# TREASURY BULLETIN

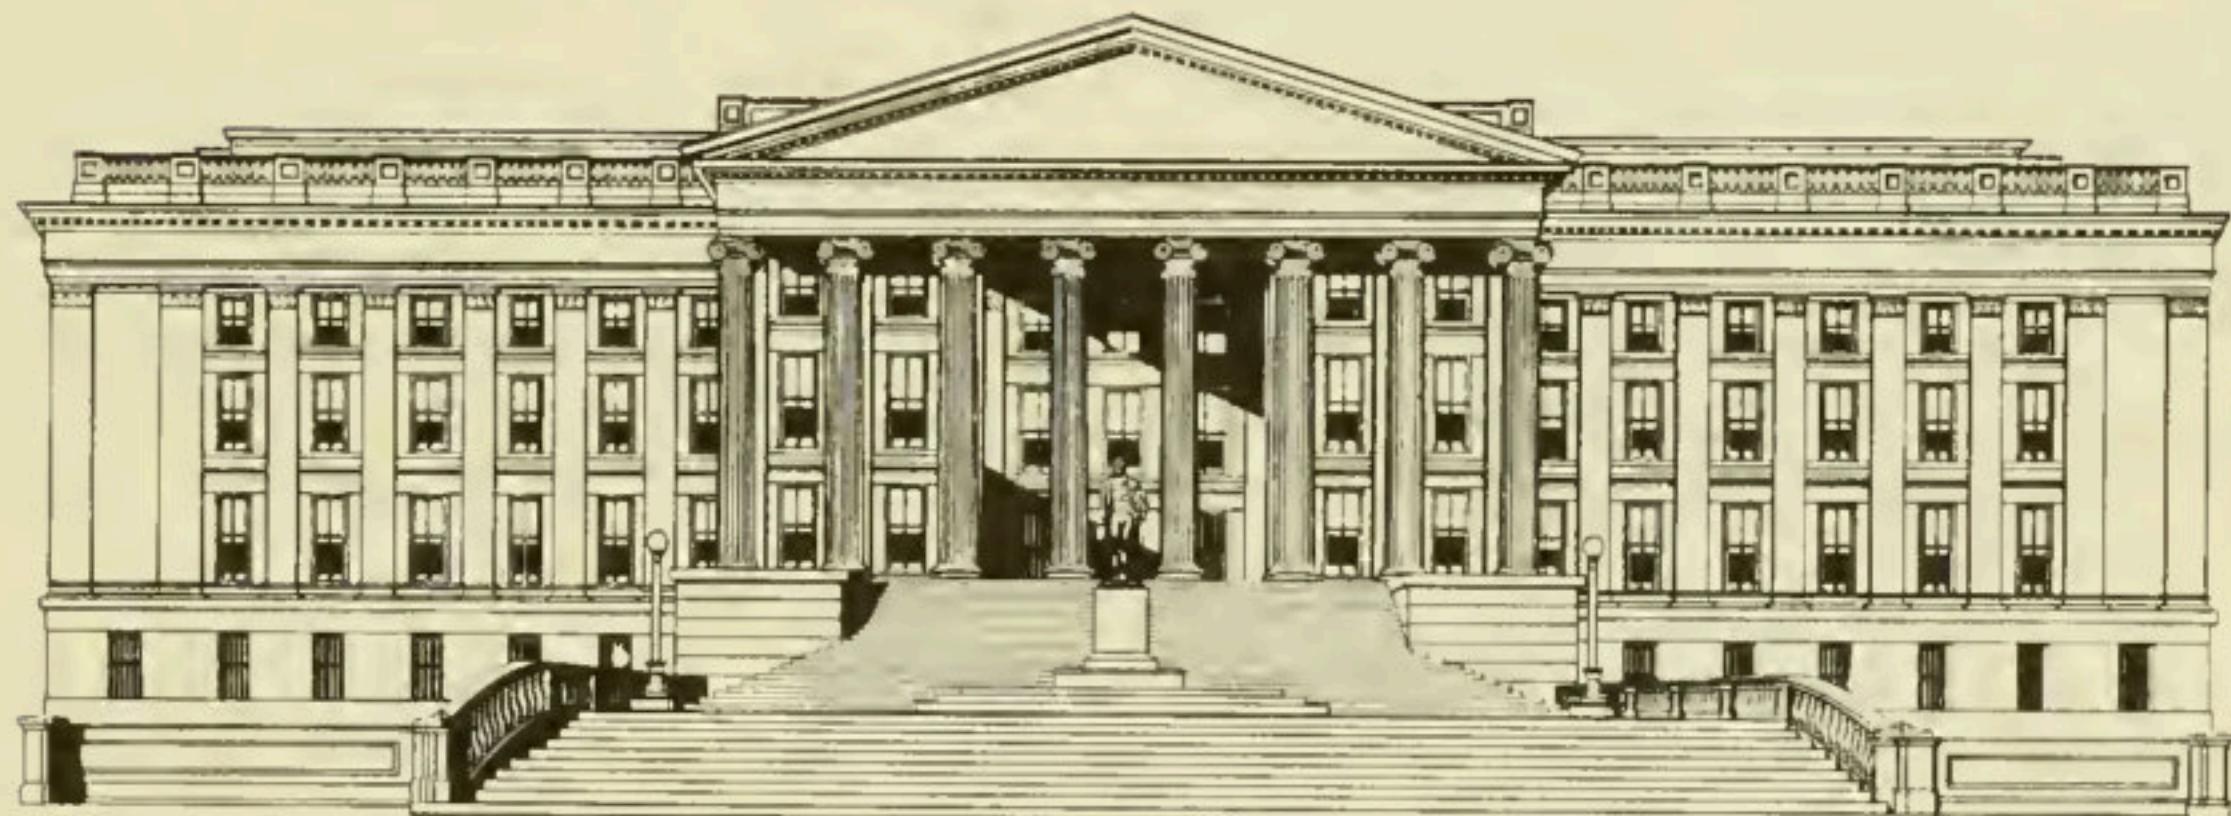

Office of the Secretary  
Department of the Treasury  
Washington, D.C.

Compiled by  
Bureau of Government  
Financial Operations

## INTRODUCTION

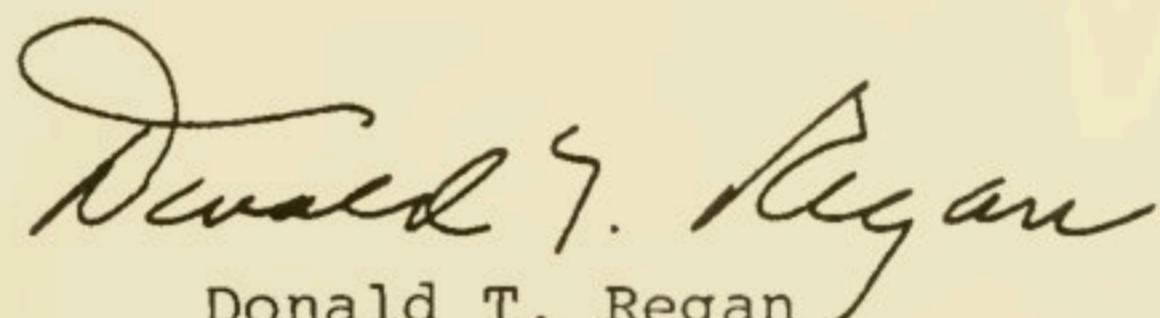

In this first issue of the redesigned quarterly Treasury Bulletin, the Department of the Treasury, as it has for over 40 years, publishes a broad range of statistics on the finances of the U.S. Government and information relative to the operations of the Treasury.

Extensive changes to the content introduced here are in keeping with the Bulletin's original purpose, noted in 1939 by then-Secretary Henry Morgenthau, to make information gathered by the Department available "in a more compact and usable form." That theme has been carried forth in the decision to eliminate from the statistical tables excessive detail and data available from other published sources. The Bulletin, much streamlined as a result, continues to provide its users with vital information, principally in summary form.

As an enhancement, the Bulletin has been divided into four major sections: financial operations, international statistics, cash management/debt collection, and special reports. The first section incorporates tables relating to Federal fiscal operations, Federal obligations, the Federal debt, and financial operations of Government agencies and funds. The second brings together international financial statistics and information on capital movements and foreign currency positions. Statistics on receivables due from the public, reflecting the major governmental debt collection effort, are included in the third. Finally, the fourth section is comprised of miscellaneous reports.

Treasury's concern about publication production costs, and our resolve to cut them where necessary, figured in the other major decision: to issue the Bulletin quarterly rather than monthly. The action is consistent with Government-wide efforts to reduce operating costs.

In sum, we view the changes as constructive ones that will strengthen the Bulletin as an informative and timely publication.

Donald T. Regan  
Secretary of the Treasury

## FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, and consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order, but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories

based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In table FO-1, obligations incurred within the Government are distinguished from those incurred outside the Government. Table FO-2 shows only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury Bulletin, and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 Bulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

<b>Gross obligations incurred 1/.....</b>	<b>806,413</b>	<b>133,306</b>	<b>939,720</b>

1/ For Federal budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (Data are on the basis of Reports on Obligations received from the agencies prior to reports submitted for budget

presentation and therefore may differ somewhat from the Budget of the U.S. Government.)

Gross obligations incurred (as above).....	939,720

\* Less than \$500,000.

