by 26 U.S.C. 9602 (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

Note.-- No current figures or future projections are available from the Department of the Treasury because funds have yet to be appropriated to the fund.

Glossary

With References to Applicable Sections and Tables

Source: Financial Management Service

Accrued discount (SBN-1, -2, -3)—Interest that accumulates on savings bonds from the date of purchase until the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, and J are discount or accrual type bonds—meaning principal and interest are paid when bonds are redeemed. Series G, H, HH, and K are current-income bonds, and the semiannual interest paid to their holders is not included in accrued discount.

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-2, -3)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority (“Federal Fiscal Operations”)—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority may also be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-2)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders (“Treasury Financing Operations”)—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Coupon issue—The issue of bonds or notes (public debt).

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Current income bonds (“U.S. Savings Bonds and Notes”)—Bonds paying semiannual interest to holders. Interest is not included in accrued discount.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by

Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of December 1996, the debt limit was \$5,500,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury's public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-2)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 U.S.C. 1441b).

Federal intrafund transactions (“Federal Fiscal Operations”)—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item “Federal Reserve notes—amounts outstanding” consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

Foreign (“Foreign Currency Positions,” IFS-2, -3)—Locations other than those included under the definition of the United States. (See United States.)

Foreigner (“Capital Movements,” IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States, and international and regional organizations, wherever located. Also, refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions (“Capital Movements”)—Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those

Glossary

of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower (“Capital Movements”)—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-1, -3)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-age and Survivors Insurance Trust Fund; the civil service retirement and disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions (“Federal Fiscal Operations”)—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

International Monetary Fund (“Exchange Stabilization Fund,” IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions (“Federal Fiscal Operations”)—These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Matured non-interest-bearing debt (SBN-1, -2, -3)—The value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Includes all Series A-D, F, G, J, and K bonds. Series E bonds (issued between May 1941 and November 1965), Series EE (issued since January 1980), Series H (issued from June 1952 through December 1979), and savings notes issued between May 1967 and October 1970 have a final maturity of 30 years. Series HH bonds (issued since January 1980) mature after 20 years.

Noncompetitive tenders (“Treasury Financing Operations”)—Offers by an investor to purchase Treasury securities at the price equivalent to the weighted average discount rate or yield of accepted competitive tenders in a Treasury auction. Noncompetitive tenders are always accepted in full.

Off-budget Federal entities (“Federal Fiscal Operations”)—Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.

Outlays (“Federal Fiscal Operations”)—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Own foreign offices (“Capital Movements”)—Refers to U.S. reporting institutions’ parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value—The face value of bonds or notes, including interest.

Quarterly financing (“Treasury Financing Operations”)—Treasury has historically offered packages of several “coupon” security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

Receipts (“Federal Fiscal Operations”)—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-3, -4)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

Special drawing rights (“Exchange Stabilization Fund,” IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members’ quotas in IMF. Although shown in exchange stabilization fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot (“Foreign Currency Positions”)—Due for receipt or delivery within 2 workdays.

State and local government series (FD-2)—(SLUGs) Special nonmarketable certificates, notes, and bonds offered to State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities

Glossary

comply with IRS arbitrage provisions. SLUGs are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-1, -3)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as

\$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), they are sold at a discount.

Trust fund transaction (“Federal Fiscal Operations”)—An intra-budgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.

U.S. notes (USCC)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