1/ Includes reports for Library of Congress, Government Printing Office, and General Accounting Office only.

2/ This fund was reclassified from an off-budget to a budgetary account pursuant to an act approved Oct. 4, 1977.

3/ Postal Service since July 1, 1973, Rural Electrification Administration revolving funds since May 12, 1973, and strategic petroleum reserve account since 1981.

Note.—Agency shifts are shown in this table beginning with the periods of such shifts. The amounts for the complete fiscal year are adjusted at that time.

## TREASURY FINANCING OPERATIONS

NOVEMBER

Auction of 2-Year Notes

On November 10 the Treasury announced that it would auction \$6,750 million of 2-year notes to refund \$4,544 million of notes maturing November 30, 1982, and to raise \$2,206 million new cash. The notes offered were Treasury Notes of Series Y-1984, to be dated November 30, 1982, due November 30, 1984, with interest payable on the last day of May and November in each year until maturity, issued in a minimum denomination of \$5,000. A coupon rate of 9-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1:30 p.m., EST, November 17, and totaled \$14,528 million, of which \$6,753 million was accepted at yields ranging from 9.85 percent, price 100.044, up to 9.93 percent, price 99.902. Noncompetitive tenders were accepted in full at the average yield of accepted tenders, 9.85 percent, price 99.938. These totaled \$1,258 million. Competitive tenders accepted from private investors totaled \$5,495 million.

In addition to the \$6,753 million of tenders accepted in the auction process, \$280 million of tenders was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$437 million of tenders was accepted at the average price from Government accounts and Federal Reserve banks for their own account in exchange for maturing securities.

Auction of 5-Year 2-Month Notes

On November 16 the Treasury announced that it would auction \$5,000 million of 5-year 2-month notes to raise new cash. The notes offered were Treasury Notes of Series G-1988, to be dated December 2, 1982, due February 15, 1988, with interest payable on August 15 and February 15 in each year until maturity, issued in a minimum denomination of \$1,000. A coupon rate of 10-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1:30 p.m., EST, November 23, and totaled \$10,184 million, of which \$5,004 million was accepted at yields ranging from 10.18 percent, price 99.684, up to 10.23 percent, price 99.486. Noncompetitive tenders for \$1 million or less from any one bidder were accepted in full at the average yield of accepted tenders, 10.21 percent,

price 99.565. These totaled \$878 million. Competitive tenders accepted from private investors totaled \$4,126 million.

In addition to the \$5,004 million of tenders accepted in the auction process, \$20 million of tenders was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities.

52-Week Bills

On November 19 tenders were invited for approximately \$7,000 million of 364-day Treasury bills to be dated December 2, 1982, and to mature December 1, 1983. The issue was to refund \$5,194 million of 364-day bills maturing December 2 and to provide about \$1,806 million new cash. Tenders were opened on November 24. They totaled \$13,883 million, of which \$7,001 million was accepted, including \$203 million of noncompetitive tenders from the public and \$1,300 million of the bills issued at the average price to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 8.372 percent.

Cash Management Bills

On November 9 tenders were invited for approximately \$4,000 million of 73-day bills to be issued November 15, 1982, representing an additional amount of bills dated January 28, 1982, maturing January 27, 1983. The issue was to raise new cash. Tenders were opened on November 12. They totaled \$14,440 million, of which \$4,002 million was accepted. The average bank discount rate was 8.408 percent.

On November 26 tenders were invited for approximately \$5,000 million of 50-day bills to be issued December 1, 1982, representing an additional amount of bills dated July 22, 1982, maturing January 20, 1983. Tenders were opened on November 30. They totaled \$9,901 million, of which \$5,008 million was accepted. The average bank discount rate was 7.920 percent.

Also on November 26, tenders were invited for approximately \$3,000 million of 143-day bills to be issued December 6, 1982, representing an additional amount of bills dated October 28, 1982, maturing April 28, 1983. Tenders were opened on November 30. They totaled \$10,909 million, of which \$3,002 million was accepted. The average bank discount rate was 8.411 percent.

DECEMBER

Auctions of 2-Year and 4-Year Notes

On December 8 the Treasury announced that it would auction \$7,000 million of 2-year and \$5,000 million of 4-year notes to refund \$7,217 million of notes maturing December 31, 1982, and to raise \$4,783 million new cash. The notes offered were Treasury Notes of Series Z-1984, to be dated December 31, 1982, due December 31, 1984, and Treasury Notes of Series K-1986, to be dated December 31, 1982, due December 31, 1986, with interest payable on June 30 and December 31 in each year until maturity. Coupon rates of 9-3/8 percent and 10 percent, respectively, were set after the determinations as to which tenders were accepted on a yield auction basis. The 2-year notes were issued in a minimum denomination of \$5,000, and the 4-year notes in a minimum denomination of \$1,000.

Tenders for the 2-year notes were received until 1:30 p.m., EST, December 15, and totaled \$13,660 million, of which \$7,004 million was accepted at yields ranging from 9.42 percent, price 99.920, up to 9.50 percent, price 99.777. Noncompetitive tenders were accepted in full at the average yield of accepted competitive tenders, 9.46 percent, price 99.848. These totaled \$1,423 million. Competitive tenders accepted from private investors totaled \$5,581 million.

In addition to the \$7,004 million of tenders accepted in the auction process, \$280 million of tenders was awarded at the average price to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$600 million of tenders was accepted at the average price from Government accounts and Federal Reserve banks for their own account in exchange for maturing securities.

Tenders for the 4-year notes were received until 1:30 p.m., EST, December 16, and totaled \$10,617 million, of which \$5,007 million was accepted at yields ranging from 10.00 percent, price 100.000, up to 10.12 percent, price 99.613. Noncompetitive tenders were accepted in full at the average yield of accepted competitive tenders, 10.10 percent, price 99.677. These totaled \$994 million. Competitive tenders accepted from private investors totaled \$4,013 million.

In addition to the \$5,007 million of tenders accepted in the auction process, \$510 million of tenders was awarded at the average price to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$343 million of tenders was accepted at the average price from Government accounts and Federal Reserve banks for their own account in exchange for maturing securities.

Auction of 7-Year Notes

On December 14 the Treasury announced that it would auction \$4,500 million of 7-year notes to raise new cash. The notes offered were Treasury Notes of Series C-1990, to be dated January 4, 1983, due January 15, 1990, with interest payable on July 15 and January 15 in each year until maturity, issued in a minimum denomination of \$1,000. An interest rate of 10-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1:30 p.m., EST, December 21, and totaled \$11,454 million, of which \$4,502 million was accepted at yields ranging from 10.56 percent, price 99.692, up to 10.61 percent, price 99.449. Noncompetitive tenders for \$1 million or less from any one bidder were accepted in full at the average yield of accepted tenders, 10.58 percent, price 99.594. These totaled \$977 million. Competitive tenders accepted from private investors totaled \$3,525 million.

In addition to the \$4,502 million of tenders accepted in the auction process, \$330 million of tenders was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities.

The Notes of Series C-1990 were made generally available in registered form only, due to the provision of the Tax Equity and Fiscal Responsibility Act of 1982 which prohibits the issue of Treasury notes in bearer form after December 31, 1982. The Department had discontinued the issue of Treasury bonds in bearer form in September 1982.

Auction of 20-Year 1-Month Bonds

On December 14 the Treasury also announced that it would auction \$3,000 million of 20-year 1-month bonds to raise new cash. The bonds offered were Treasury Bonds of 2003, to be dated January 4, 1983, due February 15, 2003, with interest payable on August 15 and February 15 in each year until maturity, issued in a minimum denomination of \$1,000. An interest rate of 10-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the bonds were received until 1:30 p.m., EST, December 22, and totaled \$6,059 million, of which \$3,006 million was accepted at yields ranging from 10.70 percent, price 100.348, up to 10.77 percent, price 99.775. Noncompetitive tenders were accepted in full at the average yield of accepted tenders, 10.75 percent, price 99.938. These totaled \$634 million. Competitive tenders accepted from private investors totaled \$2,372 million.

52-Week Bills

On December 17 tenders were invited for approximately \$7,000 million of 364-day Treasury bills to be dated December 30, 1982, and to mature December 29, 1983. The issue was to refund \$5,260 million of 364-day bills maturing December 30 and to raise about \$1,740 million new cash. Tenders were opened on December 23. They totaled \$16,979 million, of which \$7,002 million was accepted, including \$195 million of noncompetitive tenders from the public and \$1,360 million of the bills issued at the average price to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$94 million of the bills was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 8.095 percent.

## UNITED STATES SAVINGS BONDS

Series EE and HH bonds, on sale since Jan. 1, 1980, are the only savings bonds currently sold. Series A-O were sold from Mar. 1, 1935, through Apr. 30, 1941. Series E was on sale from May 1, 1941, through Dec. 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through Apr. 30, 1952. Series H was sold from June 1, 1952, through Dec. 31, 1979. Series J and K were sold from

May 1, 1952, through Apr. 30, 1957. Details of the principal changes in issues, interest yields, maturities, and other terms appear in Treasury Bulletins of April 1951, May 1957, October and December 1959, May and October 1961, June 1968, and September 1970; and the Annual Report of the Secretary of the Treasury for fiscal years 1966 through 1980.

Table SB-1. — Sales and Redemptions by Series, Cumulative through Dec. 31, 1982

[In millions of dollars. Source: Monthly Statement of the Public Debt of the United States; Market Analysis Section, United States Savings Bonds Division]

Series	Sales 1/	Accrued discount	Sales plus accrued discount	Redemptions 1/	Amount outstanding	
					Interest-bearing debt	Matured non-interest-bearing debt

## MARKET BID YIELDS ON TREASURY SECURITIES, DEC. 31, 1982

Note: The curve is fitted by eye and based only on the most actively traded issues.  
Market yields on coupon issues due in less than 3 months are excluded.

## LEGEND

- x Fixed coupon issues.
- High coupon issues - 9% and higher fixed maturity issues.
- ▲ Callable issues.
- High coupon callable issues - plotted to earliest call date when prices are above par and to maturity date when prices are at par or below.
- \* 1½% exchange notes.
- + Bills - coupon equivalent of 3mo., 6mo., and 1yr. bills.

1/ Treasury series is the 20-year constant maturity rate read from daily Treasury yield curves and averaged for the month.

2/ Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service and having an original maturity of at least 20 years. Prior to June 1973, this series reflected bonds without call protection. From June 1973 to July 1976, the

series was adjusted to reflect 5 years call protection. Since that time, the series reflects bond yields regardless of the call protection offered.

3/ Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service. Prior to June 1970, the series was compiled by Securities Industries Association. Since then, the series has been compiled by Treasury.

## AVERAGE YIELDS OF LONG-TERM TREASURY, CORPORATE, AND MUNICIPAL BONDS

## FINANCIAL OPERATIONS OF GOVERNMENT AGENCIES AND FUNDS

## Government Corporations and Other Business-Type Activities

Treasury Department Circular No. 966, Revised, dated December 20, 1972, and volume I, part 2, chapter 4100 of the Treasury Fiscal Requirements Manual (Transmittal Letter No. 325) require Government agencies to submit business-type financial statements and related information to the Department of the Treasury for use in compiling financial reports of the U.S. Government. The circular was originally issued in 1956 pursuant to the authority of section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 66b) which requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government.

Department Circular No. 966, Revised, requires submission of semiannual financial statements by all Government corporations specifically subject to the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); any wholly owned and mixed-ownership corporations subsequently brought under the provisions of the act; all activities operating as revolving funds; and any other activities or agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature or whose activities result in the accumulation of substantial inventories, investments, and other recoverable assets. Regular governmental activities, which are of a nonbusiness-type nature, are required only to report on an annual basis.

The Statements of Financial Condition presented in the following table reflect the position of both business-type and regular governmental activities as of September 30, 1982. These statements are entirely the representation of the agency and have not been compared with any other reports submitted to the Treasury. Transfer appropriations, disclosed previously in memorandum columns, have been included with fund totals of the agency administering the program--the "spending" agency. Blank columns indicate that a financial statement was expected but not received by the Treasury. All amounts are reported in dollars.

Statements of Financial Condition, required for all activities, are published annually and appear in table GA-I-1. Statements of Income and Retained Earnings, required for all business-type activities, are also published annually and appear in table GA-I-2. Direct loans held by agencies and loans guaranteed or insured by agencies are published semiannually and appear in table GA-II-1. Tables detailing the status of accounts and loans receivable due from the public, required for all activities, are published annually and appear separately in the "Cash Management/Debt Collection" section of the Treasury Bulletin.

1/ Includes \$50,975,524 held by lending institutions not guaranteed or insured by the Federal Government.

Note.--If the maximum authority is indefinite, an amount equal to direct loans outstanding or guaranteed loans outstanding is shown in the maximum authority columns.

# International Statistics

## INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.

Table IFS-3 shows U.S. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-4 presents a measure of weighted-average changes in exchange rates between the U.S. dollar and the currencies of certain other countries.

Table IFS-1. — U.S. Reserve Assets

1983-Jan.....	33,936	11,144	11,144	5,267	9,490	8,035

1/ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

2/ Includes gold sold to the United States by the IMF with the right of repurchase, and gold deposited by the IMF to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases.

3/ Includes gold held by the Exchange Stabilization Fund.

4/ Includes allocations of SDR's in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR's.

Allocations of SDR's on Jan. 1 of respective years are as follows: 1970, \$867 million; 1971, \$717 million; 1972, \$710 million; 1979, 874 million (in SDR terms); 1980, 874 million (in SDR terms); and 1981, 857 million (in SDR terms).

5/ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be agreed upon by the parties to the transactions.

6/ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota.

1/ Includes Bank for International Settlements.

2/ Derived by applying reported transactions to benchmark data.

3/ Excludes notes issued to foreign official nonreserve agencies.

4/ Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.

5/ Includes liabilities payable in dollars to foreign banks, and liabilities payable in foreign currencies to foreign banks and to "other foreigners."

6/ Includes marketable U.S. Government bonds and notes held by foreign banks.

7/ Includes nonmarketable U.S. Government bonds and notes held by foreign banks.

8/ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.

Note.—Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States.

Data correspond generally to statistics following in this section and in the "Capital Movements" section, except for the exclusion of nonmarketable, nonconvertible U.S. Treasury notes issued to foreign official nonreserve agencies and the inclusion of investments by foreign official reserve agencies in debt securities of U.S. federally sponsored agencies and U.S. corporations. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

1/ This table presents calculations of weighted average percentage changes in the rates of exchange between the dollar and certain foreign currencies, in order to provide a measure of changes in the dollar's general foreign exchange value broader than a measure provided by any single exchange rate change. Calculations are provided for two sets of countries that account for a major share of U.S. foreign trade. U.S. bilateral trade patterns in 1972 are used as a convenient, readily available proxy for the assignment of relative weights to individual exchange rate changes, although such weights do not provide a full measure of individual currencies' relative importance in U.S. international transactions because they take no account of factors other than trade. The calculations do not purport to represent a guide to measuring the impact of exchange rate changes on U.S. international transactions.

Exchange rate data used in constructing the indices reported here differ somewhat from those used in earlier calculations to more accurately reflect end-of-period currency values.

The equations used are as follows:

Equation one is used to calculate a trade-weighted average of changes in the dollar cost of foreign currencies:

$$(EQ1) \quad E_m = \sum (\Delta \$/fc_i * M_i/\Sigma M)$$

Where:  $E_m$  is the weighted average of percentage changes in the dollar cost of individual foreign currencies;

$\Delta \$/fc_i$  is the percent change in the dollar cost of foreign currency  $i$ ; and

$M_i/\Sigma M$  is U.S. imports from country  $i$ , as a proportion of total U.S. imports from all countries in the set.

Equation two is used to calculate a trade-weighted average of changes in the foreign exchange cost of dollars:

$$(EQ2) \quad E_x = \sum (\Delta fc_i/\$ * X_i/\Sigma X)$$

Where:  $E_x$  is the weighted average of percentage changes in the foreign currency cost of dollars;

$\Delta fc_i/\$$  is the percent change in the foreign currency  $i$  cost of dollars; and

$X_i/\Sigma X$  is U.S. exports to country  $i$ , as a proportion of total U.S. exports to all countries in the set.

Equation three combines the above export-weighted and import-weighted averages to provide an overall measure of exchange rate change:

$$(EQ3) \quad E = [(E_m * m/m+x) * (-1)] + [E_x * x/m+x]$$

Where:  $m/m+x$  is U.S. imports as a proportion of its total trade with all countries in the set; and

$x/m+x$  is U.S. exports as a proportion of its total trade with all countries in the set.

2/ Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and United Kingdom.

3/ The currencies of 46 IMF member countries which account for approximately 90 percent of U.S. total trade.

## CAPITAL MOVEMENTS

### Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by banks, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the Treasury Bulletin.

The reporting forms and instructions 1/ used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. The most recent, general revision of the report forms became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31, 1978. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

### Basic Definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements which is included in the classification "Other Europe."

### Reporting Coverage

Reports are required from banks, bank holding companies, International Banking Facilities (IBF's), securities brokers and dealers, and nonbanking enterprises in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks and some brokers and dealers file reports monthly covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Beginning with reports due as of June 30, 1978, quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies vis-a-vis foreigners. Effective January 31, 1982, the specified exemption level applicable to the monthly and quarterly banking reports was raised from \$2 million to \$10 million and is based on the average for the report dates during a 6-month period, including the current report date. There is no separate exemption level for the semiannual reports.

Banks, securities brokers and dealers, and in some instances nonbanking enterprises report monthly their transactions in securities with foreigners; the applicable exemption level is \$500,000 on the grand total of purchases and on the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated foreigners exceed a specified exemption level on a two quarter-end average basis. Effective March 31, 1982, this exemption level was set at \$10 million, up from \$2 million. Nonbanking enterprises also report for each month their U.S. dollar-denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

### Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, brokers, and dealers in the United States. Beginning April 1978, the following major changes were made in the reporting coverage: Amounts due to banks' own foreign offices are reported separately; a previous distinction between short-term and long-term liabilities was eliminated; a separation was

provided of the liabilities of the respondents themselves from their custody liabilities to foreigners; and foreign currency liabilities are only available quarterly. Also, beginning April 1978, the data on liabilities were made more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners.

Section II presents the claims on foreigners reported by banks in the United States. Beginning with data reported as of the end of April 1978, a distinction was made between banks' claims held for their own account and claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, the distinction in reporting of long-term and short-term components of banks' claims was discontinued. Maturity data began to be collected quarterly on a time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency claims are also collected only on a quarterly basis. Beginning March 1981, this claims coverage was extended to certain items in the hands of brokers and dealers in the United States.

Another important change in the claims reporting, beginning with new quarterly data as of June 30, 1978, was the adoption of a broadened concept of "foreign public borrower," which replaced the previous category of "foreign official institution" to produce more meaningful information on lending to the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departments; State, provincial, and local governments of foreign countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section III includes supplementary statistics on U.S. banks' liabilities to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the TIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. banks' dollar liabilities to, and banks' own dollar claims on, countries not regularly reported separately are available semiannually in the May and November issues of the Treasury Bulletin.

Section IV shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data also exclude claims held through banks in the United States. Beginning with data reported as of December 31, 1978, there is separation of the financial liabilities and claims of reporting enterprises from their commercial liabilities and claims; and items are collected on a time-remaining basis instead of the prior original maturity basis.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, table IFS-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

Note.--When two series of figures are presented for a single reporting date, changes in reporting coverage are denoted. The first series of figures is coverage to those for the preceding date; the second series is comparable to those shown for the following date.

<sup>1/</sup> Copies of the reporting forms and instructions may be obtained from the Office of Data Management, Office of the Assistant Secretary for International Affairs, Department of the Treasury, Washington, D.C. 20220, or from district Federal Reserve banks.

## FOREIGN CURRENCY POSITIONS

Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U.S. banks and nonbanking firms. Reports cover eight major foreign exchange market currencies and U.S. dollars held abroad. Reporting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published monthly since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of November 1, 1978, for the weekly reports, and as of October 31, 1978 (the last business day of the month), for the monthly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of September 1978. Among the changes on the forms, the Belgian franc was deleted as a reporting currency.

The monthly tables for all eight major foreign currencies have been deleted from publication beginning with the May 1982 Treasury Bulletin. All tables for the Italian lira and French franc were also deleted.

Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions," and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majority-owned subsidiaries of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means

due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or indirectly, own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

Reporting Threshold

The exemption level applicable to banks and banking institutions was \$10 million equivalent through January 1982, when it was raised to \$100 million. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 million equivalent on all nonbank forms from March 1975 through November 1976. It was raised to \$2 million equivalent on the monthly reports of positions held in the United States from November 1976 through September 1978. The exemption level was raised to \$3 million on foreign subsidiary positions on June 30, 1977, and for positions held in the United States on September 30, 1978. The exemption level for nonbanking firms was raised to \$100 million on positions in the United States in January 1982 and on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries, U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

Description of Statistics

Data collected on the Treasury foreign currency forms are published in the Treasury Bulletin in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

## FOREIGN CURRENCY POSITIONS

## Footnotes to Tables FCP-I through FCP-VII

## SECTION I

1/ Worldwide net positions on the last business day of the calendar quarter of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. Excludes receivables and installment paper which have been sold or discounted before maturity, U.S. parent companies' investment in their majority-owned foreign subsidiaries, fixed assets (plant and equipment), and capitalized leases for plant and equipment.

2/ Foreign branches and majority-owned partnerships and subsidiaries only.

3/ Weekly worldwide net positions of banks and banking institutions in the United States, and their foreign branches and majority-owned foreign subsidiaries. Excludes capital assets and liabilities.

4/ Foreign branches and majority-owned subsidiaries only.

## SECTIONS II THROUGH VII

1/ Positions of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. In section VII positions of foreign branches and majority-owned partnerships and subsidiaries only.

2/ Includes unsettled spot foreign exchange purchase contracts, as well as currency, demand, and time deposits, negotiable and other readily transferable financial instruments maturing in 1 year or less from the report date, and intracompany claims and loans to other parties repayable on demand. Other loans, accounts receivable, and unaccepted trade drafts are excluded.

3/ Includes unsettled spot foreign exchange sales contracts, intracompany liabilities, other than short-term trade payables, short-term borrowings due in 1 year or less from the report date, and the current portion of long-term debt. Other loans, accrued expenses, and accounts payable are excluded.

4/ Due in 1 year or less; includes intracompany trade receivables. Receivables and installment paper sold or discounted before maturity are excluded.

5/ Due in 1 year or less; includes intracompany trade payables.

6/ All current assets other than liquid assets and short-term trade receivables, and financial assets maturing in more than 1 year from the report date. Includes intracompany accounts, inventories, prepayments, long-term trade receivables, long-term intracompany claims, and stocks, bonds, and other securities. Fixed assets (plant and equipment) and parents' investment in majority-owned foreign subsidiaries are excluded.

7/ All financial liabilities other than short-term debt and short-term trade payables; includes long-term trade payables, intracompany liabilities, accrued expenses, and liabilities maturing in more than 1 year from the report date. Capitalized plant and equipment leases are excluded.

8/ Outstanding amounts of foreign exchange which have been contracted to be received or delivered in the future. Excludes spot exchange.

9/ Columns 1, 3, 5, and 7 less columns 2, 4, 6, and 8.

10/ Representative rates on the report date. Canadian dollar and United Kingdom pound rates are expressed in U.S. dollars per unit of foreign currency, all others in foreign units per U.S. dollar.

11/ Banks and banking institutions in the United States and their foreign branches and majority-owned subsidiaries. In section VII, foreign branches and majority-owned subsidiaries only.

12/ Excludes capital assets.

13/ Excludes capital liabilities.

14/ Includes both spot and forward exchange contracts.

15/ Columns 3 and 9 less columns 6 and 12.

16/ See footnote 10.

ESF prior year administrative adjustment <u>5/</u> .....	17	(8)
Net income.....	230,035	497,733

1/ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SDR's) based on a weighted average of exchange rates for the currencies of related member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

2/ Excludes foreign exchange transactions for future and spot delivery.

3/ The exchange translation liability represents the amount of loss the Exchange Stabilization Fund (ESF) would sustain on outstanding \$1.2 billion equivalent of German mark swaps with the Federal Reserve if those swaps were liquidated on Sept. 30, 1982.

4/ A non-interest-bearing liability to the U.S. Treasury resulting from

the transfer to the ESF of foreign currencies drawn from the IMF by the United States.

5/ Administrative expenses and adjustments incurred in current fiscal year but chargeable to prior fiscal years.

Note.—Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the Treasury Bulletin. Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 Treasury Bulletin.

## Introduction

The Treasury Fiscal Requirements Manual (Bulletin B2-1B, July 1, 1982) advised agencies of a continuing reporting requirement to obtain data on the status of accounts and loans receivable due from the public, and on agencies' accounting and debt collection practices.

These receivables and the agencies' methods of collecting them have been discussed at recent congressional hearings. Under the Federal Claims Collection Act of 1966, and the implementing joint standards issued by the Department of Justice and the General Accounting Office, operating departments and agencies have primary responsibility for collection of amounts arising from their programs.

Bulletin B2-1B required all agencies to prepare a supporting schedule to the Statement of Financial Condition, SF-220, for accounts, loans, or other receivables due from the public as of September 30, 1982. The six sections of

the schedule reproduced in the following tables give data concerning the reconciliation of accounts balances; an aging schedule of amounts due; the disposition of writeoffs and adjustments to allowances; administrative action taken on delinquent amounts; an aging schedule of rescheduled receivables; and a reconciliation of interest and penalties assessed on delinquencies. The first table gives data about accounts receivable; the second and third tables detail loans receivable and other, or noncurrent, receivables, respectively. The data is shown on a summary basis by agency and is reported in dollars.

The information shown in these tables is based on data submitted to the Treasury, Bureau of Government Financial Operations, per Treasury Department Circular 966, Revised, dated December 20, 1972, and volume I, part 2, chapter 4100 of the Treasury Fiscal Requirements Manual. These financial statements appear annually in the Treasury Bulletin.

## Status of Accounts Receivable Due from the Public as of Sept. 30, 1982

Accounts receivable	TOTAL	Legislative branch	Funds appropriated to the President	Department of Agriculture	Department of Commerce	Department of Defense
<b>SECTION I: Reconciliation</b>

The figures in the following notes were highlighted by the OMB Debt Collection Task Force:

Not delinquent accounts receivable reported by the Internal Revenue Service include \$2,613 million of past-due taxes for which taxpayers are being initially notified.

Loans receivable reported by the Federal Financing Bank include \$27,782 million of advances to other Federal agencies.

## Special Reports

## Total Federal Aid to States, Fiscal Years 1978-82

This table is a 5-year summary of the Federal aid to each State, territory, and possession of the United States. The Federal aid reported includes grants-in-aid and shared revenues. Federal aid payments to individuals and private institutions are excluded and certain payments to nonprofit institutions are included. This table also represents total actual payments made each year for grants-in-aid on a checks-issued basis and for payments in kind. Administrative expenses associated with these Federal aid payments are not included.

Federal aid to States and other areas shown in this summary consists of budget authority and outlays by the Federal Government in support of State or local programs of Government operations or provision of services to the public as defined in Office of Management and Budget Circular No. A-11.

Some of the major grant payments in recent years have been in the areas of education, public health, income security, and transportation. These programs and others are financed but not directly administered by the Federal Government.

The summary data in this table is taken from the comparable fiscal year detailed Federal Aid to States Report which gives grant outlays by department and major agency, by individual program, and a total for each State and other area. The annual Federal Aid to States Report is compiled from data furnished by executive departments and agencies pursuant to Treasury Circular No. 1014, Revised, and I TFRM 2-7000 of the Treasury Fiscal Requirements Manual, and is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.
